AIAA JOURNAL
Vol. 30, No. 12, December 1992

1992 *AIAA Journal* Index

How to Use the Index

In the Subject Index, pages 3006–3019, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 3020–3022, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 3023–3039, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1992, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index. The Book Review Index, page 3039, lists the books reviewed during 1992, the author, publisher, reviewer, and the issue, number, and page on which the review appeared.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Crossflow Aerodynamic Characteristics of a Noncircular Cylinder with and Without Strakes **J92-455**
Development of the Wake of an Airfoil with Riblets **J92-448**
Determination of Vortex Burst Location on Delta Wings from Surface Pressure Measurements **J92-428**
Generalized Vortex Lattice Method for Oscillating Lifting Surfaces in Subsonic Flow **J92-426**
Analytical Solutions for Hypersonic Flow Past Slender Power-Law Bodies at Small Angle of Attack **J92-421**
Implicit Navier-Stokes Solver for Three-Dimensional Compressible Flows **J92-417**
Unsteady Turbulent Skin-Friction Measurement in an Adverse Pressure Gradient **J92-416**
Generalized Multipoint Inverse Airfoil Design **J92-412**
Far-Field Computational Boundary Conditions for Two-Dimensional External Flow Problems **J92-407**
Efficient Iterative Methods for the Transonic Small Disturbance Equation **J92-398**
Dynamical Scaling of a Model Unsteady Separating Flow **J92-397**
Analysis of the Onset of Dynamic Stall **J92-384**
Reduction of the Side Force on Pointed Forebodies Through Add-On Tip Devices **J92-333**
Methodology for Calculating Aerodynamic Sensitivity Derivatives **J92-376**
Flowfield of a Lifting Rotor in Hover: A Navier-Stokes Simulation **J92-371**
Induced Drag of a Wing in a Circular Wind Tunnel **J92-360**
Three-Dimensional Wings and Waveriders with Attached Shock Waves **J92-355**
Fourier Functional Analysis for Unsteady Aerodynamic Modeling **J92-346**
Stretching of Freestream Turbulence in the Stagnation Region **J92-338**
Effect of Wing Tip Vortices on a Trailing Aircraft **J92-336**
Effects of a Leading-Edge Fillet on the Flow Past an Appendage-Body Junction **J92-334**
Taylor Series Approximation of Geometric Shape Variation for the Euler Equations **J92-331**
Effect of Model Cooling on Periodic Transonic Flow **J92-315**
Parallel Computing Strategies for Block Multigrid Implicit Solution of the Euler Equations **J92-309**
Joint Computational/Experimental Aerodynamics Research on a Hypersonic Vehicle, Part 2: Computational Results **J92-306**
Joint Computational/Experimental Aerodynamics Research on a Hypersonic Vehicle, Part 1: Experimental Results **J92-305**
Compact Higher Order Characteristic-Based Euler Solver for Unstructured Grids **J92-304**
Simplified Linear Stability Transition Prediction Method for Separated Boundary Layers **J92-298**
Streamlines, Vorticity Lines, and Vortices Around Three-Dimensional Bodies **J92-272**
Three-Dimensional Unstructured Multigrid for the Euler Equations **J92-263**
Aerodynamic Characteristics of Hoar Frost Roughness **J92-255**
Nonuniform Motion of Leading-Edge Vortex Breakdown on Ramp Pitching Delta Wings **J92-254**
Calculation of Potential Flow Around Airfoils Using a Discrete Vortex Method **J92-253**
Effect of Tunnel Walls on Vortex Breakdown Location over Delta Wings **J92-233**
Measurements in a Leading-Edge Separation Bubble due to a Simulated Airfoil Ice Accretion **J92-216**
Domain-Decomposition Algorithm Applied to Multielement Airfoil Grids **J92-215**
High Alpha Aerodynamic Control by Tangential Fuselage Blowing **J92-196**
Compressible Turbulent Boundary Layers with Heat Addition by Homogeneous Condensation **J92-191**
Multipoint Inverse Airfoil Design Method Based on Conformal Mapping **J92-175**
High Aerodynamic Loads on an Airfoil Submerged in an Unsteady Stream **J92-161**
Experimental Investigations of the Vortex Flow on Delta Wings at High Incidence **J92-151**
Calculation of Real-Gas Effects on Blunt-Body Trim Angles **J92-148**
Flow Near the Trailing Edge of an Airfoil **J92-130**
Approximate Formula of Weak Oblique Shock Wave Angle **J92-121**
Experimental Investigation of the Perpendicular Rotor Blade-Vortex Interaction at Transonic Speeds **J92-108**
Effect of Airfoil (Trailing-Edge) Thickness on the Numerical Solution of Panel Methods Based on the Dirichlet Boundary Condition **J92-102**
Numerical Investigation of Vortex Breakdown on a Delta Wing **J92-088**
Numerical Investigation of Laminar Separated Trailing-Edge Flows **J92-087**
Zonal Flow Analysis Method for Two-Dimensional Airfoils **J92-075**
Unsteady Pressure Field and Vorticity Production over a Pitching Airfoil **J92-056**
Local Solution Acceleration Method for the Euler and Navier-Stokes Equations **J92-049**
Unsteady Circulation Control Aerodynamics of a Circular Cylinder with Periodic Jet Blowing **J92-042**
Importance of Fresh Air in Manometer Tubing **J92-040**
Interaction of a Planar Shock Wave with a Double-Wedge-Like Structure **J92-038**
Turbulent Boundary-Layer Characteristics over a Flat-Plate/Wedge Configuration at Mach 6 **J92-036**
Asymmetric Separated Flows at Supersonic Speeds **J92-017**
Measurements of the Flow Around a Lifting-Wing/Body Junction **J92-001**
Unsteady Separation over Maneuvering Bodies **J90-340**

Aeroelasticity and Aeroservoelasticity

Flutter Suppression of Thin Airfoils Using Active Acoustic Excitations **J92-457**
Method of Simulating Unsteady Turbomachinery Flows with Multiple Perturbations **J92-427**

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Crossflow Aerodynamic Characteristics of a Noncircular Cylinder with and Without Strakes **J92-455**
Development of the Wake of an Airfoil with Riblets **J92-448**
Determination of Vortex Burst Location on Delta Wings from Surface Pressure Measurements **J92-428**
Generalized Vortex Lattice Method for Oscillating Lifting Surfaces in Subsonic Flow **J92-426**
Analytical Solutions for Hypersonic Flow Past Slender Power-Law Bodies at Small Angle of Attack **J92-421**
Implicit Navier-Stokes Solver for Three-Dimensional Compressible Flows **J92-417**
Unsteady Turbulent Skin-Friction Measurement in an Adverse Pressure Gradient **J92-416**
Generalized Multipoint Inverse Airfoil Design **J92-412**
Far-Field Computational Boundary Conditions for Two-Dimensional External Flow Problems **J92-407**
Efficient Iterative Methods for the Transonic Small Disturbance Equation **J92-398**
Dynamical Scaling of a Model Unsteady Separating Flow **J92-397**
Analysis of the Onset of Dynamic Stall **J92-384**
Reduction of the Side Force on Pointed Forebodies Through Add-On Tip Devices **J92-333**
Methodology for Calculating Aerodynamic Sensitivity Derivatives **J92-376**
Flowfield of a Lifting Rotor in Hover: A Navier-Stokes Simulation **J92-371**
Induced Drag of a Wing in a Circular Wind Tunnel **J92-360**
Three-Dimensional Wings and Waveriders with Attached Shock Waves **J92-355**
Fourier Functional Analysis for Unsteady Aerodynamic Modeling **J92-346**
Stretching of Freestream Turbulence in the Stagnation Region **J92-338**
Effect of Wing Tip Vortices on a Trailing Aircraft **J92-336**
Effects of a Leading-Edge Fillet on the Flow Past an Appendage-Body Junction **J92-334**
Taylor Series Approximation of Geometric Shape Variation for the Euler Equations **J92-331**
Effect of Model Cooling on Periodic Transonic Flow **J92-315**
Parallel Computing Strategies for Block Multigrid Implicit Solution of the Euler Equations **J92-309**
Joint Computational/Experimental Aerodynamics Research on a Hypersonic Vehicle, Part 2: Computational Results **J92-306**
Joint Computational/Experimental Aerodynamics Research on a Hypersonic Vehicle, Part 1: Experimental Results **J92-305**
Compact Higher Order Characteristic-Based Euler Solver for Unstructured Grids **J92-304**
Simplified Linear Stability Transition Prediction Method for Separated Boundary Layers **J92-298**
Streamlines, Vorticity Lines, and Vortices Around Three-Dimensional Bodies **J92-272**
Three-Dimensional Unstructured Multigrid for the Euler Equations **J92-263**
Aerodynamic Characteristics of Hoar Frost Roughness **J92-255**
Nonuniform Motion of Leading-Edge Vortex Breakdown on Ramp Pitching Delta Wings **J92-254**
Calculation of Potential Flow Around Airfoils Using a Discrete Vortex Method **J92-253**
Effect of Tunnel Walls on Vortex Breakdown Location over Delta Wings **J92-233**
Measurements in a Leading-Edge Separation Bubble due to a Simulated Airfoil Ice Accretion **J92-216**
Domain-Decomposition Algorithm Applied to Multielement Airfoil Grids **J92-215**
High Alpha Aerodynamic Control by Tangential Fuselage Blowing **J92-196**
Compressible Turbulent Boundary Layers with Heat Addition by Homogeneous Condensation **J92-191**
Multipoint Inverse Airfoil Design Method Based on Conformal Mapping **J92-175**
High Aerodynamic Loads on an Airfoil Submerged in an Unsteady Stream **J92-161**
Experimental Investigations of the Vortex Flow on Delta Wings at High Incidence **J92-151**
Calculation of Real-Gas Effects on Blunt-Body Trim Angles **J92-148**
Flow Near the Trailing Edge of an Airfoil **J92-130**
Approximate Formula of Weak Oblique Shock Wave Angle **J92-121**
Experimental Investigation of the Perpendicular Rotor Blade-Vortex Interaction at Transonic Speeds **J92-108**
Effect of Airfoil (Trailing-Edge) Thickness on the Numerical Solution of Panel Methods Based on the Dirichlet Boundary Condition **J92-102**
Numerical Investigation of Vortex Breakdown on a Delta Wing **J92-088**
Numerical Investigation of Laminar Separated Trailing-Edge Flows **J92-087**
Zonal Flow Analysis Method for Two-Dimensional Airfoils **J92-075**
Unsteady Pressure Field and Vorticity Production over a Pitching Airfoil **J92-056**
Local Solution Acceleration Method for the Euler and Navier-Stokes Equations **J92-049**
Unsteady Circulation Control Aerodynamics of a Circular Cylinder with Periodic Jet Blowing **J92-042**
Importance of Fresh Air in Manometer Tubing **J92-040**
Interaction of a Planar Shock Wave with a Double-Wedge-Like Structure **J92-038**
Turbulent Boundary-Layer Characteristics over a Flat-Plate/Wedge Configuration at Mach 6 **J92-036**
Asymmetric Separated Flows at Supersonic Speeds **J92-017**
Measurements of the Flow Around a Lifting-Wing/Body Junction **J92-001**
Unsteady Separation over Maneuvering Bodies **J90-340**

Aeroelasticity and Aeroservoelasticity

Flutter Suppression of Thin Airfoils Using Active Acoustic Excitations **J92-457**
Method of Simulating Unsteady Turbomachinery Flows with Multiple Perturbations **J92-427**

Nonlinear Vibration and Radiation from a Panel with Transition to Chaos J92-414
Vortical Flow Computations on a Flexible Blended Wing-Body Configuration J92-387
Aeroelastic Modal Characteristics of Mistuned Blade Assemblies: Mode Localization and Loss of Eigenstructure J92-386
Helicopter Rotor Blade Aeroelasticity in Forward Flight with an Implicit Structural Formulation J92-348
Sensitivity Analysis of Discrete Periodic Systems with Applications to Helicopter Rotor Dynamics J92-299
Spatial Adaptation of Unstructured Meshes for Unsteady Aerodynamic Flow Computations J92-186
Exploratory Design Studies of Actively Controlled Wings Using Integrated Multidisciplinary Synthesis J92-176
Nonlinear Vibrations of Rectangular Laminated Thin Plates J92-024
Time Domain Flutter Analysis of Cascades Using a Full-Potential Solver J92-022
Nonlinear Stall Flutter and Divergence Analysis of Cantilevered Graphite/Epoxy Wings J92-021
Streamwise Upwind Algorithm for Computing Unsteady Transonic Flows Past Oscillating Wings J91-263

Aerospace Plane

Navier-Stokes Computation of Wing/Rotor Interaction for a Tilt Rotor in Hover J92-408
Navier-Stokes Simulation for Cone-Derived Waverider J92-225
Similarity in Supersonic Mixing Layers J92-190

Noise

Effect of Modal Interaction on Sound Radiation from Vibrating Structures J92-449
Aeroacoustic Environment of an Advanced Short Takeoff and Vertical Landing Aircraft in Hover J92-410
Advanced Propeller Noise Prediction in the Time Domain J92-357
Direct Frequency Domain Calculation of Open Rotor Noise J92-356
Relationship Between Instability Waves and Noise of High-Speed Jets J92-262
High-Speed Propeller Noise Prediction—A Multidisciplinary Approach J92-258
Study of Intensification Zones in a Rectangular Acoustic Cavity J92-180
Asymptotic Modal Analysis of a Rectangular Acoustic Cavity Excited by Wall Vibration J92-179
Identification of Helicopter Noise Using a Neural Network J92-093
Models of Space-Averaged Energetics of Plates J92-092
Plate Acceleration and Sound Transmission Due to Random Acoustic and Boundary-Layer Excitation J92-090
Higher Approximations in the Asymptotic Theory of Propeller Noise J92-003

Powerplant Integration

Higher Approximations in the Asymptotic Theory of Propeller Noise J92-003

Propeller and Rotor Systems

Flowfield of a Lifting Rotor in Hover: A Navier-Stokes Simulation J92-371
Advanced Propeller Noise Prediction in the Time Domain J92-357
Direct Frequency Domain Calculation of Open Rotor Noise J92-356
Vibration of Spinning Ring-Stiffened Thin Cylindrical Shells J92-350
Sensitivity Analysis of Discrete Periodic Systems with Applications to Helicopter Rotor Dynamics J92-299
High-Speed Propeller Noise Prediction—A Multidisciplinary Approach J92-258
Boundary Element Method for the Analysis of the Unsteady Flow Around Extreme Propeller Geometries J92-101
Discretization Errors Inherent in Finite Difference Solution of Propeller Noise Problems J92-091
Extension-Bend-Twist Coupling Behavior of Nonhomogeneous Anisotropic Beams with Initial Twist J92-072

Rotorcraft

Helicopter Rotor Blade Aeroelasticity in Forward Flight with an Implicit Structural Formulation J92-348
Sensitivity Analysis of Discrete Periodic Systems with Applications to Helicopter Rotor Dynamics J92-299
Adequacy of Modeling Turbulence and Related Effects on Helicopter Response J92-217
Experimental Investigation of the Perpendicular Rotor Blade-Vortex Interaction at Transonic Speeds J92-108
Identification of Helicopter Noise Using a Neural Network J92-093
Extension-Bend-Twist Coupling Behavior of Nonhomogeneous Anisotropic Beams with Initial Twist J92-072

Safety

Analysis of Fastened Structural Connections J92-431
Selection of Noisy Measurement Locations for Error Reduction in Static Parameter Identification J92-351
Aerodynamic Characteristics of Hoar Frost Roughness J92-255

STOL/VTOL/STOVL

Aeroacoustic Environment of an Advanced Short Takeoff and Vertical Landing Aircraft in Hover J92-410
Navier-Stokes Computation of Wing/Rotor Interaction for a Tilt Rotor in Hover J92-408
Adequacy of Modeling Turbulence and Related Effects on Helicopter Response J92-217
Impingement Tones of Large Aspect Ratio Supersonic Rectangular Jets J92-044

Structural Design (Including Loads)

Analysis of Fastened Structural Connections J92-431
Selection of Noisy Measurement Locations for Error Reduction in Static Parameter Identification J92-351
Composite Laminated Shells Under Internal Pressure J92-250
Optimum Design of a Composite Structure with Three Types of Manufacturing Constraints J92-249
Influence of Geometric Nonlinearities on Skin-Stiffener Interface Stresses J92-154
Nonlinear Membership Functions in Multiobjective Fuzzy Optimization of Mechanical and Structural Systems J92-032

Structural Materials

Role of Matrix in Viscoplastic Behavior of Thermoplastic Composites at Elevated Temperature J92-404
Influence of Geometric Nonlinearities on Skin-Stiffener Interface Stresses J92-154
Elastoviscoplastic Buckling Behavior of Simply Supported Columns J92-033

Testing, Flight and Ground

Importance of Fresh Air in Manometer Tubing J92-040

Vibration

Criterion for Decoupling Dynamic Equations of Motion of Linear Gyroscopic Systems J92-480
Active Control of Interior Noise in Model Aircraft Fuselages Using Piezoceramic Actuators J92-411
Aeroelastic Modal Characteristics of Mistuned Blade Assemblies: Mode Localization and Loss of Eigenstructure J92-386
Free Vibration Analysis of Rectangular Plates with Free Edges and Line Support Along Diagonals J92-363
Vibration of Spinning Ring-Stiffened Thin Cylindrical Shells J92-350
Accelerated Subspace Iteration for Eigenvector Derivatives J92-321
Dynamic Condensation Method for Structural Eigenvalue Analysis J92-154
Stability of Elastic Systems Under Follower Forces J92-111
Vibration Characteristics of Pretwisted Aerofoil Cross-Section Blade Packets Under Rotating Conditions J92-031
Nonlinear Vibrations of Rectangular Laminated Thin Plates J92-024

Weather Hazards

Aerodynamic Characteristics of Hoar Frost Roughness J92-255

Energy

Fuel Cells

Production of Oxygen on the Moon: Which Processes Are Best and Why J92-454

Rotating Machinery

Explicit Navier-Stokes Computation of Cascade Flows Using the k-ϵ Turbulence Model J92-002

Fluid Dynamics

Aeroacoustics

Flutter Suppression of Thin Airfoils Using Active Acoustic Excitations J92-457
Effect of Modal Interaction on Sound Radiation from Vibrating Structures J92-449
Nonlinear Vibration and Radiation from a Panel with Transition to Chaos J92-414
Optical Microphone for the Detection of Hidden Helicopters J92-413
Generalized Multipoint Inverse Airfoil Design J92-412
Active Control of Interior Noise in Model Aircraft Fuselages Using Piezoceramic Actuators J92-411
Aeroacoustic Environment of an Advanced Short Takeoff and Vertical Landing Aircraft in Hover J92-410
Broadband Shock Associated Noise from Supersonic Jets Measured by a Ground Observer J92-374

Experimental Observations of Instability Modes in a Rectangular Jet J92-373
Advanced Propeller Noise Prediction in the Time Domain J92-357
Direct Frequency Domain Calculation of Open Rotor Noise J92-356
Relationship Between Instability Waves and Noise of High-Speed Jets J92-262
Two-Step Method for Evolving Nonlinear Acoustic Systems to a Steady State J92-259
High-Speed Propeller Noise Prediction—A Multidisciplinary Approach J92-258
Standing Acoustic Waves in a Low Mach Number Shear Flow J92-257
Effect of Acoustic Excitation on Stalled Flows over an Airfoil J92-221
Acoustic Sources in a Tripped Flow past a Resonator Tube J92-220
Study of Intensification Zones in a Rectangular Acoustic Cavity J92-180
Asymptotic Modal Analysis of a Rectangular Acoustic Cavity Excited by Wall Vibration J92-179
Experimental Investigation of Supersonic Flow over Two Cavities in Tandem J92-178
High Resolution Computation of Unsteady Flows in Pulsed Lasers J92-109
Transition Control of Instability Waves over an Acoustically Excited Flexible Surface J92-098
Identification of Helicopter Noise Using a Neural Network J92-093
Models of Space-Averaged Energetics of Plates J92-092
Discretization Errors Inherent in Finite Difference Solution of Propeller Noise Problems J92-091
Plate Acceleration and Sound Transmission Due to Random Acoustic and Boundary-Layer Excitation J92-090
Computing Boundary Forces Due to Unsteady, Inviscid, Incompressible Flow J92-089
Preconditioned Upwind Methods to Solve Incompressible Navier-Stokes Equations J92-076
Sound Transmission Through a High-Temperature Acoustic Probe Tube J92-046
Sound Generation by a Stenosis in a Pipe J92-045
Impingement Tones of Large Aspect Ratio Supersonic Rectangular Jets J92-044
Removal of Spurious Reflections from Computational Fluid Dynamic Solutions with the Complex Cepstrum J92-004
Higher Approximations in the Asymptotic Theory of Propeller Noise J92-003

Boundary Layers and Heat Transfer—Laminar

Example of Second-Mode Instability Dominance at a Mach Number of 5.2 J92-473
Curvature Corrections to Reynolds Stress Model for Computation of Turbulent Recirculating Flows J92-470
Implementation of Vigneron's Streamwise Pressure Gradient Approximation in Parabolized Navier-Stokes Equations J92-433
Unsteady Laminar Compressible Swirling Flow with Massive Blowing J92-409
Linear Stability of Supersonic Cone Boundary Layers J92-375
Crossflow Vortex and Transition Measurements by Use of Multielement Hot Films J92-340
Effect of Model Cooling on Periodic Transonic Flow J92-315
Flow Separation in Vicinity of a Moving Boundary J92-300
Separated High Enthalpy Dissociated Laminar Hypersonic Flow Behind a Step —Pressure Measurements J92-286
Effect of a Bulge on the Subharmonic Instability of Subsonic Boundary Layers J92-260
Patterns of Vortex Shedding from an Oscillating Circular Cylinder J92-197
Skin-Friction Gauge for Use in Hypervelocity Impulse Facilities J92-124
Numerical Investigation of Laminar Separated Trailing-Edge Flows J92-087

Boundary Layers and Heat Transfer—Turbulent

Downstream Influence Scaling of Turbulent Flow Past Expansion Corners J92-474
Correlation of Type III Turbulent Shock Interaction Heating Data on a Hemisphere J92-472
New Wall-Reflection Model Applied to the Turbulent Impinging Jet J92-471
Experimental Study on the Evolution of a Wall Layer from a Wake J92-452
Quasiconical Flowfield Structure of the Three-Dimensional Single Fin Interaction J92-447
Correlation of Mean Velocity Measurements Downstream of a Swept Backward-Facing Step J92-423
Unsteady Turbulent Skin-Friction Measurement in an Adverse Pressure Gradient J92-416
Dilatation-Dissipation Corrections for Advanced Turbulence Models J92-415
Numerical Simulation of Slot Injection into a Turbulent Supersonic Stream J92-379
Assessment of Compressibility Corrections to the k-ϵ Model in High-Speed Shear Layers J92-370
Stretching of Freestream Turbulence in the Stagnation Region J92-338
Exploratory Study of Wall Pressure Fluctuations in a Mach 5, Sharp Fin-Induced Turbulent Interaction J92-337
Effects of a Leading-Edge Fillet on the Flow Past an Appendage-Body Junction J92-334
Viscous Eddies over a Grooved Surface Computed by a Gaussian-Integration Galerkin Boundary-Element Method J92-333
Drag Reduction in Accelerating Flow J92-327
Performance of Popular Turbulence Models for Attached and Separated Adverse Pressure Gradient Flows J92-313
Interaction Between Crossing Oblique Shocks and a Turbulent Boundary Layer J92-297
Reynolds Number Dependence of the Freestream Turbulence Effects on Turbulent Boundary Layers J92-284
Study of Turbulence on Supersonic Compression Surfaces Using Reynolds Stress Model J92-261
Eigenfunction Analysis of Turbulent Mixing Phenomena J92-256
Influence of Freestream Values on k-ω Turbulence Model Predictions J92-244
Extrapolation Procedures for the Time-Dependent Navier-Stokes Equations J92-243
Second-Order Modeling of Boundary-Free Turbulent Shear Flows J92-229
Effects of Gas Density on the Structure of Liquid Jets in Still Gases J92-227
Renormalization Group Based Algebraic Turbulence Model for Three-Dimensional Turbomachinery Flows J92-222
Hypersonic Shock-Wave/Turbulent-Boundary-Layer Interaction Flows J92-218
Turbulent Flow Past a Backward-Facing Step: A Critical Evaluation of Two-Equation Models J92-195
Three-Dimensional Strip-Integral Method for Incompressible Turbulent Boundary Layers J92-181
Interaction of a Longitudinal Vortex with a Three-Dimensional, Turbulent Boundary Layer J92-177
Cylinder-Induced Shock-Wave Boundary-Layer Interaction J92-166
Viscous Drag Reduction Using Streamwise-Aligned Riblets J92-162
Semiconductor Laser Doppler Anemometer for Applications in Aerodynamic Research J92-152
Helical-Perturbation Device for Cylinder-Wing Vortex Generators J92-146
Nonadiabatic and Three-Dimensional Effects in Compressible Turbulent Boundary Layers J92-135
Structure of Supersonic Turbulent Flow Past a Swept Compression Corner J92-134
Optimization of Bluff Body for Minimum Drag in Ground Proximity J92-133
Flow Past a Wing-Body Junction—Experimental Evaluation of Turbulence Models J92-132
Skin-Friction Gauge for Use in Hypervelocity Impulse Facilities J92-124
Turbulence Model Effects on Separated Flow About a Prolate Spheroid J92-097
Finite Element Navier-Stokes Solver for Unstructured Grids J92-096
Streamwise Vortex Production by Pitched and Skewed Jets in a Turbulent Boundary Layer J92-095
Algebraic Turbulence Modeling for Adaptive Unstructured Grids J92-094
New Nonequilibrium Turbulence Model for Calculating Flows over Airfoils J92-086
Model for Turbulent Backflows J92-079
Application of a New K-τ Model to Near Wall Turbulent Flows J92-077
Experimental Investigation of Turbulent Flow Through a Circular-to-Rectangular Transition Duct J92-052
Critical Evaluation of Two-Equation Models for Near-Wall Turbulence J92-047
Turbulence Measurements for a Longitudinal Vortex Interacting with a Three-Dimensional Turbulent Boundary Layer J92-007
Turbulence Phenomena in a Multiple Normal Shock Wave/Turbulent Boundary-Layer Interaction J92-006
Measurements of Turbulent Boundary Layer Prandtl Numbers and Space-time Temperature Correlations J92-005
Modification of the van Driest Damping Function to Include the Effects of Surface Roughness J91-140

Boundary-Layer Stability and Transition

Example of Second-Mode Instability Dominance at a Mach Number of 5.2 J92-473
Surface Temperature Effects on Boundary-Layer Transition J92-436
Coriolis Effects on Görtler Vortices in the Boundary-Layer Flow on Concave Wall J92-435

Gaster's Tranform J92-434
Linear Stability of Supersonic Cone Boundary Layers J92-375
Crossflow Vortex and Transition Measurements by Use of Multielement Hot Films J92-340
Effect of Pressure Gradient on the Stability of Compressible Boundary Layers J92-339
Görtler Instability and Supersonic Quiet Nozzle Design J92-317
Numerical Method for Predicting Transition in Three-Dimensional Flows by Spatial Amplification Theory J92-301
Simplified Linear Stability Transition Prediction Method for Separated Boundary Layers J92-298
Reynolds Number Dependence of the Freestream Turbulence Effects on Turbulent Boundary Layers J92-284
Effect of a Bulge on the Subharmonic Instability of Subsonic Boundary Layers J92-260
Stability of Plane Nonorthogonal Stagnation Flow J92-245
Measurements in a Leading-Edge Separation Bubble due to a Simulated Airfoil Ice Accretion J92-216
Evaluation of a Finite Volume Method for Compressible Shear Layers J92-182
Use of Finite Volume Schemes for Transition Simulation J92-163
Helical-Perturbation Device for Cylinder-Wing Vortex Generators J92-146
Linear Stability of Three-Dimensional Boundary Layers over Axisymmetric Bodies at Incidence J92-136
Numerical Simulation of Three-Dimensional Supersonic Free Shear Layers J92-131
Transition Control of Instability Waves over an Acoustically Excited Flexible Surface J92-098
Plate Acceleration and Sound Transmission Due to Random Acoustic and Boundary-Layer Excitation J92-090
Boundary-Layer Transition-Detection in a Cryogenic Wind Tunnel Using Infrared Imaging J92-061
Effect of Compliant Walls on Secondary Instabilities in Boundary-Layer Transition J92-048

Computational Fluid Dynamics

New Wall-Reflection Model Applied to the Turbulent Impinging Jet J92-471
Finite-Volume Implementation of High-Order Essentially Nonoscillatory Schemes in Two Dimensions J92-450
Extension of the λ Formulation to Imperfect Gas Flows J92-438
Fully Elliptic Incompressible Flow Calculations on Regular Grid J92-437
Implementation of Vigneron's Streamwise Pressure Gradient Approximation in Parabolized Navier-Stokes Equations J92-433
Method of Simulating Unsteady Turbomachinery Flows with Multiple Perturbations J92-427
Comparison of Algebraic Turbulence Models for Afterbody Flows with Jet Exhaust J92-425
Emergence of Three-Dimensional Separation over a Suddenly Started Prolate Spheroid at Incidence J92-424
RIPPLE: A New Model for Incompressible Flows with Free Surfaces J92-422
Fast, Adaptive Finite Element Scheme for Viscous Incompressible Flows J92-420
Hybrid Grid Approach to Study Dynamic Stall J92-419
Pressure-Based Multigrid Algorithm for Flow at All Speeds J92-418
Implicit Navier-Stokes Solver for Three-Dimensional Compressible Flows J92-417
Navier-Stokes Computation of Wing/Rotor Interaction for a Tilt Rotor in Hover J92-408
Far-Field Computational Boundary Conditions for Two-Dimensional External Flow Problems J92-407
Grid Studies for Thin-Layer Navier-Stokes Computations of Airfoil Flowfields J92-400
Approximate Riemann Solver for Hypervelocity Flows J92-399
Efficient Iterative Methods for the Transonic Small Disturbance Equation J92-398
Interaction Between Chemical Reaction and Turbulence in Supersonic Nonpremixed H_2-Air Combustion J92-396
Statistical Modeling of Turbulent Dilute Combusting Sprays J92-395
Probability Density Function Shape Sensitivity in the Statistical Modeling of Turbulent Particle Dispersion J92-394
Numerical Simulation of Slot Injection into a Turbulent Supersonic Stream J92-379
Numerical Study of Film Cooling in Supersonic Flow J92-378
Time-Averaged, Three-Dimensional Flow in a Rectangular Sudden Expansion J92-377
Methodology for Calculating Aerodynamic Sensitivity Derivatives J92-376
Flowfield of a Lifting Rotor in Hover: A Navier-Stokes Simulation J92-371
Comparison of Transonic Flow Models J92-358
Asymmetric Turbulent Vortical Flows over Slender Bodies J92-347
Application of a Solution Adaptive Grid Scheme to Complex Three-Dimensional Flows J92-342
Characteristic-Based, Rotated Upwind Scheme for the Euler Equations J92-341
Low Upper Implicit Total Variation Diminishing Solution of Viscous Hypersonic Flows J92-335
Viscous Eddies over a Grooved Surface Computed by a Gaussian-Integration Galerkin Boundary-Element Method J92-333
Effect of Velocity Ratio on Bluffbody Flow Dynamics J92-332
Taylor Series Approximation of Geometric Shape Variation for the Euler Equations J92-331
Modified k-ϵ Model for Compressible Free Shear Flows J92-330
Alternating Direction Implicit Methods for the Navier-Stokes Equations J92-329
Outflow Boundary Conditions Using Duhamel's Equation J92-328
Parallel Computing Strategies for Block Multigrid Implicit Solution of the Euler Equations J92-309
Explicit Runge-Kutta Method for Three-Dimensional Internal Incompressible Flows J92-308
Hypersonic Rarefied Flow About a Delta Wing—Direct Simulation and Comparison with Experiment J92-307
Joint Computational/Experimental Aerodynamics Research on a Hypersonic Vehicle, Part 2: Computational Results J92-306
Joint Computational/Experimental Aerodynamics Research on a Hypersonic Vehicle, Part 1: Experimental Results J92-305
Compact Higher Order Characteristic-Based Euler Solver for Unstructured Grids J92-304
Adaptive Remeshing for Viscous Incompressible Flows J92-303
Temporal Adaptive Euler/Navier-Stokes Algorithm Involving Unstructured Dynamic Meshes J92-302
Flow Separation in Vicinity of a Moving Boundary J92-300
Numerical Study of Juncture Flows J92-269
Viscous High-Speed Flow Computations by Adaptive Mesh Embedding Techniques J92-266
Improved Method for Solving the Viscous Shock Layer Equations J92-265
Three-Dimensional Unstructured Multigrid for the Euler Equations J92-263
Relationship Between Instability Waves and Noise of High-Speed Jets J92-262
Study of Turbulence on Supersonic Compression Surfaces Using Reynolds Stress Model J92-261
Eigenfunction Analysis of Turbulent Mixing Phenomena J92-256
Calculation of Potential Flow Around Airfoils Using a Discrete Vortex Method J92-253
Extrapolation Procedures for the Time-Dependent Navier-Stokes Equations J92-243
High-Resolution, Nonoscillatory Schemes for Unsteady Compressible Flows J92-231
Computation of Saddle Point of Attachment J92-230
Navier-Stokes Simulation for Cone-Derived Waverider J92-225
Newton's Method Solver for the Axisymmetric Navier-Stokes Equations J92-223
Renormalization Group Based Algebraic Turbulence Model for Three-Dimensional Turbomachinery Flows J92-222
Hypersonic Shock-Wave/Turbulent-Boundary-Layer Interaction Flows J92-218
Domain-Decomposition Algorithm Applied to Multielement Airfoil Grids J92-215
Two- and Three-Dimensional Grid Generation by an Algebraic Homotopy Procedure J92-209
High Alpha Aerodynamic Control by Tangential Fuselage Blowing J92-196
Turbulent Flow Past a Backward-Facing Step: A Critical Evaluation of Two-Equation Models J92-195
Characteristic-Based Algorithms for Flows in Thermochemical Nonequilibrium J92-194
Numerical Simulation of Droplet Deformation in Convective Flows J92-192
Compressible Turbulent Boundary Layers with Heat Addition by Homogeneous Condensation J92-191
Second-Order, Far-Field Computational Boundary Conditions for Inviscid Duct Flow Problems J92-189
Spatial Adaptation of Unstructured Meshes for Unsteady Aerodynamic Flow Computations J92-186
Construction of Modified Third-Order Upwind Schemes for Stretched Meshes J92-185
Locally Implicit Hybrid Algorithm for Steady and Unsteady Viscous Flows J92-184
Accelerated Convergence to Steady State by Gradual Far-Field Damping J92-183
Evaluation of a Finite Volume Method for Compressible Shear Layers J92-182
Shock Wave Interaction with a Thermal Layer J92-173
Semi-Inverse Marching Characteristics Scheme for Supersonic Flows J92-165

Freestream Capturing for Moving Coordinates in Three Dimensions J92-164
Use of Finite Volume Schemes for Transition Simulation J92-163
Calculation of Real-Gas Effects on Blunt-Body Trim Angles J92-148
Effect of Surface Deformation on Thermocapillary Bubble Migration J92-147
Calculations of the Dilution System in an Annular Gas Turbine Combustor J92-143
Solution-Adaptive Grid Procedure for the Parabolized Navier-Stokes Equations J92-142
Efficient Massively Parallel Euler Solver for Two-Dimensional Unstructured Grids J92-141
Assessment of Total Variation Diminishing Schemes in Compressible Mixing Flow Computations J92-140
Orthogonal Grids Around Difficult Bodies J92-139
Second-Order Upwind and Central Difference Schemes for Recirculating Flow Computation J92-138
Flux-Difference Split Algorithm for Unsteady Thin-Layer Navier Stokes Solutions J92-137
Numerical Simulation of Three-Dimensional Supersonic Free Shear Layers J92-131
Numerical Simulation of Vortex Unsteadiness on a Slender Body at High Incidence J92-123
High Resolution Computation of Unsteady Flows in Pulsed Lasers J92-109
Fast Solver for Systems of Axisymmetric Ring Vortices J92-107
Aerodynamic Design Optimization Using Sensitivity Analysis and Computational Fluid Dynamics J92-105
Effect of Airfoil (Trailing-Edge) Thickness on the Numerical Solution of Panel Methods Based on the Dirichlet Boundary Condition J92-102
Boundary Element Method for the Analysis of the Unsteady Flow Around Extreme Propeller Geometries J92-101
Cartesian Euler Method for Arbitrary Aircraft Configurations J92-100
Boundary-Orthogonal Biharmonic Grids via Preconditioned Gradient Methods J92-099
Turbulence Model Effects on Separated Flow About a Prolate Spheroid J92-097
Finite Element Navier-Stokes Solver for Unstructured Grids J92-096
Algebraic Turbulence Modeling for Adaptive Unstructured Grids J92-094
Discretization Errors Inherent in Finite Difference Solution of Propeller Noise Problems J92-091
Computing Boundary Forces Due to Unsteady, Inviscid, Incompressible Flow J92-089
Numerical Investigation of Vortex Breakdown on a Delta Wing J92-088
New Nonequilibrium Turbulence Model for Calculating Flows over Airfoils J92-086
Model for Turbulent Backflows J92-079
Wake of a Rotating Circular Cylinder J92-078
Application of a New K-τ Model to Near Wall Turbulent Flows J92-077
Preconditioned Upwind Methods to Solve Incompressible Navier-Stokes Equations J92-076
Zonal Flow Analysis Method for Two-Dimensional Airfoils J92-075
Integration-by-Parts Formulas for Boundary-Element Methods J92-069
Finite Element Analysis of Oscillatory Flow with Heat Transfer Inside a Square Cavity J92-057
Modeling Ideally Expanded Supersonic Turbulent Jet Flows with Nonpremixed H_2-Air Combustion J92-055
Flow Past a Sphere: Topological Transitions of the Vorticity Field J92-050
Local Solution Acceleration Method for the Euler and Navier-Stokes Equations J92-049
Sound Generation by a Stenosis in a Pipe J92-045
Enthalpy Damping for High Mach Number Euler Solutions J92-043
Simplification of Beam and Warming's Implicit Scheme for Two-Dimensional Compressible Flows J92-034
Instabilities of Flows over Bodies at Large Incidence J92-013
Nonequilibrium Hypersonic Inviscid Steady Flows J92-012
Newton's Method Solver for High-Speed Viscous Separated Flowfields J92-011
Upwind Scheme for Solving the Euler Equations on Unstructured Tetrahedral Meshes J92-010
Evaluation of a Bounded High-Resolution Scheme for Combustor Flow Computations J92-009
Genuinely Upwind Algorithms for the Multidimensional Euler Equations J92-008
Removal of Spurious Reflections from Computational Fluid Dynamic Solutions with the Complex Cepstrum J92-004
Explicit Navier-Stokes Computation of Cascade Flows Using the k-ϵ Turbulence Model J92-002
Modification of the van Driest Damping Function to Include the Effects of Surface Roughness J91-140
Conservation Errors and Convergence Characteristics of Iterative Space-Marching Algorithms J91-031

Hydrodynamics

Coriolis Effects on Görtler Vortices in the Boundary-Layer Flow on Concave Wall J92-435
Gaster's Tranform J92-434
Nonlinear Heating of a Magnetoplasma: Temperature of the Ionosphere J92-380
Effects of a Leading-Edge Fillet on the Flow Past an Appendage-Body Junction J92-334
Reynolds Number Dependence of the Freestream Turbulence Effects on Turbulent Boundary Layers J92-284
Boundary Element Method for the Analysis of the Unsteady Flow Around Extreme Propeller Geometries J92-101
Wake of a Rotating Circular Cylinder J92-078
High Reynolds Number Flows in Rotating and Nutating Cylinders: Spatial Eigenvalue Approach J92-058
Effect of Compliant Walls on Secondary Instabilities in Boundary-Layer Transition J92-048
Study of Junction and Tip Vortices Using Particle Displacement Velocimetry J92-020
Drop-Tower Experiments for Capillary Surfaces in an Exotic Container J92-018

Hypersonic Flow

Comparison of Chemical Kinetic Rate Mechanisms for High-Temperature Air, Including Electronic Energy J92-476
Downstream Influence Scaling of Turbulent Flow Past Expansion Corners J92-474
Example of Second-Mode Instability Dominance at a Mach Number of 5.2 J92-473
Correlation of Type III Turbulent Shock Interaction Heating Data on a Hemisphere J92-472
Coupled Euler/Boundary-Layer Method for Nonequilibrium, Chemically Reacting Hypersonic Flows J92-451
Analytical Solutions for Hypersonic Flow Past Slender Power-Law Bodies at Small Angle of Attack J92-421
Dilatation-Dissipation Corrections for Advanced Turbulence Models J92-415
Approximate Riemann Solver for Hypervelocity Flows J92-399
Application of a Parallel Direct Simulation Monte Carlo Method to Hypersonic Rarefied Flows J92-381
Qualitative Model for Visualizing Shock Shapes J92-361
Three-Dimensional Wings and Waveriders with Attached Shock Waves J92-355
Application of a Solution Adaptive Grid Scheme to Complex Three-Dimensional Flows J92-342
Low Upper Implicit Total Variation Diminishing Solution of Viscous Hypersonic Flows J92-335
Modified k-ϵ Model for Compressible Free Shear Flows J92-330
Measurement of Shock-Wave/Boundary-Layer Interaction in a Free-Piston Shock Tunnel J92-318
Multiple Shock-Shock Interference on a Cylindrical Leading Edge J92-314
Hypersonic Rarefied Flow About a Delta Wing—Direct Simulation and Comparison with Experiment J92-307
Joint Computational/Experimental Aerodynamics Research on a Hypersonic Vehicle, Part 2: Computational Results J92-306
Joint Computational/Experimental Aerodynamics Research on a Hypersonic Vehicle, Part 1: Experimental Results J92-305
Separated High Enthalpy Dissociated Laminar Hypersonic Flow Behind a Step —Pressure Measurements J92-286
Aerothermodynamics of a 1.6-Meter-Diameter Sphere in Hypersonic Rarefied Flow J92-267
Viscous High-Speed Flow Computations by Adaptive Mesh Embedding Techniques J92-266
Improved Method for Solving the Viscous Shock Layer Equations J92-265
New High Reynolds Number Mach 8 Capability J92-248
Navier-Stokes Simulation for Cone-Derived Waverider J92-225
Hypersonic Shock-Wave/Turbulent-Boundary-Layer Interaction Flows J92-218
Patterns of Vortex Shedding from an Oscillating Circular Cylinder J92-197
Characteristic-Based Algorithms for Flows in Thermochemical Nonequilibrium J92-194
Asymptotic Defect Boundary-Layer Theory Applied to Hypersonic Flows J92-187
Solution-Adaptive Grid Procedure for the Parabolized Navier-Stokes Equations J92-142
Oscillating Two-Dimensional Hypersonic Airfoils at Small Angles of Attack J92-103
Enthalpy Damping for High Mach Number Euler Solutions J92-043
Turbulent Boundary-Layer Characteristics over a Flat-Plate/Wedge Configuration at Mach 6 J92-036

Sonic Eddy—A Model for Compressible Turbulence J92-014
Nonequilibrium Hypersonic Inviscid Steady Flows J92-012
Newton's Method Solver for High-Speed Viscous Separated Flowfields J92-011
Conservation Errors and Convergence Characteristics of Iterative Space-Marching Algorithms J91-031

Inlet, Nozzle, Diffusor, and Channel Flows

Extension of the λ Formulation to Imperfect Gas Flows J92-438
Fast, Adaptive Finite Element Scheme for Viscous Incompressible Flows J92-420
Unsteady Laminar Compressible Swirling Flow with Massive Blowing J92-409
Effect of Streamwise Pressure Gradient on the Supersonic Mixing Layer J92-401
Experimental and Numerical Investigations of Low-Density Nozzle and Plume Flows of Nitrogen J92-382
Physical Model of the Swept Shock Wave/Boundary-Layer Interaction Flowfield J92-345
Taylor Series Approximation of Geometric Shape Variation for the Euler Equations J92-331
Measurement of Shock-Wave/Boundary-Layer Interaction in a Free-Piston Shock Tunnel J92-318
Görtler Instability and Supersonic Quiet Nozzle Design J92-317
Gas-Particle Nonequilibrium Nozzle Flows: Concept of Virtual Speed of Sound and Similar Solutions J92-311
Parallel Computing Strategies for Block Multigrid Implicit Solution of the Euler Equations J92-309
Explicit Runge-Kutta Method for Three-Dimensional Internal Incompressible Flows J92-308
New Method of Swirl Control in a Diffusing S-Duct J92-287
Study of Separated Shear Layer in Moderate Reynolds Number Plane Sudden Expansion Flows J92-270
Standing Acoustic Waves in a Low Mach Number Shear Flow J92-257
Effect of Acoustic Excitation on Stalled Flows over an Airfoil J92-221
Second-Order, Far-Field Computational Boundary Conditions for Inviscid Duct Flow Problems J92-189
Multifractal Analysis of a Lobed Mixer Flowfield Utilizing the Proper Orthogonal Decomposition J92-188
Calculations of the Dilution System in an Annular Gas Turbine Combustor J92-143
Aerodynamic Design Optimization Using Sensitivity Analysis and Computational Fluid Dynamics J92-105
Transient Behavior of Supersonic Flow Through Inlets J92-104
Numerical Investigation of Unsteady Transonic Nozzle Flows J92-083
Experimental Investigation of Turbulent Flow Through a Circular-to-Rectangular Transition Duct J92-052
Experimental Investigation of Normal-Shock/Turbulent-Boundary-Layer Interactions with and without Mass Removal J92-051
Formation of Shocks Within Axisymmetric Nozzles J92-035
Turbulence Phenomena in a Multiple Normal Shock Wave/Turbulent Boundary-Layer Interaction J92-006

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Correlation of Type III Turbulent Shock Interaction Heating Data on a Hemisphere J92-472
Crossflow Aerodynamic Characteristics of a Noncircular Cylinder with and Without Strakes J92-455
Streamwise Evolution of a Square Jet Cross Section J92-453
Experimental Study on the Evolution of a Wall Layer from a Wake J92-452
Development of the Wake of an Airfoil with Riblets J92-448
Quasiconical Flowfield Structure of the Three-Dimensional Single Fin Interaction J92-447
Correlation of Mean Velocity Measurements Downstream of a Swept Backward-Facing Step J92-423
Effect of Streamwise Pressure Gradient on the Supersonic Mixing Layer J92-401
Experimental and Numerical Investigations of Low-Density Nozzle and Plume Flows of Nitrogen J92-382
Numerical Simulation of Slot Injection into a Turbulent Supersonic Stream J92-379
Numerical Study of Film Cooling in Supersonic Flow J92-378
Broadband Shock Associated Noise from Supersonic Jets Measured by a Ground Observer J92-374
Experimental Observations of Instability Modes in a Rectangular Jet J92-373
Mixing Studies of Helium in Air at High Supersonic Speeds J92-343
Effect of Wing Tip Vortices on a Trailing Aircraft J92-336
Effect of Velocity Ratio on Bluffbody Flow Dynamics J92-332
Two-Stream, Supersonic, Wake Flowfield Behind a Thick Base, Part I: General Features J92-310
Breakup of a Liquid Jet in Supersonic Crossflow J92-288
Separated High Enthalpy Dissociated Laminar Hypersonic Flow Behind a Step—Pressure Measurements J92-286
Numerical Study of Juncture Flows J92-269
Experimental Tests of a Laminar Mixing Theory J92-268
Eigenfunction Analysis of Turbulent Mixing Phenomena J92-256
Method for Visualizing Streamlines Around Hypersonic Vehicles by Using Electrical Discharge J92-246
Second-Order Modeling of Boundary-Free Turbulent Shear Flows J92-229
Spatial Instability of a Swirling Jet—Theory and Experiment J92-228
Effects of Gas Density on the Structure of Liquid Jets in Still Gases J92-227
Predictions of Turbulent Mixing in Axisymmetric Compressible Shear Layers J92-226
Modern Developments in Shear Flow Control with Swirl J92-219
Similarity in Supersonic Mixing Layers J92-190
Second-Order, Far-Field Computational Boundary Conditions for Inviscid Duct Flow Problems J92-189
Multifractal Analysis of a Lobed Mixer Flowfield Utilizing the Proper Orthogonal Decomposition J92-188
Cylinder-Induced Shock-Wave Boundary-Layer Interaction J92-166
Helical-Perturbation Device for Cylinder-Wing Vortex Generators J92-146
Corroboration of the New Method of Obtaining Dissipation in Wake Flow J92-145
Two- and Three-Dimensional Effects in the Supersonic Mixing Layer J92-144
Numerical Simulation of Three-Dimensional Supersonic Free Shear Layers J92-131
Spanwise Averaging of Plane Mixing Layer Properties J92-120
Fast Solver for Systems of Axisymmetric Ring Vortices J92-107
Streamwise Vortex Production by Pitched and Skewed Jets in a Turbulent Boundary Layer J92-095
Numerical Investigation of Laminar Separated Trailing-Edge Flows J92-087
Base Pressure in Supersonic Flow: Further Thoughts About a Theory J92-082
Wake of a Rotating Circular Cylinder J92-078
Zonal Flow Analysis Method for Two-Dimensional Airfoils J92-075
Control of Jet Structure by Crown-Shaped Nozzles J92-070
Concentration Imaging Measurements in Turbulent Concentric-Jet Flows J92-054
Impingement Tones of Large Aspect Ratio Supersonic Rectangular Jets J92-044
Unsteady Circulation Control Aerodynamics of a Circular Cylinder with Periodic Jet Blowing J92-042
Sonic Eddy—A Model for Compressible Turbulence J92-014
Instabilities of Flows over Bodies at Large Incidence J92-013

Multiphase Flows

Singular Behavior in Boundary-Layer Flow of a Dusty Gas J92-469
RIPPLE: A New Model for Incompressible Flows with Free Surfaces J92-422
Probability Density Function Shape Sensitivity in the Statistical Modeling of Turbulent Particle Dispersion J92-394
Gas-Particle Nonequilibrium Nozzle Flows: Concept of Virtual Speed of Sound and Similar Solutions J92-311
Exact Solutions for Hydromagnetic Flow of a Particulate Suspension J92-289
Efficiency of a Statistical Transport Model for Turbulent Particle Dispersion J92-210
Compressible Turbulent Boundary Layers with Heat Addition by Homogeneous Condensation J92-191
Pressure Drop in Fully Developed, Turbulent, Liquid-Vapor Annular Flows in Zero Gravity J92-150
Effect of Surface Deformation on Thermocapillary Bubble Migration J92-147
Laser Velocimetry Seed Particles Within Compressible, Vortical Flows J92-053

Plasmadynamics and MHD

Nonlinear Heating of a Magnetoplasma: Temperature of the Ionosphere J92-380
Numerical Simulation of Droplet Deformation in Convective Flows J92-192

Rarefied Flows

Flow of Rarefied Gas past a Liquid Sphere J92-475
Experimental and Numerical Investigations of Low-Density Nozzle and Plume Flows of Nitrogen J92-382
Application of a Parallel Direct Simulation Monte Carlo Method to Hypersonic Rarefied Flows J92-381
Hypersonic Rarefied Flow About a Delta Wing—Direct Simulation and Comparison with Experiment J92-307

Aerothermodynamics of a 1.6-Meter-Diameter Sphere in Hypersonic Rarefied Flow J92-267

Reacting Flows and Combustion

Comparison of Numerical Oblique Detonation Solutions with an Asymptotic Benchmark J92-478
Preferential Thermal and Multicomponent Species Transport Effects in Strained Diffusion Flames J92-477
Comparison of Chemical Kinetic Rate Mechanisms for High-Temperature Air, Including Electronic Energy J92-476
Production of Oxygen on the Moon: Which Processes Are Best and Why J92-454
Coupled Euler/Boundary-Layer Method for Nonequilibrium, Chemically Reacting Hypersonic Flows J92-451
Surface Reaction Model for Catalyzed Composite Solid Propellants J92-439
Dynamical Scaling of a Model Unsteady Separating Flow J92-397
Interaction Between Chemical Reaction and Turbulence in Supersonic Nonpremixed H_2-Air Combustion J92-396
Statistical Modeling of Turbulent Dilute Combusting Sprays J92-395
Numerical Study of Shock-Wave/Boundary-Layer Interactions in Premixed Combustible Gases J92-372
Experiments on the Structure of an Annular Compressible Reacting Shear Layer J92-344
Effect of Velocity Ratio on Bluffbody Flow Dynamics J92-332
Characteristic-Based Algorithms for Flows in Thermochemical Nonequilibrium J92-194
Burning-Rate Enhancement of Organic Diazide Propellants: Dihalide Addition and Pressure Elevation J92-193
Multifractal Analysis of a Lobed Mixer Flowfield Utilizing the Proper Orthogonal Decomposition J92-188
Modeling Supersonic Combustion Using a Fully Implicit Numerical Method J92-149
Calculation of Real-Gas Effects on Blunt-Body Trim Angles J92-148
Approximate Solutions for Oblique Detonations in the Hypersonic Limit J92-106
Modeling Ideally Expanded Supersonic Turbulent Jet Flows with Nonpremixed H_2-Air Combustion J92-055
Concentration Imaging Measurements in Turbulent Concentric-Jet Flows J92-054
Vortex Simulation of a Three-Dimensional Reacting Shear Layer with Infinite-Rate Kinetics J92-015
Nonequilibrium Hypersonic Inviscid Steady Flows J92-012

Separated Flows

New Wall-Reflection Model Applied to the Turbulent Impinging Jet J92-471
Curvature Corrections to Reynolds Stress Model for Computation of Turbulent Recirculating Flows J92-470
Determination of Vortex Burst Location on Delta Wings from Surface Pressure Measurements J92-428
Comparison of Algebraic Turbulence Models for Afterbody Flows with Jet Exhaust J92-425
Emergence of Three-Dimensional Separation over a Suddenly Started Prolate Spheroid at Incidence J92-424
Correlation of Mean Velocity Measurements Downstream of a Swept Backward-Facing Step J92-423
Hybrid Grid Approach to Study Dynamic Stall J92-419
Pressure-Based Multigrid Algorithm for Flow at All Speeds J92-418
Dilatation-Dissipation Corrections for Advanced Turbulence Models J92-415
Vortical Flow Computations on a Flexible Blended Wing-Body Configuration J92-387
Analysis of the Onset of Dynamic Stall J92-384
Asymmetric Turbulent Vortical Flows over Slender Bodies J92-347
Physical Model of the Swept Shock Wave/Boundary-Layer Interaction Flowfield J92-345
Low Upper Implicit Total Variation Diminishing Solution of Viscous Hypersonic Flows J92-335
Performance of Popular Turbulence Models for Attached and Separated Adverse Pressure Gradient Flows J92-313
Computation of Turbulent, Separated, Unswept Compression Ramp Interactions J92-312
Two-Stream, Supersonic, Wake Flowfield Behind a Thick Base, Part I: General Features J92-310
Flow Separation in Vicinity of a Moving Boundary J92-300
Simplified Linear Stability Transition Prediction Method for Separated Boundary Layers J92-298
New Method of Swirl Control in a Diffusing S-Duct J92-287
Streamlines, Vorticity Lines, and Vortices Around Three-Dimensional Bodies J92-272
Study of Separated Shear Layer in Moderate Reynolds Number Plane Sudden Expansion Flows J92-270
Numerical Study of Juncture Flows J92-269
Experimental Tests of a Laminar Mixing Theory J92-268
Viscous High-Speed Flow Computations by Adaptive Mesh Embedding Techniques J92-266
Effect of Tunnel Walls on Vortex Breakdown Location over Delta Wings J92-233
Computation of Saddle Point of Attachment J92-230
Effect of Acoustic Excitation on Stalled Flows over an Airfoil J92-221
Measurements in a Leading-Edge Separation Bubble due to a Simulated Airfoil Ice Accretion J92-216
Turbulent Flow Fast a Backward-Facing Step: A Critical Evaluation of Two-Equation Models J92-195
Unsteady Flow Past an Airfoil Pitching at a Constant Rate J92-174
Reactive Control of an Unsteady Separating Flow J92-167
Cylinder-Induced Shock-Wave Boundary-Layer Interaction J92-166
Experimental Investigations of the Vortex Flow on Delta Wings at High Incidence J92-151
Second-Order Upwind and Central Difference Schemes for Recirculating Flow Computation J92-138
Structure of Supersonic Turbulent Flow Past a Swept Compression Corner J92-134
Flow Past a Wing-Body Junction—Experimental Evaluation of Turbulence Models J92-132
Using Rankine Vortices to Model Flow Around a Body of Revolution J92-122
Cartesian Euler Method for Arbitrary Aircraft Configurations J92-100
Base Pressure in Supersonic Flow: Further Thoughts About a Theory J92-082
Effect of Leading-Edge Geometry on a Turbulent Separation Bubble J92-080
Model for Turbulent Backflows J92-079
Application of a New K-τ Model to Near Wall Turbulent Flows J92-077
Unsteady Pressure Field and Vorticity Production over a Pitching Airfoil J92-056
Flow Past a Sphere: Topological Transitions of the Vorticity Field J92-050
Surface Flow Patterns on an Ogive-Cylinder at Incidence J92-037
Turbulent Boundary-Layer Characteristics over a Flat-Plate/Wedge Configuration at Mach 6 J92-036
Study of Junction and Tip Vortices Using Particle Displacement Velocimetry J92-020
Detection of Flow State in an Unsteady Separating Flow J92-016
Evaluation of a Bounded High-Resolution Scheme for Combustor Flow Computations J92-009

Shock Waves and Detonations

Comparison of Numerical Oblique Detonation Solutions with an Asymptotic Benchmark J92-478
Analytical Solutions for Hypersonic Flow Past Slender Power-Law Bodies at Small Angle of Attack J92-421
Double Piston Shock-Wave Valve J92-403
Numerical Study of Shock-Wave/Boundary-Layer Interactions in Premixed Combustible Gases J92-372
Qualitative Model for Visualizing Shock Shapes J92-361
Multiple Shock-Shock Interference on a Cylindrical Leading Edge J92-314
Interaction Between Crossing Oblique Shocks and a Turbulent Boundary Layer J92-297
High-Resolution, Nonoscillatory Schemes for Unsteady Compressible Flows J92-231
Newton's Method Solver for the Axisymmetric Navier-Stokes Equations J92-223
Shock Wave Interaction with a Thermal Layer J92-173
Structure of Supersonic Turbulent Flow Past a Swept Compression Corner J92-134
Approximate Formula of Weak Oblique Shock Wave Angle J92-121
Approximate Solutions for Oblique Detonations in the Hypersonic Limit J92-106
Planar Laser-Induced Fluorescence Imaging of Shock-Tube Flows with Vibrational Nonequilibrium J92-060
Experimental Investigation of Normal-Shock/Turbulent-Boundary-Layer Interactions with and without Mass Removal J92-051
Interaction of a Planar Shock Wave with a Double-Wedge-Like Structure J92-038
Turbulence Phenomena in a Multiple Normal Shock Wave/Turbulent Boundary-Layer Interaction J92-006

Subsonic Flow

Crossflow Aerodynamic Characteristics of a Noncircular Cylinder with and Without Strakes J92-455
Experimental Study on the Evolution of a Wall Layer from a Wake J92-452
Generalized Vortex Lattice Method for Oscillating Lifting Surfaces in Subsonic Flow J92-426
Reduction of the Side Force on Pointed Forebodies Through Add-On Tip Devices J92-383

Crossflow Vortex and Transition Measurements by Use of Multielement Hot Films J92-340
Performance of Popular Turbulence Models for Attached and Separated Adverse Pressure Gradient Flows J92-313
New Method of Swirl Control in a Diffusing S-Duct J92-287
Study of Separated Shear Layer in Moderate Reynolds Number Plane Sudden Expansion Flows J92-270
Influence of Freestream Values on k-ω Turbulence Model Predictions J92-244
High Alpha Aerodynamic Control by Tangential Fuselage Blowing J92-196
Viscous Drag Reduction Using Streamwise-Aligned Riblets J92-162
Efficient Massively Parallel Euler Solver for Two-Dimensional Unstructured Grids J92-141
Numerical Simulation of Vortex Unsteadiness on a Slender Body at High Incidence J92-123
Using Rankine Vortices to Model Flow Around a Body of Revolution J92-122
Spanwise Averaging of Plane Mixing Layer Properties J92-120
Effect of Airfoil (Trailing-Edge) Thickness on the Numerical Solution of Panel Methods Based on the Dirichlet Boundary Condition J92-102
Transition Control of Instability Waves over an Acoustically Excited Flexible Surface J92-098
Effect of Leading-Edge Geometry on a Turbulent Separation Bubble J92-080
Preconditioned Upwind Methods to Solve Incompressible Navier-Stokes Equations J92-076
Reliability of Uncertain Flexible Laminated Skewed Plates Under Random Compressions J92-065
Instabilities of Flows over Bodies at Large Incidence J92-013

Supersonic Flow

Downstream Influence Scaling of Turbulent Flow Past Expansion Corners J92-474
Quasiconical Flowfield Structure of the Three-Dimensional Single Fin Interaction J92-447
Double Piston Shock-Wave Valve J92-403
Linear Stability of Supersonic Cone Boundary Layers J92-375
Broadband Shock Associated Noise from Supersonic Jets Measured by a Ground Observer J92-374
Assessment of Compressibility Corrections to the k-ϵ Model in High-Speed Shear Layers J92-370
High-Velocity Measurements via Laser Doppler Anemometer Using Single- and Multiaxial-Mode Lasers J92-359
Physical Model of the Swept Shock Wave/Boundary-Layer Interaction Flowfield J92-345
Experiments on the Structure of an Annular Compressible Reacting Shear Layer J92-344
Characteristic-Based, Rotated Upwind Scheme for the Euler Equations J92-341
Effect of Pressure Gradient on the Stability of Compressible Boundary Layers J92-339
Exploratory Study of Wall Pressure Fluctuations in a Mach 5, Sharp Fin-Induced Turbulent Interaction J92-337
Computation of Turbulent, Separated, Unswept Compression Ramp Interactions J92-312
Two-Stream, Supersonic, Wake Flowfield Behind a Thick Base, Part I: General Features J92-310
Interaction Between Crossing Oblique Shocks and a Turbulent Boundary Layer J92-297
Breakup of a Liquid Jet in Supersonic Crossflow J92-288
Improved Method for Solving the Viscous Shock Layer Equations J92-265
Study of Turbulence on Supersonic Compression Surfaces Using Reynolds Stress Model J92-261
Predictions of Turbulent Mixing in Axisymmetric Compressible Shear Layers J92-226
Newton's Method Solver for the Axisymmetric Navier-Stokes Equations J92-223
Two- and Three-Dimensional Grid Generation by an Algebraic Homotopy Procedure J92-209
Similarity in Supersonic Mixing Layers J92-190
Experimental Investigation of Supersonic Flow over Two Cavities in Tandem J92-178
Approximate Formula of Weak Oblique Shock Wave Angle J92-121
Base Pressure in Supersonic Flow: Further Thoughts About a Theory J92-082
Prandtl-Meyer Function for Dense Gases J92-081
Planar Laser-Induced Fluorescence Imaging of Shock-Tube Flows with Vibrational Nonequilibrium J92-060
Modeling Ideally Expanded Supersonic Turbulent Jet Flows with Nonpremixed H_2-Air Combustion J92-055
Enthalpy Damping for High Mach Number Euler Solutions J92-043
Asymmetric Separated Flows at Supersonic Speeds J92-017
Sonic Eddy—A Model for Compressible Turbulence J92-014
Newton's Method Solver for High-Speed Viscous Separated Flowfields J92-011
Conservation Errors and Convergence Characteristics of Iterative Space-Marching Algorithms J91-031

Transonic Flow

Comparison of Algebraic Turbulence Models for Afterbody Flows with Jet Exhaust J92-425
Pressure-Based Multigrid Algorithm for Flow at All Speeds J92-418
Implicit Navier-Stokes Solver for Three-Dimensional Compressible Flows J92-417
Far-Field Computational Boundary Conditions for Two-Dimensional External Flow Problems J92-407
Grid Studies for Thin-Layer Navier-Stokes Computations of Airfoil Flowfields J92-400
Efficient Iterative Methods for the Transonic Small Disturbance Equation J92-398
Comparison of Transonic Flow Models J92-358
Experimental Investigation of the Parallel Vortex-Airfoil Interaction at Transonic Speeds J92-316
Effect of Model Cooling on Periodic Transonic Flow J92-315
Compact Higher Order Characteristic-Based Euler Solver for Unstructured Grids J92-304
Temporal Adaptive Euler/Navier-Stokes Algorithm Involving Unstructured Dynamic Meshes J92-302
Accelerated Convergence to Steady State by Gradual Far-Field Damping J92-183
Flux-Difference Split Algorithm for Unsteady Thin-Layer Navier Stokes Solutions J92-137
Cartesian Euler Method for Arbitrary Aircraft Configurations J92-100
Finite Element Navier-Stokes Solver for Unstructured Grids J92-096
New Nonequilibrium Turbulence Model for Calculating Flows over Airfoils J92-086
Numerical Investigation of Unsteady Transonic Nozzle Flows J92-083
Local Solution Acceleration Method for the Euler and Navier-Stokes Equations J92-049
Streamwise Upwind Algorithm for Computing Unsteady Transonic Flows Past Oscillating Wings J91-263

Unsteady Flows

Finite-Volume Implementation of High-Order Essentially Nonoscillatory Schemes in Two Dimensions J92-450
Method of Simulating Unsteady Turbomachinery Flows with Multiple Perturbations J92-427
Generalized Vortex Lattice Method for Oscillating Lifting Surfaces in Subsonic Flow J92-426
Emergence of Three-Dimensional Separation over a Suddenly Started Prolate Spheroid at Incidence J92-424
Hybrid Grid Approach to Study Dynamic Stall J92-419
Unsteady Turbulent Skin-Friction Measurement in an Adverse Pressure Gradient J92-416
Unsteady Laminar Compressible Swirling Flow with Massive Blowing J92-409
Dynamical Scaling of a Model Unsteady Separating Flow J92-397
Analysis of the Onset of Dynamic Stall J92-384
Reduction of the Side Force on Pointed Forebodies Through Add-On Tip Devices J92-383
Fourier Functional Analysis for Unsteady Aerodynamic Modeling J92-346
Exploratory Study of Wall Pressure Fluctuations in a Mach 5, Sharp Fin-Induced Turbulent Interaction J92-337
Experimental Investigation of the Parallel Vortex-Airfoil Interaction at Transonic Speeds J92-316
Computation of Turbulent, Separated, Unswept Compression Ramp Interactions J92-312
Temporal Adaptive Euler/Navier-Stokes Algorithm Involving Unstructured Dynamic Meshes J92-302
Standing Acoustic Waves in a Low Mach Number Shear Flow J92-257
Nonuniform Motion of Leading-Edge Vortex Breakdown on Ramp Pitching Delta Wings J92-254
High-Resolution, Nonoscillatory Schemes for Unsteady Compressible Flows J92-231
Computation of Saddle Point of Attachment J92-230
Spatial Adaptation of Unstructured Meshes for Unsteady Aerodynamic Flow Computations J92-186
Evaluation of a Finite Volume Method for Compressible Shear Layers J92-182
Experimental Investigation of Supersonic Flow over Two Cavities in Tandem J92-178

Unsteady Flow Past an Airfoil Pitching at a Constant Rate J92-174
Shock Wave Interaction with a Thermal Layer J92-173
Reactive Control of an Unsteady Separating Flow J92-167
Freestream Capturing for Moving Coordinates in Three Dimensions J92-164
High Aerodynamic Loads on an Airfoil Submerged in an Unsteady Stream J92-161
Semiconductor Laser Doppler Anemometer for Applications in Aerodynamic Research J92-152
Assessment of Total Variation Diminishing Schemes in Compressible Mixing Flow Computations J92-140
Flux-Difference Split Algorithm for Unsteady Thin-Layer Navier Stokes Solutions J92-137
Numerical Simulation of Vortex Unsteadiness on a Slender Body at High Incidence J92-123
Transient Behavior of Supersonic Flow Through Inlets J92-104
Oscillating Two-Dimensional Hypersonic Airfoils at Small Angles of Attack J92-103
Computing Boundary Forces Due to Unsteady, Inviscid, Incompressible Flow J92-089
Numerical Investigation of Unsteady Transonic Nozzle Flows J92-083
Unsteady Pressure Field and Vorticity Production over a Pitching Airfoil J92-056
Flow Past a Sphere: Topological Transitions of the Vorticity Field J92-050
Unsteady Circulation Control Aerodynamics of a Circular Cylinder with Periodic Jet Blowing J92-042
Simplification of Beam and Warming's Implicit Scheme for Two-Dimensional Compressible Flows J92-034
Detection of Flow State in an Unsteady Separating Flow J92-016
Removal of Spurious Reflections from Computational Fluid Dynamic Solutions with the Complex Cepstrum J92-004
Streamwise Upwind Algorithm for Computing Unsteady Transonic Flows Past Oscillating Wings J91-263
Unsteady Separation over Maneuvering Bodies J90-340

Viscous Non-Boundary-Layer Flows

Development of the Wake of an Airfoil with Riblets J92-448
Fast, Adaptive Finite Element Scheme for Viscous Incompressible Flows J92-420
Assessment of Compressibility Corrections to the k-ϵ Model in High-Speed Shear Layers J92-370
Mixing Studies of Helium in Air at High Supersonic Speeds J92-343
Nature of Buoyancy-Driven Flows in a Reduced-Gravity Environment J92-271
Pressure Drop in Fully Developed, Turbulent, Liquid-Vapor Annular Flows in Zero Gravity J92-150
Using Rankine Vortices to Model Flow Around a Body of Revolution J92-122
Finite Element Analysis of Oscillatory Flow with Heat Transfer Inside a Square Cavity J92-057

Vortices

Surface Flow Patterns on an Ogive-Cylinder at Incidence J92-037
Coriolis Effects on Görtler Vortices in the Boundary-Layer Flow on Concave Wall J92-435
Determination of Vortex Burst Location on Delta Wings from Surface Pressure Measurements J92-428
Comparison of Transonic Flow Models J92-358
Asymmetric Turbulent Vortical Flows over Slender Bodies J92-347
Stretching of Freestream Turbulence in the Stagnation Region J92-338
Effect of Wing Tip Vortices on a Trailing Aircraft J92-336
Viscous Eddies over a Grooved Surface Computed by a Gaussian-Integration Galerkin Boundary-Element Method J92-333
Experimental Investigation of the Parallel Vortex-Airfoil Interaction at Transonic Speeds J92-316
Streamlines, Vorticity Lines, and Vortices Around Three-Dimensional Bodies J92-272
Nonuniform Motion of Leading-Edge Vortex Breakdown on Ramp Pitching Delta Wings J92-254
Calculation of Potential Flow Around Airfoils Using a Discrete Vortex Method J92-253
Symmetry Breaking in Vortex Flows on Conical Bodies J92-232
Acoustic Sources in a Tripped Flow past a Resonator Tube J92-220
Patterns of Vortex Shedding from an Oscillating Circular Cylinder J92-197
Interaction of a Longitudinal Vortex with a Three-Dimensional, Turbulent Boundary Layer J92-177
High Aerodynamic Loads on an Airfoil Submerged in an Unsteady Stream J92-161
Experimental Investigations of the Vortex Flow on Delta Wings at High Incidence J92-151
Assessment of Total Variation Diminishing Schemes in Compressible Mixing Flow Computations J92-140
Flow Past a Wing-Body Junction—Experimental Evaluation of Turbulence Models J92-132
Spanwise Averaging of Plane Mixing Layer Properties J92-120
Experimental Investigation of the Perpendicular Rotor Blade-Vortex Interaction at Transonic Speeds J92-108
Fast Solver for Systems of Axisymmetric Ring Vortices J92-107
Streamwise Vortex Production by Pitched and Skewed Jets in a Turbulent Boundary Layer J92-095
Numerical Investigation of Vortex Breakdown on a Delta Wing J92-088
Control of Jet Structure by Crown-Shaped Nozzles J92-070
Laser Velocimetry Seed Particles Within Compressible, Vortical Flows J92-053
Experimental Investigation of Turbulent Flow Through a Circular-to-Rectangular Transition Duct J92-052
Surface Flow Patterns on an Ogive-Cylinder at Incidence J92-037
Asymmetric Separated Flows at Supersonic Speeds J92-017
Turbulence Measurements for a Longitudinal Vortex Interacting with a Three-Dimensional Turbulent Boundary Layer J92-007

Wave Motion and Sloshing

RIPPLE: A New Model for Incompressible Flows with Free Surfaces J92-422
Acoustic Sources in a Tripped Flow past a Resonator Tube J92-220
High Reynolds Number Flows in Rotating and Nutating Cylinders: Spatial Eigenvalue Approach J92-058
Drop-Tower Experiments for Capillary Surfaces in an Exotic Container J92-018

Guidance, Control, and Dynamics Technology

Computer Science

Programming Probabilistic Structural Analysis for Parallel Processing Computers J92-456
Efficient Massively Parallel Euler Solver for Two-Dimensional Unstructured Grids J92-141

Control System Design

Substructure Decomposition Method for the Control Design of Large Flexible Structures J92-405
Improved Approximations for Control Augmented Structural Synthesis J92-023

Control System Effectors

Active Control of Interior Noise in Model Aircraft Fuselages Using Piezoceramic Actuators J92-411
Nonlinear Instability of Corrugated Diaphragms J92-354

Dynamics

Accelerated Subspace Iteration for Eigenvector Derivatives J92-321
Study of the Coupled Free Vibration of Helical Springs J92-213

Optimization Techniques

Methodology for Calculating Aerodynamic Sensitivity Derivatives J92-376
Control-Structure Integrated Design J92-323

Spacecraft Dynamics

Mobilities of Periodic Structures in Terms of Asymptotic Modal Properties J92-390

Structural Control

Eigenvalue Error Analysis of Viscously Damped Structures Using a Ritz Reduction Method J92-465
Active, Passive, and Semiactive Vibration Suppression by Stiffness Variation J92-463
Control-Structure Integrated Design J92-323
Control Design Variable Linking for Optimization of Structural/Control Systems J92-281
Dynamic Condensation Method for Structural Eigenvalue Analysis J92-154

System Identification

Higher Order Eigenpair Perturbations J92-279
Eigenstructure Assignment Approach for Structural Damage Detection J92-276
Improvement of Normalization Methods for Eigenvector Derivatives J92-237
Nonlinear Damping Estimation from Rotor Stability Data Using Time and Frequency Domain Techniques J92-203
Issues in Modal Identification of Flexible Structures J92-028

Interdisciplinary Topics

Analytical and Numerical Methods

Beam Deflection J92-483
Eigenvalue Error Analysis of Viscously Damped Structures Using a Ritz Reduction Method J92-465
Inverse Eigenvalue Problem in Structural Design J92-459
Programming Probabilistic Structural Analysis for Parallel Processing Computers J92-456
Two-Step Method for Evolving Nonlinear Acoustic Systems to a Steady State J92-259
Structural Shape Sensitivity Analysis: Relationship Between Material Derivative and Control Volume Approaches J92-241
Inclusion Principle for the Rayleigh-Ritz Based Substructure Synthesis J92-199
Accelerated Convergence to Steady State by Gradual Far-Field Damping J92-183
Three-Dimensional Axisymmetric Vibrations of Orthotropic and Cross-Ply Laminated Hollow Cylinders J92-158
Variational Principle for Shape Design Sensitivity Analysis J92-074
Integration-by-Parts Formulas for Boundary-Element Methods J92-069
Nonlinear Membership Functions in Multiobjective Fuzzy Optimization of Mechanical and Structural Systems J92-032

CAD/CAM

Fuzzy Goal Programming Approach for Structural Optimization J92-208

Lasers and Laser Applications

Optical Microphone for the Detection of Hidden Helicopters J92-413
Study of Compressible Mixing Layers Using Filtered Rayleigh Scattering Based Visualizations J92-402
Laser Propulsion Using Free Electron Lasers J92-385
High-Velocity Measurements via Laser Doppler Anemometer Using Single- and Multiaxial-Mode Lasers J92-359
Simple Method for Determining the Laser-Velocimeter Focal Point with the Aid of a Hot-Wire Anemometer J92-247
Semiconductor Laser Doppler Anemometer for Applications in Aerodynamic Research J92-152
Scanning Laser Doppler Technique for Modal Testing of Distributed-Parameter Systems J92-110
High Resolution Computation of Unsteady Flows in Pulsed Lasers J92-109
Planar Laser-Induced Fluorescence Imaging of Shock-Tube Flows with Vibrational Nonequilibrium J92-060
Heat Removal in a Gas Cooled Solid-State Laser Disk Amplifier J92-059
Laser Velocimetry Seed Particles Within Compressible, Vortical Flows J92-053
Hydrogen Fluoride Chemical Laser Amplifier Performance: Experiment J92-019

Reliability, Maintainability, and Logistics Support

Optimum Fiber Angle of Unidirectional Composites for Load with Variations J92-025

Research Facilities and Instrumentation

Double Piston Shock-Wave Valve J92-403
Qualitative Model for Visualizing Shock Shapes J92-361
Induced Drag of a Wing in a Circular Wind Tunnel J92-360
Measurement of Shock-Wave/Boundary-Layer Interaction in a Free-Piston Shock Tunnel J92-318
Görtler Instability and Supersonic Quiet Nozzle Design J92-317
New High Reynolds Number Mach 8 Capability J92-248
Effect of Tunnel Walls on Vortex Breakdown Location over Delta Wings J92-233
Force Measurement on Rotating, Ablating Models Using an Air Bearing Balance J92-153
Skin-Friction Gauge for Use in Hypervelocity Impulse Facilities J92-124
Boundary-Layer Transition-Detection in a Cryogenic Wind Tunnel Using Infrared Imaging J92-061
Importance of Fresh Air in Manometer Tubing J92-040
Simple Method of Supersonic Flow Visualization Using Smoke J92-039
Study of Junction and Tip Vortices Using Particle Displacement Velocimetry J92-020

Sensor Systems

Importance of Coatings to Optical Fiber Sensors Embedded in "Smart" Structures J92-198
Scanning Laser Doppler Technique for Modal Testing of Distributed-Parameter Systems J92-110

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

New High Reynolds Number Mach 8 Capability J92-248

Testing, Flight and Ground

Force Measurement on Rotating, Ablating Models Using an Air Bearing Balance J92-153

Vibration

Study of the Coupled Free Vibration of Helical Springs J92-213

Propulsion

Airbreathing Propulsion

Surface Reaction Model for Catalyzed Composite Solid Propellants J92-439
Extension of the λ Formulation to Imperfect Gas Flows J92-438
Aeroelastic Modal Characteristics of Mistuned Blade Assemblies: Mode Localization and Loss of Eigenstructure J92-386
Mixing Studies of Helium in Air at High Supersonic Speeds J92-343
Renormalization Group Based Algebraic Turbulence Model for Three-Dimensional Turbomachinery Flows J92-222

Combustion and Combustor Designs

Preferential Thermal and Multicomponent Species Transport Effects in Strained Diffusion Flames J92-477
Calculations of the Dilution System in an Annular Gas Turbine Combustor J92-143

Droplet Characterization

Statistical Modeling of Turbulent Dilute Combusting Sprays J92-395
Probability Density Function Shape Sensitivity in the Statistical Modeling of Turbulent Particle Dispersion J92-394
Burning-Rate Enhancement of Organic Diazide Propellants: Dihalide Addition and Pressure Elevation J92-193
Numerical Simulation of Droplet Deformation in Convective Flows J92-192

Engine Performance

Transient Behavior of Supersonic Flow Through Inlets J92-104

Fuels and Propellants, Properties of

Surface Reaction Model for Catalyzed Composite Solid Propellants J92-439
Burning-Rate Enhancement of Organic Diazide Propellants: Dihalide Addition and Pressure Elevation J92-193

Injector Design and Characterization

Effects of Gas Density on the Structure of Liquid Jets in Still Gases J92-227

Ramjets and Scramjets

Effect of Streamwise Pressure Gradient on the Supersonic Mixing Layer J92-401
Modified k-ϵ Model for Compressible Free Shear Flows J92-330
Aerodynamic Design Optimization Using Sensitivity Analysis and Computational Fluid Dynamics J92-105

Solid Rocket Motors and Missile Systems

Gas-Particle Nonequilibrium Nozzle Flows: Concept of Virtual Speed of Sound and Similar Solutions J92-311
Equilibrated Moisture Content of Several Carbon Phenolic Composites J92-235

Supersonic Combustion

Comparison of Numerical Oblique Detonation Solutions with an Asymptotic Benchmark J92-478
Interaction Between Chemical Reaction and Turbulence in Supersonic Nonpremixed H_2-Air Combustion J92-396
Numerical Study of Shock-Wave/Boundary-Layer Interactions in Premixed Combustible Gases J92-372
Experiments on the Structure of an Annular Compressible Reacting Shear Layer J92-344
Modeling Supersonic Combustion Using a Fully Implicit Numerical Method J92-149

Space Technology

Space Experiments

Drop-Tower Experiments for Capillary Surfaces in an Exotic Container J92-018

Space Processing

Production of Oxygen on the Moon: Which Processes Are Best and Why J92-454

Spacecraft Structural Configuration, Design, and Analysis

Fully Nonlinear Model of Cables J92-482
Eigenvalue and Eigenvector Approximate Analysis for Repeated Eigenvalue Problems J92-353

Damage Detection in Elastic Structures Using Vibratory Residual Forces and Weighted Sensitivity J92-352
Composite Laminated Shells Under Internal Pressure J92-250
Generation and Comparison of Globally Isotropic Space-Filling Truss Structures J92-207
Analytical Evaluation of Lattice Space Structures for Accuracy J92-041

Spacecraft Test and Evaluation

Damage Detection in Elastic Structures Using Vibratory Residual Forces and Weighted Sensitivity J92-352

Spacecraft Thermal Management

Pressure Drop in Fully Developed, Turbulent, Liquid-Vapor Annular Flows in Zero Gravity J92-150

Structural Mechanics and Materials

Aeroelasticity and Control

Supersonic Flutter of Composite Sandwich Panels J92-479
Application of Adaptive Technology to Static Aeroelastic Control of Wing Structures J92-458
Flutter Suppression of Thin Airfoils Using Active Acoustic Excitations J92-457
Flutter of Composite Laminated Beam Plates with Delamination J92-388
Vortical Flow Computations on a Flexible Blended Wing-Body Configuration J92-387
Helicopter Rotor Blade Aeroelasticity in Forward Flight with an Implicit Structural Formulation J92-348
Vibration Mode Shape Control by Prestressing J92-290
Importance of Coatings to Optical Fiber Sensors Embedded in "Smart" Structures J92-198
Stability of Elastic Systems Under Follower Forces J92-111
Reliability of Uncertain Flexible Laminated Skewed Plates Under Random Compressions J92-065
Time Domain Flutter Analysis of Cascades Using a Full-Potential Solver J92-022
Nonlinear Stall Flutter and Divergence Analysis of Cantilevered Graphite/Epoxy Wings J92-021

Dynamic Model Analysis

Exact Vibration Solutions for Nonuniform Timoshenko Beams with Attachments J92-464
Inverse Eigenvalue Problem in Structural Design J92-459
Derivation of Green's Functions of Complex Structures Using Computer Algebra J92-393
Vibration Mode Shape Control by Prestressing J92-290
Frequency Modification Using Newton's Method and Inverse Iteration Eigenvector Updating J92-281
Eigenstructure Assignment Approach for Structural Damage Detection J92-276
Matrix Transformation Method for Updating Dynamic Model J92-212
Prediction and Measurement of Modal Damping Factors for Viscoelastic Space Structures J92-204
Inclusion Principle for the Rayleigh-Ritz Based Substructure Synthesis J92-199
Study of Intensification Zones in a Rectangular Acoustic Cavity J92-180
Asymptotic Modal Analysis of a Rectangular Acoustic Cavity Excited by Wall Vibration J92-179
Three-Dimensional Axisymmetric Vibrations of Orthotropic and Cross-Ply Laminated Hollow Cylinders J92-158
Random Response of Symmetric Cross-Ply Composite Beams with Arbitrary Boundary Conditions J92-157
Dynamic Condensation Method for Structural Eigenvalue Analysis J92-154
Modal Sensitivities for Repeated Eigenvalues and Eigenvalue Derivatives J92-126
Effect of Structural Damping on Flutter of Plates with a Follower Force J92-118
Analytical Method for Vibration of Angle-Ply Cylindrical Shells Having Arbitrary Edges J92-114
Nonlinear Dynamic Response of Frame-Type Structures with Hysteretic Damping at the Joints J92-030
Improvement of Structural Models Using Covariance Analysis and Nonlinear Generalized Least Squares J92-029
Issues in Modal Identification of Flexible Structures J92-028
Compatibility of Measured and Predicted Vibration Modes in Model Improvement Studies J91-122

Flexible and Active Structures

Fully Nonlinear Model of Cables J92-482
Active, Passive, and Semiactive Vibration Suppression by Stiffness Variation J92-463
Application of Adaptive Technology to Static Aeroelastic Control of Wing Structures J92-458
Effect of Modal Interaction on Sound Radiation from Vibrating Structures J92-449
Substructure Decomposition Method for the Control Design of Large Flexible Structures J92-405
Derivation of Green's Functions of Complex Structures Using Computer Algebra J92-393
Nonlinear Instability of Corrugated Diaphragms J92-354
Control Design Variable Linking for Optimization of Structural/Control Systems J92-281
Importance of Coatings to Optical Fiber Sensors Embedded in "Smart" Structures J92-198
Influence of Geometric Nonlinearities on Skin-Stiffener Interface Stresses J92-154
Finite Element Analysis of Composite Structures Containing Distributed Piezoceramic Sensors and Actuators J92-112
Identification of Flexible Joints in Vehicle Structures J92-067
Experiments on Active Control of Vibrational Power Flow Using Piezoceramic Actuators/Sensors J92-064
Effect of Dropped Plies on the Strength of Graphite-Epoxy Laminates J92-063
Effect of Compliant Walls on Secondary Instabilities in Boundary-Layer Transition J92-048
Improved Approximations for Control Augmented Structural Synthesis J92-023

Materials Structural Properties

Effects of Interply Damping Layers on the Dynamic Characteristics of Composite Plates J92-461
Buckling Testing of Composite Columns J92-443
Stiffness Design Method of Symmetric Laminates Using Lamination Parameters J92-440
Scaling Effects in the Flexural Response and Failure of Composite Beams J92-319
Prediction and Measurement of Modal Damping Factors for Viscoelastic Space Structures J92-204
Large Deflections of Sandwich Plates with Orthotropic Cores—A New Approach J92-129

Structural Composite Materials

Nonlinear Free Vibration Characteristics of Laminated Anisotropic Thin Plates J92-481
Supersonic Flutter of Composite Sandwich Panels J92-479
Buckling of Symmetrically Laminated Plates with Compression, Shear, and In-Plane Bending J92-468
Simplified Theory for Composite Thin-Walled Beams J92-466
Structural Behavior of Two-Cell Composite Rotor Blades with Elastic Couplings J92-462
Effects of Interply Damping Layers on the Dynamic Characteristics of Composite Plates J92-461
Postbuckling Response of Stiffened Composite Cylindrical Shells J92-460
Application of Adaptive Technology to Static Aeroelastic Control of Wing Structures J92-458
Buckling Testing of Composite Columns J92-443
Fourier Analysis of Clamped Moderately Thick Arbitrarily Laminated Plates J92-442
Vibration of Compressively Loaded Shear Deformable Flat Panels Exhibiting Initial Geometric Imperfections J92-441
Stiffness Design Method of Symmetric Laminates Using Lamination Parameters J92-440
Scale Effects in Buckling, Postbuckling, and Crippling of Graphite-Epoxy Z-section Stiffeners J92-430
Prediction of Interlaminar Stresses in Laminated Plates Using Global Orthogonal Interpolation Polynomials J92-429
Role of Matrix in Viscoplastic Behavior of Thermoplastic Composites at Elevated Temperature J92-404
Flutter of Composite Laminated Beam Plates with Delamination J92-388
Vibration and Buckling of Laminated Plates with a Cutout in Hygrothermal Environment J92-364
Accuracy of Critical-Temperature Sensitivity Coefficients Predicted by Multilayered Composite Plate Theories J92-349
Layer-Wise Shell Theory for Postbuckling of Laminated Circular Cylindrical Shells J92-326
Stacking Sequence Optimization of Simply Supported Laminates with Stability and Strain Constraints J92-324
Thin Film Modeling of Delamination Buckling in Pressure Loaded Laminated Cylindrical Shells J92-322
Postbuckling Response and Failure Prediction of Graphite-Epoxy Plates Loaded in Compression J92-320
Scaling Effects in the Flexural Response and Failure of Composite Beams J92-319
Approximate Vibrational Analysis of Noncircular Cylinders Having Varying Thickness J92-292

Partial Hybrid Strip Model for Higher-Order Laminated Plate Theory J92-291
Analysis of Damping in Composite Laminates J92-285
Buckling and Postbuckling of Delaminated Composite Sandwich Beams J92-283
Efficient Stress Solutions at Skin Stiffener Interfaces of Composites Stiffened Panels J92-274
Impact Response of Graphite/Epoxy Cylindrical Panels J92-273
Bending of Tapered Anisotropic Sandwich Plates with Arbitrary Edge Conditions J92-264
Composite Laminated Shells Under Internal Pressure J92-250
Optimum Design of a Composite Structure with Three Types of Manufacturing Constraints J92-249
Finite Element/Penalty Function Method for Computing Stresses near Debonds J92-239
Axially Symmetric Pulse Propagation in Semi-Infinite Hollow Cylinders J92-238
Interlaminar Fracture Characteristics of Bonding Concepts for Thermoplastic Primary Structures J92-236
Equilibrated Moisture Content of Several Carbon Phenolic Composites J92-235
Impact Response of Orthotropic Composite Plates Predicted from a One-Parameter Differential Equation J92-234
Strength of Laminated Composites with Internal Discontinuities Parallel to the Applied Load J92-224
Collapse Characteristics of Cylindrical Composite Panels Under Axial Loads J92-214
Cylindrical Bending of Unsymmetric Composite Laminates J92-211
Free Vibrations of Delaminated Beams J92-201
Postbuckling of Shear Deformable Composite Flat Panels Taking Into Account Geometrical Imperfections J92-200
Effect of Transverse Shear Deformation on Imperfection Sensitivity of Cylindrical Panels J92-169
Random Response of Symmetric Cross-Ply Composite Beams with Arbitrary Boundary Conditions J92-157
Strength Scaling in Fiber Composites J92-156
Interlayer Shear Slip Theory for Cross-Ply Laminates with Nonrigid Interfaces J92-155
Large Deflections of Sandwich Plates with Orthotropic Cores—A New Approach J92-129
Shear Deformable Theories for Cylindrical Laminates—Equilibrium and Buckling with Applications J92-119
Stacking-Sequence Optimization for Buckling of Laminated Plates by Integer Programming J92-117
Multiobjective Shape and Material Optimization of Composite Structures Including Damping J92-116
Analytical Method for Vibration of Angle-Ply Cylindrical Shells Having Arbitrary Edges J92-114
Finite Element Analysis of Composite Structures Containing Distributed Piezoceramic Sensors and Actuators J92-112
Elastic-Plastic Finite Element Analysis of Thermoplastic Composite Plates and Shells J92-071
Reliability of Uncertain Flexible Laminated Skewed Plates Under Random Compressions J92-065
Effect of Dropped Plies on the Strength of Graphite-Epoxy Laminates J92-063
Dynamic Analysis of Delamination Growth J92-062
Effect of Composite Fabrication Method on Structural Response and Impact Damage J92-027
Method for Calculating the Interlaminar Stresses in Symmetric Laminates Containing a Circular Hole J92-026
Optimum Fiber Angle of Unidirectional Composites for Load with Variations J92-025
Nonlinear Vibrations of Rectangular Laminated Thin Plates J92-024
Nonlinear Stall Flutter and Divergence Analysis of Cantilevered Graphite/Epoxy Wings J92-021

Structural Design

Structural Behavior of Two-Cell Composite Rotor Blades with Elastic Couplings J92-462
Programming Probabilistic Structural Analysis for Parallel Processing Computers J92-456
Stiffness Design Method of Symmetric Laminates Using Lamination Parameters J92-440
Scale Effects in Buckling, Postbuckling, and Crippling of Graphite-Epoxy Z-section Stiffeners J92-430
Generalized Compound Scaling Algorithm and Application to Minimum Weight Design of Plate Structures J92-392
Displacement Approximations for Optimization of Beams Defined in Nonprincipal Coordinate Systems J92-367
Optimal Shape Design of Lattice Structures for Accuracy J92-366
Torsional Stiffness for Circular Orthotropic Beams J92-365
Stacking Sequence Optimization of Simply Supported Laminates with Stability and Strain Constraints J92-324
Accelerated Subspace Iteration for Eigenvector Derivatives J92-321
Three-Dimensional Shape Optimization Using Fully Automatic Mesh Generation J92-293
Reduced Basis Technique for Calculating Sensitivity Coefficients of Nonlinear Structural Response J92-275
Bending of Tapered Anisotropic Sandwich Plates with Arbitrary Edge Conditions J92-264
Structural Shape Sensitivity Analysis: Relationship Between Material Derivative and Control Volume Approaches J92-241
Interlaminar Fracture Characteristics of Bonding Concepts for Thermoplastic Primary Structures J92-236
Fuzzy Goal Programming Approach for Structural Optimization J92-208
Constructive Solid Geometry Approach to Three-Dimensional Structural Shape Optimization J92-206
Identification of Time-Varying Structural Dynamic Systems: An Artificial Intelligence Approach J92-202
Continuum Design Sensitivity of Transient Responses Using Ritz and Mode Acceleration Methods J92-159
Large Deflections of Sandwich Plates with Orthotropic Cores—A New Approach J92-129
Multiobjective Shape and Material Optimization of Composite Structures Including Damping J92-116
Variational Principle for Shape Design Sensitivity Analysis J92-074
Numerical Study of Vibration Localization in Disordered Cyclic Structures J92-066
Analytical Evaluation of Lattice Space Structures for Accuracy J92-041
Effect of Composite Fabrication Method on Structural Response and Impact Damage J92-027

Structural Durability (including Fatigue and Fracture, and Environmental Degradation)

Analysis of Fastened Structural Connections J92-431
Analysis of Forced Bilinear Oscillators and the Application to Cracked Beam Dynamics J92-389
Thin Film Modeling of Delamination Buckling in Pressure Loaded Laminated Cylindrical Shells J92-322
Eigenstructure Assignment Approach for Structural Damage Detection J92-276
Efficient Stress Solutions at Skin Stiffener Interfaces of Composites Stiffened Panels J92-274
Interlaminar Fracture Characteristics of Bonding Concepts for Thermoplastic Primary Structures J92-236
Strength of Laminated Composites with Internal Discontinuities Parallel to the Applied Load J92-224
Free Vibrations of Delaminated Beams J92-201
Viscoplastic Analysis of an Experimental Cylindrical Thrust Chamber Liner J92-113

Structural Dynamics and Characterization

Fully Nonlinear Model of Cables J92-482
Nonlinear Free Vibration Characteristics of Laminated Anisotropic Thin Plates J92-481
Criterion for Decoupling Dynamic Equations of Motion of Linear Gyroscopic Systems J92-480
Supersonic Flutter of Composite Sandwich Panels J92-479
Improved Fixed Interface Method for Modal Synthesis J92-467
Eigenvalue Error Analysis of Viscously Damped Structures Using a Ritz Reduction Method J92-465
Exact Vibration Solutions for Nonuniform Timoshenko Beams with Attachments J92-464
Active, Passive, and Semiactive Vibration Suppression by Stiffness Variation J92-463
Effects of Interply Damping Layers on the Dynamic Characteristics of Composite Plates J92-461
Inverse Eigenvalue Problem in Structural Design J92-459
Vibration of Compressively Loaded Shear Deformable Flat Panels Exhibiting Initial Geometric Imperfections J92-441
Dynamics of Skin-Stringer Panels Using Modified Wave Methods J92-432
Modal Analysis of Structures with Holonomic Constraints J92-391
Mobilities of Periodic Structures in Terms of Asymptotic Modal Properties J92-390
Analysis of Forced Bilinear Oscillators and the Application to Cracked Beam Dynamics J92-389
Flutter of Composite Laminated Beam Plates with Delamination J92-388

Vibration and Buckling of Laminated Plates with a Cutout in Hygrothermal Environment J92-364
Free Vibration Analysis of Rectangular Plates with Free Edges and Line Support Along Diagonals J92-363
Decoupling Approximation of Nonclassically Damped Structures J92-362
Eigenvalue and Eigenvector Approximate Analysis for Repeated Eigenvalue Problems J92-353
Damage Detection in Elastic Structures Using Vibratory Residual Forces and Weighted Sensitivity J92-352
Selection of Noisy Measurement Locations for Error Reduction in Static Parameter Identification J92-351
Vibration of Spinning Ring-Stiffened Thin Cylindrical Shells J92-350
Eigenvalue Sensitivity Analysis of Planar Frames with Variable Joint and Support Locations J92-325
Approximate Vibrational Analysis of Noncircular Cylinders Having Varying Thickness J92-292
Frequency Modification Using Newton's Method and Inverse Iteration Eigenvector Updating J92-281
Higher Order Eigenpair Perturbations J92-279
Characterization of Damping of Materials and Structures from Nanostrain Levels to One Thousand Microstrain J92-277
Axially Symmetric Pulse Propagation in Semi-Infinite Hollow Cylinders J92-238
Improvement of Normalization Methods for Eigenvector Derivatives J92-237
Impact Response of Orthotropic Composite Plates Predicted from a One-Parameter Differential Equation J92-234
Study of the Coupled Free Vibration of Helical Springs J92-213
Matrix Transformation Method for Updating Dynamic Model J92-212
Statistical Distribution of Frequency Response in Disordered Periodic Structures J92-205
Prediction and Measurement of Modal Damping Factors for Viscoelastic Space Structures J92-204
Nonlinear Damping Estimation from Rotor Stability Data Using Time and Frequency Domain Techniques J92-203
Free Vibrations of Delaminated Beams J92-201
Inclusion Principle for the Rayleigh-Ritz Based Substructure Synthesis J92-199
Frequency Analysis of Axially Loaded Structures J92-168
Continuum Design Sensitivity of Transient Responses Using Ritz and Mode Acceleration Methods J92-159
Three-Dimensional Axisymmetric Vibrations of Orthotropic and Cross-Ply Laminated Hollow Cylinders J92-158
Random Response of Symmetric Cross-Ply Composite Beams with Arbitrary Boundary Conditions J92-157
Effects of Attached Masses on Free Vibration of Rigid Point Supported Rectangular Plates J92-127
Modal Sensitivities for Repeated Eigenvalues and Eigenvalue Derivatives J92-126
Free Vibrations of a Thin, Stiffened, Cylindrical Shallow Shell J92-125
Effect of Structural Damping on Flutter of Plates with a Follower Force J92-118
Analytical Method for Vibration of Angle-Ply Cylindrical Shells Having Arbitrary Edges J92-114
Stability of Elastic Systems Under Follower Forces J92-111
Scanning Laser Doppler Technique for Modal Testing of Distributed-Parameter Systems J92-110
Models of Space-Averaged Energetics of Plates J92-092
Convergence Improvement for Component Mode Synthesis J92-068
Identification of Flexible Joints in Vehicle Structures J92-067
Numerical Study of Vibration Localization in Disordered Cyclic Structures J92-066
Dynamic Analysis of Delamination Growth J92-062
Vibration Characteristics of Pretwisted Aerofoil Cross-Section Blade Packets Under Rotating Conditions J92-031
Nonlinear Dynamic Response of Frame-Type Structures with Hysteretic Damping at the Joints J92-030
Improvement of Structural Models Using Covariance Analysis and Nonlinear Generalized Least Squares J92-029
Issues in Modal Identification of Flexible Structures J92-028
Improved Approximations for Control Augmented Structural Synthesis J92-023
Compatibility of Measured and Predicted Vibration Modes in Model Improvement Studies J91-122

Structural Finite Elements

Beam Deflection J92-483
Improved Fixed Interface Method for Modal Synthesis J92-467
Simplified Theory for Composite Thin-Walled Beams J92-466
Prediction of Interlaminar Stresses in Laminated Plates Using Global Orthogonal Interpolation Polynomials J92-429
Generalized Compound Scaling Algorithm and Application to Minimum Weight Design of Plate Structures J92-392
Postbuckling Response and Failure Prediction of Graphite-Epoxy Plates Loaded in Compression J92-320
Partial Hybrid Strip Model for Higher-Order Laminated Plate Theory J92-291
Reduced Basis Technique for Calculating Sensitivity Coefficients of Nonlinear Structural Response J92-275
Approximate Reanalysis Based on the Exact Analytic Expressions J92-240
Finite Element/Penalty Function Method for Computing Stresses near Debonds J92-239
Collapse Characteristics of Cylindrical Composite Panels Under Axial Loads J92-214
Constructive Solid Geometry Approach to Three-Dimensional Structural Shape Optimization J92-206
Nonlinear Postbuckling Analysis of Plates and Shells by Four-Noded Strain Element J92-160
Continuum Design Sensitivity of Transient Responses Using Ritz and Mode Acceleration Methods J92-159
Objective Functions for the Nonlinear Curve Fit of Frequency Response Functions J92-128
Corotational Total Lagrangian Formulation for Three-Dimensional Beam Element J92-115
Viscoplastic Analysis of an Experimental Cylindrical Thrust Chamber Liner J92-113
Finite Element Analysis of Composite Structures Containing Distributed Piezoceramic Sensors and Actuators J92-112
Elastic-Plastic Finite Element Analysis of Thermoplastic Composite Plates and Shells J92-071
Integration-by-Parts Formulas for Boundary-Element Methods J92-069
Effect of Dropped Plies on the Strength of Graphite-Epoxy Laminates J92-063
Dynamic Analysis of Delamination Growth J92-062
Vibration Characteristics of Pretwisted Aerofoil Cross-Section Blade Packets Under Rotating Conditions J92-031

Structural Modeling

Beam Deflection J92-483
Buckling of Symmetrically Laminated Plates with Compression, Shear, and In-Plane Bending J92-468
Simplified Theory for Composite Thin-Walled Beams J92-466
Structural Behavior of Two-Cell Composite Rotor Blades with Elastic Couplings J92-462
Postbuckling Response of Stiffened Composite Cylindrical Shells J92-460
Dynamics of Skin-Stringer Panels Using Modified Wave Methods J92-432
Prediction of Interlaminar Stresses in Laminated Plates Using Global Orthogonal Interpolation Polynomials J92-429
Derivation of Green's Functions of Complex Structures Using Computer Algebra J92-393
Generalized Compound Scaling Algorithm and Application to Minimum Weight Design of Plate Structures J92-392
Analysis of Forced Bilinear Oscillators and the Application to Cracked Beam Dynamics J92-389
Torsional Stiffness for Circular Orthotropic Beams J92-365
Thin Film Modeling of Delamination Buckling in Pressure Loaded Laminated Cylindrical Shells J92-322
Three-Dimensional Shape Optimization Using Fully Automatic Mesh Generation J92-293
Approximate Vibrational Analysis of Noncircular Cylinders Having Varying Thickness J92-292
Validation of Finite Difference Boundary Condition Models for Solid Mechanics Applications J92-278
Efficient Stress Solutions at Skin Stiffener Interfaces of Composites Stiffened Panels J92-274
Axially Symmetric Pulse Propagation in Semi-Infinite Hollow Cylinders J92-238
Strength of Laminated Composites with Internal Discontinuities Parallel to the Applied Load J92-224
Matrix Transformation Method for Updating Dynamic Model J92-212
Generation and Comparison of Globally Isotropic Space-Filling Truss Structures J92-207
Constructive Solid Geometry Approach to Three-Dimensional Structural Shape Optimization J92-206
Statistical Distribution of Frequency Response in Disordered Periodic Structures J92-205
Nonlinear Postbuckling Analysis of Plates and Shells by Four-Noded Strain Element J92-160
Corotational Total Lagrangian Formulation for Three-Dimensional Beam Element J92-115
Extension-Bend-Twist Coupling Behavior of Nonhomogeneous Anisotropic Beams with Initial Twist J92-072

Identification of Flexible Joints in Vehicle Structures J92-067
Analytical Evaluation of Lattice Space Structures for Accuracy J92-041
Elastoviscoplastic Buckling Behavior of Simply Supported Columns J92-033
Compatibility of Measured and Predicted Vibration Modes in Model Improvement Studies J91-122

Structural Optimization

Improved Fixed Interface Method for Modal Synthesis J92-467
Substructure Decomposition Method for the Control Design of Large Flexible Structures J92-405
Displacement Approximations for Optimization of Beams Defined in Nonprincipal Coordinate Systems J92-367
Optimal Shape Design of Lattice Structures for Accuracy J92-366
Eigenvalue and Eigenvector Approximate Analysis for Repeated Eigenvalue Problems J92-353
Eigenvalue Sensitivity Analysis of Planar Frames with Variable Joint and Support Locations J92-325
Stacking Sequence Optimization of Simply Supported Laminates with Stability and Strain Constraints J92-324
Control-Structure Integrated Design J92-323
Three-Dimensional Shape Optimization Using Fully Automatic Mesh Generation J92-293
Vibration Mode Shape Control by Prestressing J92-290
Frequency Modification Using Newton's Method and Inverse Iteration Eigenvector Updating J92-281
Control Design Variable Linking for Optimization of Structural/Control Systems J92-281
Sparse Approach to Simultaneous Analysis and Design of Geometrically Nonlinear Structures J92-280
Higher Order Eigenpair Perturbations J92-279
Optimum Design of a Composite Structure with Three Types of Manufacturing Constraints J92-249
Structural Shape Sensitivity Analysis: Relationship Between Material Derivative and Control Volume Approaches J92-241
Approximate Reanalysis Based on the Exact Analytic Expressions J92-240
Improvement of Normalization Methods for Eigenvector Derivatives J92-237
Fuzzy Goal Programming Approach for Structural Optimization J92-208
Generation and Comparison of Globally Isotropic Space-Filling Truss Structures J92-207
Exploratory Design Studies of Actively Controlled Wings Using Integrated Multidisciplinary Synthesis J92-176
Stacking-Sequence Optimization for Buckling of Laminated Plates by Integer Programming J92-117
Multiobjective Shape and Material Optimization of Composite Structures Including Damping J92-116
Variational Principle for Shape Design Sensitivity Analysis J92-074
Shape-Sensitivity Analysis and Design Optimization of Linear, Thermoelastic Solids J92-073
Nonlinear Membership Functions in Multiobjective Fuzzy Optimization of Mechanical and Structural Systems J92-032

Structural Stability

Buckling of Symmetrically Laminated Plates with Compression, Shear, and In-Plane Bending J92-468
Postbuckling Response of Stiffened Composite Cylindrical Shells J92-460
Buckling Testing of Composite Columns J92-443
Vibration of Compressively Loaded Shear Deformable Flat Panels Exhibiting Initial Geometric Imperfections J92-441
Scale Effects in Buckling, Postbuckling, and Crippling of Graphite-Epoxy Z-section Stiffeners J92-430
Nonlinear Vibration and Radiation from a Panel with Transition to Chaos J92-414
Vibration and Buckling of Laminated Plates with a Cutout in Hygrothermal Environment J92-364
Nonlinear Instability of Corrugated Diaphragms J92-354
Accuracy of Critical-Temperature Sensitivity Coefficients Predicted by Multilayered Composite Plate Theories J92-349
Layer-Wise Shell Theory for Postbuckling of Laminated Circular Cylindrical Shells J92-326
Postbuckling Response and Failure Prediction of Graphite-Epoxy Plates Loaded in Compression J92-320
Buckling and Postbuckling of Delaminated Composite Sandwich Beams J92-283
Reduced Basis Technique for Calculating Sensitivity Coefficients of Nonlinear Structural Response J92-275
Stability Characteristics of Laminated Cylindrical Panels Under Transverse Loading J92-242
Collapse Characteristics of Cylindrical Composite Panels Under Axial Loads J92-214
Postbuckling of Shear Deformable Composite Flat Panels Taking Into Account Geometrical Imperfections J92-200
Effect of Transverse Shear Deformation on Imperfection Sensitivity of Cylindrical Panels J92-169
Nonlinear Postbuckling Analysis of Plates and Shells by Four-Noded Strain Element J92-160
Shear Deformable Theories for Cylindrical Laminates—Equilibrium and Buckling with Applications J92-119
Effect of Structural Damping on Flutter of Plates with a Follower Force J92-118
Stacking-Sequence Optimization for Buckling of Laminated Plates by Integer Programming J92-117
Elastoviscoplastic Buckling Behavior of Simply Supported Columns J92-033

Thermal Effects

Accuracy of Critical-Temperature Sensitivity Coefficients Predicted by Multilayered Composite Plate Theories J92-349

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition and Degradation

Force Measurement on Rotating, Ablating Models Using an Air Bearing Balance J92-153

Aerothermodynamics/Thermal Protection

Coupled Euler/Boundary-Layer Method for Nonequilibrium, Chemically Reacting Hypersonic Flows J92-451
Measurements of Turbulent Boundary Layer Prandtl Numbers and Space-time Temperature Correlations J92-005

Computational Heat Transfer

Numerical Study of Film Cooling in Supersonic Flow J92-378

Cryogenics

Boundary-Layer Transition-Detection in a Cryogenic Wind Tunnel Using Infrared Imaging J92-061

Natural Convection

Nature of Buoyancy-Driven Flows in a Reduced-Gravity Environment J92-271

Nonintrusive Diagnostics

High-Velocity Measurements via Laser Doppler Anemometer Using Single- and Multiaxial-Mode Lasers J92-359

Thermochemistry and Chemical Kinetics

Comparison of Chemical Kinetic Rate Mechanisms for High-Temperature Air, Including Electronic Energy J92-476
Modeling Supersonic Combustion Using a Fully Implicit Numerical Method J92-149

Thermophysical Properties

Preferential Thermal and Multicomponent Species Transport Effects in Strained Diffusion Flames J92-477
Equilibrated Moisture Content of Several Carbon Phenolic Composites J92-235

Chronological Index

J90-340 Unsteady Separation over Maneuvering Bodies. S. F. Shen and Tzuyin Wu, *Cornell University* (**28**, 12, p. 2059) Article

Technical Comment by L. E. Ericsson and J. P. Reding, *Lockheed Missiles & Space Company, Inc.* (**30**, 2, p. 569)

J91-031 Conservation Errors and Convergence Characteristics of Iterative Space-Marching Algorithms. D. S. Thompson, *University of Texas at Arlington*; and R. J. Matus, *General Dynamics/Fort Worth Division* (**29**, 2, p. 227) Article based on AIAA Paper 89-1935 CP895

Technical Comment by S. V. Ramakrishnan, *Rockwell International Science Center* (**30**, 4, p. 1144)

Reply (**30**, 4, p. 1144)

J91-122 Compatibility of Measured and Predicted Vibration Modes in Model Improvement Studies. J. He, *Footscray Institute of Technology, Australia*; and D. J. Ewins, *Imperial College of Science and Technology, Inc., England, UK* (**29**, 5, p. 798) Article

Technical Comment by Irving U. Ojalvo, *Columbia University* (**30**, 7, p. 1935)

Reply (**30**, 7, p. 1935)

J91-140 Modification of the van Driest Damping Function to Include the Effects of Surface Roughness. Per-Åge Krogstad, *Norwegian Institute of Technology* (**29**, 6, p. 888) Article

Technical Comment by Paul S. Granville, *David Taylor Research Center* (**30**, 6, p. 1673)

Reply (**30**, 6, p. 1673)

J91-263 Streamwise Upwind Algorithm for Computing Unsteady Transonic Flows Past Oscillating Wings. Shigeru Obayashi, Guru P. Guruswamy and Peter M. Goorjian, *NASA Ames Research Center* (**29**, 10, p. 1668) Article based on AIAA Paper 90-3103 CP908

Errata (**30**, 2, p. 569)

J92-001 Measurements of the Flow Around a Lifting-Wing/Body Junction. D. H. Wood and R. V. Westphal, *NASA Ames Research Center* (**30**, 1, p. 6) Article

J92-002 Explicit Navier-Stokes Computation of Cascade Flows Using the k-ϵ Turbulence Model. Robert F. Kunz and Budugur Lakshminarayana, *Pennsylvania State University* (**30**, 1, p. 13) Article

J92-003 Higher Approximations in the Asymptotic Theory of Propeller Noise. D. G. Crighton, *University of Cambridge, UK*; and A. B. Parry, *University of Strathclyde, UK* (**30**, 1, p. 23) Article

J92-004 Removal of Spurious Reflections from Computational Fluid Dynamic Solutions with the Complex Cepstrum. Kristine R. Meadows and Jay C. Hardin, *NASA Langley Research Center* (**30**, 1, p. 29) Article based on AIAA Paper 90-3919

J92-005 Measurements of Turbulent Boundary Layer Prandtl Numbers and Space-Time Temperature Correlations. Nader Bagheri, Constantine J. Strataridakis and Bruce R. White, *University of California, Davis* (**30**, 1, p. 35) Article based on AIAA Paper 90-0020

J92-006 Turbulence Phenomena in a Multiple Normal Shock Wave/Turbulent Boundary-Layer Interaction. B. F. Carroll, *University of Florida*; and J. C. Dutton, *University of Illinois at Urbana-Champaign* (**30**, 1, p. 43) Article

J92-007 Turbulence Measurements for a Longitudinal Vortex Interacting with a Three-Dimensional Turbulent Boundary Layer. Takaaki Shizawa and John K. Eaton, *Stanford University* (**30**, 1, p. 49) Article based on AIAA Paper 91-0732

J92-008 Genuinely Upwind Algorithms for the Multidimensional Euler Equations. C. Lacor and Ch. Hirsch, *Vrije Universiteit Brussel, Belgium* (**30**, 1, p. 56) Article based on AIAA Paper 89-1958 CP895

J92-009 Evaluation of a Bounded High-Resolution Scheme for Combustor Flow Computations. Berthold Noll, *University of Karlsruhe, Germany* (**30**, 1, p. 64) Article

J92-010 Upwind Scheme for Solving the Euler Equations on Unstructured Tetrahedral Meshes. Neal T. Frink, *NASA Langley Research Center* (**30**, 1, p. 70) Article

J92-011 Newton's Method Solver for High-Speed Viscous Separated Flowfields. Paul D. Orkwis and D. Scott McRae, *North Carolina State University* (**30**, 1, p. 78) Article

J92-012 Nonequilibrium Hypersonic Inviscid Steady Flows. M. Valorani, M. Onofri, B. Favini and F. Sabetta, *Universitá degli Studi di Roma "La Sapienza," Italy* (**30**, 1, p. 86) Article based on AIAA Paper 89-0671.

J92-013 Instabilities of Flows over Bodies at Large Incidence. David Degani, *NASA Ames Research Center* (**30**, 1, p. 94) Article based on AIAA Paper 90-0593

J92-014 Sonic Eddy—A Model for Compressible Turbulence. Robert E. Breidenthal, *University of Washington* (**30**, 1, p. 101) Article based on AIAA Paper 90-0495

J92-015 Vortex Simulation of a Three-Dimensional Reacting Shear Layer with Infinite-Rate Kinetics. Omar M. Knio and Ahmed F. Ghoniem, *Massachusetts Institute of Technology* (**30**, 1, p. 105) Article based on AIAA Paper 90-0150

J92-016 Detection of Flow State in an Unsteady Separating Flow. M. Anwar Ramiz and Mukund Acharya, *Illinois Institute of Technology* (**30**, 1, p. 117) Article based on AIAA Paper 89-1017

J92-017 Asymmetric Separated Flows at Supersonic Speeds. M. J. Siclari, *Grumman Corporate Research Center* (**30**, 1, p. 124) Article based on AIAA Paper 90-0595

J92-018 Drop-Tower Experiments for Capillary Surfaces in an Exotic Container. Paul Concus, *University of California, Berkeley*; Robert Finn, *Stanford University*; and Mark Weislogel, *NASA Lewis Research Center* (**30**, 1, p. 134) Article based on AIAA Paper 91-0107

J92-019 Hydrogen Fluoride Chemical Laser Amplifier Performance: Experiment. L. H. Sentman, R. E. Waldo, P. T. Theodoropoulos, T. X. Nguyen and D. L. Carroll, *University of Illinois* (**30**, 1, p. 138) Article

J92-020 Study of Junction and Tip Vortices Using Particle Displacement Velocimetry. A. Shekarriz, T. C. Fu and J. Katz, *John Hopkins University;* H. L. Liu and T. T. Huang, *David Taylor Research Center* (**30**, 1, p. 145) Article based on AIAA Paper 91-0269

J92-021 Nonlinear Stall Flutter and Divergence Analysis of Cantilevered Graphite/Epoxy Wings. Peter Dunn and John Dugundji, *Massachusetts Institute of Technology* (**30**, 1, p. 153) Article based on AIAA Paper 90-0983 CP902

J92-022 Time Domain Flutter Analysis of Cascades Using a Full-Potential Solver. Milind A. Bakhle, T. S. R. Reddy and Theo G. Keith Jr., *University of Toledo* (**30**, 1, p. 163) Article based on AIAA Paper 90-0984 CP902

J92-023 Improved Approximations for Control Augmented Structural Synthesis. H. L. Thomas, A. E. Sepulveda and L. A. Schmit, *University of California, Los Angeles* (**30**, 1, p. 171) Article based on AIAA Paper 90-1060 CP902

J92-024 Nonlinear Vibrations of Rectangular Laminated Thin Plates. Jongsik Woo and Sudhakar Nair, *Illinois Institute of Technology* (**30**, 1, p. 180) Article

J92-025 Optimum Fiber Angle of Unidirectional Composites for Load with Variations. Mitsunori Miki, Yoshisada Murotsu and Tetsuo Tanaka, *University of Osaka Prefecture, Japan* (**30**, 1, p. 189) Article based on AIAA Paper 90-1071 CP902

J92-026 Method for Calculating the Interlaminar Stresses in Symmetric Laminates Containing a Circular Hole. Chu-Cheng Ko and Chien-Chang Lin, *National Chung-Hsing University, Taiwan, ROC* (**30**, 1, p. 197) Article

J92-027 Effect of Composite Fabrication Method on Structural Response and Impact Damage. Dawn C. Jegley, *NASA Langley Research Center*; and Osvaldo F. Lopez, *Federal Aviation Administration* (**30**, 1, p. 205) Article based on AIAA Paper 91-1080 CP911

J92-028 Issues in Modal Identification of Flexible Structures. H. Baruh and J. Boka, *Rutgers University* (**30**, 1, p. 214) Article based on AIAA Paper 88-2409 CP882

J92-029 Improvement of Structural Models Using Covariance Analysis and Nonlinear Generalized Least Squares. R. J. Glaser, C. P. Kuo and B. K. Wada, *Jet Propulsion Laboratory, California Institute of Technology* (**30**, 1, p. 226) Article

J92-030 Nonlinear Dynamic Response of Frame-Type Structures with Hysteretic Damping at the Joints. G. Shi, *Dalian University of Technology, PRC*; and S. N. Atluri, *Georgia Institute of Technology* (**30**, 1, p. 234) Article

J92-031 Vibration Characteristics of Pretwisted Aerofoil Cross-Section Blade Packets Under Rotating Conditions. M. Sabuncu, *Kokuz Eylû University, Turkey*; and J. Thomas, *University of Surrey, England, UK* (**30**, 1, p. 241) Article

J92-032 Nonlinear Membership Functions in Multiobjective Fuzzy Optimization of Mechanical and Structural Systems. Anoop K. Dhingra, *University of Wisconsin*; Singiresu S. Rao, *Purdue University*; and Virendra Kumar, *General Electric Company* (**30**, 1, p. 251) Article based on AIAA Paper 90-1175 CP902

J92-033 Elastoviscoplastic Buckling Behavior of Simply Supported Columns. Y. Song, *Georgia Institute of Technology*; and G. J. Simitses, *University of Cincinnati* (**30**, 1, p. 261) Article

J92-034 Simplification of Beam and Warming's Implicit Scheme for Two-Dimensional Compressible Flows. Jon Lee, *Flight Dynamics Laboratory, Wright-Patterson AFB* (**30**, 1, p. 266) Technical Note

J92-035 Formation of Shocks Within Axisymmetric Nozzles. E. Loth, J. Baum and R. Löhner, *Naval Research Laboratory* (**30**, 1, p. 268) Technical Note based on AIAA Paper 90-1655

J92-036 Turbulent Boundary-Layer Characteristics over a Flat-Plate/Wedge Configuration at Mach 6. P. J. Disimile, *University of Cincinnati*; and N. E. Scaggs, *Air Force Wright Research and Development Center, Wright-Patterson AFB* (**30**, 1, p. 270) Technical Note based on AIAA Paper 90-3028 CP908

J92-037 Surface Flow Patterns on an Ogive-Cylinder at Incidence. David Degani, Murray Tobak and G. G. Zilliac, *NASA Ames Research Center* (**30**, 1, p. 272) Technical Note

J92-038 Interaction of a Planar Shock Wave with a Double-Wedge-Like Structure. G. Ben-Dor, *Ben-Gurion University of the Negev, Israel* (**30**, 1, p. 274) Technical Note

J92-039 Simple Method of Supersonic Flow Visualization Using Smoke. L. S. Miller and E. Irani, *Wichita State University* (**30**, 1, p. 278) Technical Note

J92-040 Importance of Fresh Air in Manometer Tubing. John M. Cimbala, Richard S. Meyer and Todd B. Harman, *Pennsylvania State University* (**30**, 1, p. 279) Technical Note

J92-041 Analytical Evaluation of Lattice Space Structures for Accuracy. Hiroshi Furuya, *Nagoya University, Japan* (**30**, 1, p. 280) Technical Note

J92-042 Unsteady Circulation Control Aerodynamics of a Circular Cylinder with Periodic Jet Blowing. Terence A. Ghee and J. Gordon Leishman, *University of Maryland* (**30**, 2, p. 289) Article based on AIAA Paper 91-0433

J92-043 Enthalpy Damping for High Mach Number Euler Solutions. Anutosh Moitra, *NASA Langley Research Center* (**30**, 2, p. 300) Synoptic based on AIAA Paper 90-1585

J92-044 Impingement Tones of Large Aspect Ratio Supersonic Rectangular Jets. Christopher K. W. Tam, *Florida State University*; and Thomas D. Norum, *NASA Langley Research Center* (**30**, 2, p. 304) Article based on AIAA Paper 90-3984

J92-045 Sound Generation by a Stenosis in a Pipe. J. C. Hardin, *NASA Langley Research Center*; and D. S. Pope, *Lockheed Engineering & Sciences Company* (**30**, 2, p. 312) Article based on AIAA Paper 90-3919

J92-046 Sound Transmission Through a High-Temperature Acoustic Probe Tube. Tony L. Parrott and William E. Zorumski, *NASA Langley Research Center* (**30**, 2, p. 318) Article based on AIAA Paper 90-3991

J92-047 Critical Evaluation of Two-Equation Models for Near-Wall Turbulence. Charles G. Speziale, *NASA Langley Research Center*; Ridha Abid, *Vigyan Research Associates*; and E. Clay Anderson, *NASA Langley Research Center* (**30**, 2, p. 324) Article based on AIAA Paper 90-1481
Errata (**30**, 4, p. 1145)

J92-048 Effect of Compliant Walls on Secondary Instabilities in Boundary-Layer Transition. Ronald D. Joslin, *NASA Langley Research Center*; and Philip J. Morris, *Pennsylvania State University* (**30**, 2, p. 332) Article based on AIAA Paper 91-0738

J92-049 Local Solution Acceleration Method for the Euler and Navier-Stokes Equations. D. Drikakis and S. Tsangaris, *Laboratory of Aerodynamics NTUA, Greece* (**30**, 2, p. 340) Article

J92-050 Flow Past a Sphere: Topological Transitions of the Vorticity Field. Susumu Shirayama, *Institute of Computational Fluid Dynamics, Japan* (**30**, 2, p. 349) Article based on AIAA Paper 90-3105 CP908

J92-051 Experimental Investigation of Normal-Shock/Turbulent-Boundary-Layer Interactions with and without Mass Removal. M. J. Morris, M. Sajben and J. C. Kroutil, *McDonnell Douglas Research Laboratories* (**30**, 2, p. 359) Article

J92-052 Experimental Investigation of Turbulent Flow Through a Circular-to-Rectangular Transition Duct. D. O. Davis and F. B. Gessner, *University of Washington* (**30**, 2, p. 367) Article based on AIAA Paper 90-1505

J92-053 Laser Velocimetry Seed Particles Within Compressible, Vortical Flows. Mark S. Maurice, *Wright Laboratory, Wright-Patterson AFB* (**30**, 2, p. 376) Article based on AIAA Paper 91-0292

J92-054 Concentration Imaging Measurements in Turbulent Concentric-Jet Flows. M. Namazian and J. Kelly, *Altex Technologies Corporation*; and R. W. Schefer, *Sandia National Laboratories* (**30**, 2, p. 384) Article based on AIAA Paper 89-0058

J92-055 Modeling Ideally Expanded Supersonic Turbulent Jet Flows with Nonpremixed H_2-Air Combustion. R. Villasenor, *Vanderbilt University*; J.-Y. Chen, *Sandia National Laboratories*; and R. W. Pitz, *Vanderbilt University* (**30**, 2, p. 395) Article

J92-056 Unsteady Pressure Field and Vorticity Production over a Pitching Airfoil. Mukund Acharya and Metwally H. Metwally, *Illinois Institute of Technology* (**30**, 2, p. 403) Article based on AIAA Paper 90-1472

J92-057 Finite Element Analysis of Oscillatory Flow with Heat Transfer Inside a Square Cavity. B. Ramaswamy, T. C. Jue and J. E. Akin, *Rice University* (**30**, 2, p. 412) Article based on AIAA Paper 91-0122

J92-058 High Reynolds Number Flows in Rotating and Nutating Cylinders: Spatial Eigenvalue Approach. Phili Hall, *University of Manchester, England, UK*; Raymond Sedney and Nathan Gerber, *U.S. Army Ballistic Research Laboratory, Aberdeen Proving Ground* (**30**, 2, p. 423) Article

J92-059 Heat Removal in a Gas Cooled Solid-State Laser Disk Amplifier. S. B. Sutton, G. F. Albrecht and H. F. Robey, *Lawrence Livermore National Laboratory* (**30**, 2, p. 431) Article

J92-060 Planar Laser-Induced Fluorescence Imaging of Shock-Tube Flows with Vibrational Nonequilibrium. B. K. McMillin, M. P. Lee and R. K. Hanson, *Stanford University* (**30**, 2, p. 436) Article based on AIAA Paper 90-1519

J92-061 Boundary-Layer Transition-Detection in a Cryogenic Wind Tunnel Using Infrared Imaging. Ehud Gartenberg, *Old Dominion University*; William G. Johnson Jr., Robert E. Wright Jr., Debra L. Carraway and Charles B. Johnson, *NASA Langley Research Center* (**30**, 2, p. 444) Article based on AIAA Paper 90-3024 CP908

J92-062 Dynamic Analysis of Delamination Growth. Hsin-Piao Chen, *California State University*; and Hung Can Ngo, *Douglas Aircraft Company* (**30**, 2, p. 447) Synoptic based on AIAA Paper 89-1303 CP891

J92-063 Effect of Dropped Plies on the Strength of Graphite-Epoxy Laminates. James M. Curry, *Rohr Industries, Inc.*; Eric R. Johnson, *Virginia Polytechnic Institute and State University*; and James H. Starnes Jr., *NASA Langley Research Center* (**30**, 2, p. 449) Article based on AIAA Paper 87-0874 CP872

J92-064 Experiments on Active Control of Vibrational Power Flow Using Piezoceramic Actuators/Sensors. Gary P. Gibbs and Chris R. Fuller, *Virginia Polytechnic Institute and State University* (**30**, 2, p. 457) Article based on AIAA Paper 90-1132 CP902

J92-065 Reliability of Uncertain Flexible Laminated Skewed Plates Under Random Compressions. Chihchen Chang and Henry T. Y. Yang, *Purdue University* (**30**, 2, p. 464) Article

J92-066 Numerical Study of Vibration Localization in Disordered Cyclic Structures. Phillip J. Cornwell and Oddvar O. Bendiksen, *Princeton University* (**30**, 2, p. 473) Article

J92-067 Identification of Flexible Joints in Vehicle Structures. Kwangju Lee and Efstratios Nikolaidis, *Virginia Polytechnic Institute and State University* (**30**, 2, p. 482) Article

J92-068 Convergence Improvement for Component Mode Synthesis. Remi C. Engels, *University of Tennessee Space Institute* (**30**, 2, p. 490) Article

J92-069 Integration-by-Parts Formulas for Boundary-Element Methods. Michael A. Epton, *Boeing Company* (**30**, 2, p. 496) Article

J92-070 Control of Jet Structure by Crown-Shaped Nozzles. Ellen K. Longmire, John K. Eaton and Christopher J. Elkins, *Stanford University* (**30**, 2, p. 505) Article based on AIAA Paper 91-0316

J92-071 Elastic-Plastic Finite Element Analysis of Thermoplastic Composite Plates and Shells. C. T. Sun and G. Chen, *Purdue University* (**30**, 2, p. 513) Article

J92-072 Extension-Bend-Twist Coupling Behavior of Nonhomogeneous Anisotropic Beams with Initial Twist. J. B. Kosmatka, *University of California, San Diego* (**30**, 2, p. 519) Article

J92-073 Shape-Sensitivity Analysis and Design Optimization of Linear, Thermoelastic Solids. Gene J. W. Hou, Jeen S. Sheen and Ching H. Chuang, *Old Dominion University* (**30**, 2, p. 528) Article based on AIAA Paper 90-1012 CP902

J92-074 Variational Principle for Shape Design Sensitivity Analysis. Jasbir S. Arora and J. B. Cardoso, *University of Iowa* (**30**, 2, p. 538) Article based on AIAA Paper 91-1213 CP911

J92-075 Zonal Flow Analysis Method for Two-Dimensional Airfoils. J. Michael Summa, Daniel J. Strash and Sungyul Yoo, *Analytical Methods, Inc.* (**30**, 2, p. 548) Technical Note based on AIAA Paper 90-0571

J92-076 Preconditioned Upwind Methods to Solve Incompressible Navier-Stokes Equations. C.-H. Hsu, *Vigyan, Inc.*; Y.-M. Chen and C. H. Liu, *NASA Langley Research Center* (**30**, 2, p. 550) Technical Note based on AIAA Paper 90-1496

J92-077 Application of a New K-τ Model to Near Wall Turbulent Flows. S. Thangam, R. Abid and C. G. Speziale, *NASA Langley Research Center* (**30**, 2, p. 552) Technical Note

J92-078 Wake of a Rotating Circular Cylinder. Takeyoshi Kimura, Michihisa Tsutahara and Zhong-yi Wang, *Kobe University, Japan* (**30**, 2, p. 555) Technical Note

J92-079 Model for Turbulent Backflows. Uriel C. Goldberg, Barna L. Bihari and Sekaripuram V. Ramakrishnan, *Rockwell International Science Center* (**30**, 2, p. 557) Technical Note

J92-080 Effect of Leading-Edge Geometry on a Turbulent Separation Bubble. N. Djilali, *University of Victoria, Canada*; and I. S. Gartshore, *University of British Columbia, Canada* (**30**, 2, p. 559) Technical Note

J92-081 Prandtl-Meyer Function for Dense Gases. M. S. Cramer and A. B. Crickenberger, *Virginia Polytechnic Institute and State University* (**30**, 2, p. 561) Technical Note

J92-082 Base Pressure in Supersonic Flow: Further Thoughts About a Theory. Mari Tanner, *German Aerospace Research Establishment* (**30**, 2, p. 565) Technical Note

J92-083 Numerical Investigation of Unsteady Transonic Nozzle Flows. Shen-Min Liang, Chou-Jiu Tsai and Chien-Ko Ho, *National Cheng Kung University, ROC* (**30**, 2, p. 566) Technical Note

J92-086 New Nonequilibrium Turbulence Model for Calculating Flows over Airfoils. S. Ahmed and J. C. Tannehill, *Iowa State University* (**30**, 2, p. 302) Synoptic based on AIAA Paper 90-1469

J92-087 Numerical Investigation of Laminar Separated Trailing-Edge Flows. F. A. Mansfield, *Naval Weapons Center*; and Odus R. Burggraf, *Ohio State University* (**30**, 3, p. 577) Article based on AIAA Paper 90-3046 CP908

J92-088 Numerical Investigation of Vortex Breakdown on a Delta Wing. Shreekant Agrawal, Raymond Matt Barnett and Brian Anthony Robinson, *McDonnell Douglas Corporation* (**30**, 3, p. 584) Article

J92-089 Computing Boundary Forces Due to Unsteady, Inviscid, Incompressible Flow. S. R. Breit, W. C. Coney, A. L. Dickinson and J. R. Webb, *Bolt, Beranek and Newman, Inc.* (**30**, 3, p. 592) Article

J92-090 Plate Acceleration and Sound Transmission Due to Random Acoustic and Boundary-Layer Excitation. Ferdinand W. Grosveld, *Lockheed Engineering & Sciences Company* (**30**, 3, p. 601) Article based on AIAA Paper 90-3964

J92-091 Discretization Errors Inherent in Finite Difference Solution of Propeller Noise Problems. Christopher K. W. Tam, *Florida State University* (**30**, 3, p. 608) Article based on AIAA Paper 90-3943

J92-092 Models of Space-Averaged Energetics of Plates. O. M. Bouthier and R. J. Bernhard, *Purdue University* (**30**, 3, p. 616) Article based on AIAA Paper 90-3921

J92-093 Identification of Helicopter Noise Using a Neural Network. Randolph H. Cabell, Chris R. Fuller and Walter F. O'Brien, *Virginia Polytechnic Institute and State University* (**30**, 3, p. 624) Article based on AIAA Paper 90-3973

J92-094 Algebraic Turbulence Modeling for Adaptive Unstructured Grids. Yannis Kallinderis, *University of Texas at Austin* (**30**, 3, p. 631) Article

J92-095 Streamwise Vortex Production by Pitched and Skewed Jets in a Turbulent Boundary Layer. Debora A. Compton and James P. Johnston, *Stanford University* (**30**, 3, p. 640) Article based on AIAA Paper 91-0038

J92-096 Finite Element Navier-Stokes Solver for Unstructured Grids. D. L. Marcum and R. K. Agarwal, *McDonnell Douglas Corporation* (**30**, 3, p. 648) Article based on AIAA Paper 90-1652

J92-097 Turbulence Model Effects on Separated Flow About a Prolate Spheroid. Ken Gee, Russell M. Cummings and Lewis B. Schiff, *California Polytechnic State University* (**30**, 3, p. 655) Article based on AIAA Paper 90-3106 CP908

J92-098 Transition Control of Instability Waves over an Acoustically Excited Flexible Surface. L. Maestrello, *NASA Langley Research Center*; and F. W. Grosveld, *Lockheed Engineering & Sciences Company* (**30**, 3, p. 665) Article based on AIAA Paper 90-4008

J92-099 Boundary-Orthogonal Biharmonic Grids via Preconditioned Gradient Methods. Panagiotis D. Sparis and Anastasios Karkanis, *Democritus University of Thrace, Greece* (**30**, 3, p. 671) Article

J92-100 Cartesian Euler Method for Arbitrary Aircraft Configurations. Boris Epstein, Alexander L. Luntz and Aharon Nachshon, *Israel Aircraft Industries* (**30**, 3, p. 679) Article based on AIAA Paper 89-1960 CP895

J92-101 Boundary Element Method for the Analysis of the Unsteady Flow Around Extreme Propeller Geometries. Spyros A. Kinnas and Ching-Yeh Hsin, *Massachusetts Institute of Technology* (**30**, 3, p. 688) Article

J92-102 Effect of Airfoil (Trailing-Edge) Thickness on the Numerical Solution of Panel Methods Based on the Dirichlet Boundary Condition. Steven Yon, Joseph Katz and Allen Plotkin, *San Diego State University* (**30**, 3, p. 697) Article

J92-103 Oscillating Two-Dimensional Hypersonic Airfoils at Small Angles of Attack. Hamdi T. Hemdan, *King Saud University, Saudi Arabia* (**30**, 3, p. 703) Article

J92-104 Transient Behavior of Supersonic Flow Through Inlets. H. S. Pordal, P. K. Khosla and S. G. Rubin, *University of Cincinnati* (**30**, 3, p. 711) Article based on AIAA Paper 90-2130

J92-105 Aerodynamic Design Optimization Using Sensitivity Analysis and Computational Fluid Dynamics. Oktay Baysal and Mohamed E. Eleshaky, *Old Dominion University* (**30**, 3, p. 718) Article based on AIAA Paper 91-0471

J92-106 Approximate Solutions for Oblique Detonations in the Hypersonic Limit. Joseph M. Powers, *University of Notre Dame*; and D. Scott Stewart, *University of Illinois at Urbana-Champaign* (**30**, 3, p. 726) Article

J92-107 Fast Solver for Systems of Axisymmetric Ring Vortices. James H. Strickland and Donald E. Amos, *Sandia National Laboratories* (**30**, 3, p. 737) Article

J92-108 Experimental Investigation of the Perpendicular Rotor Blade-Vortex Interaction at Transonic Speeds. Iraj M. Kalkhoran, *Polytechnic University*; Donald R. Wilson and Donald D. Seath, *University of Texas at Arlington* (**30**, 3, p. 747) Article based on AIAA Paper 87-0208

J92-109 High Resolution Computation of Unsteady Flows in Pulsed Lasers. B. Srivastava, F. Faria-e-Maia, J. Her and J. Moran, *Avco Research Laboratory* (**30**, 3, p. 756) Article based on AIAA Paper 90-1508

J92-110 Scanning Laser Doppler Technique for Modal Testing of Distributed-Parameter Systems. P. Sriram, Sathya V. Hanagud and James I. Craig, *Georgia Institute of Technology* (**30**, 3, p. 765) Synoptic based on AIAA Paper 89-1292 CP891

J92-111 Stability of Elastic Systems Under Follower Forces. Lien-Wen Chen and Der-Ming Ku, *National Cheng Kung University, Taiwan, ROC* (**30**, 3, p. 767) Article

J92-112 Finite Element Analysis of Composite Structures Containing Distributed Piezoceramic Sensors and Actuators. Sung Kyu Ha, Charles Keilers and Fu-Kuo Chang, *Stanford University* (**30**, 3, p. 772) Article

J92-113 Viscoplastic Analysis of an Experimental Cylindrical Thrust Chamber Liner. Vinod K. Arya, *University of Toledo*; and Steven M. Arnold, *NASA Lewis Research Center* (**30**, 3, p. 781) Article

J92-114 Analytical Method for Vibration of Angle-Ply Cylindrical Shells Having Arbitrary Edges. Y. Narita, Y. Ohta, G. Yamada and Y. Kobayashi, *Hokkaido Institute of Technology, Japan* (**30**, 3, p. 790) Article

J92-115 Corotational Total Lagrangian Formulation for Three-Dimensional Beam Element. Kuo Mo Hsiao, *National Chiao Tung University, Tawian, ROC* (**30**, 3, p. 797) Article

J92-116 Multiobjective Shape and Material Optimization of Composite Structures Including Damping. D. A. Saravanos and C. C. Chamis, *NASA Lewis Research Center* (**30**, 3, p. 805) Article based on AIAA Paper 90-1135 CP902

J92-117 Stacking-Sequence Optimization for Buckling of Laminated Plates by Integer Programming. Raphael T. Haftka, *Virginia Polytechnic Institute and State University*; and Joanne L. Walsh, *NASA Langley Research Center* (**30**, 3, p. 814) Article

J92-118 Effect of Structural Damping on Flutter of Plates with a Follower Force. Ken Higuchi, *Tokyo Denki University, Japan*; and Earl H. Dowell, *Duke University* (**30**, 3, p. 820) Article based on AIAA Paper 90-0940 CP902

J92-119 Shear Deformable Theories for Cylindrical Laminates—Equilibrium and Buckling with Applications. George J. Simitses and John S. Anastasiadis, *University of Cincinnati* (**30**, 3, p. 826) Article

J92-120 Spanwise Averaging of Plane Mixing Layer Properties. James H. Bell, *NASA Ames Research Center*; Michael W. Plesniak and Rabindra D. Mehta, *Stanford University* (**30**, 3, p. 835) Technical Note

J92-121 Approximate Formula of Weak Oblique Shock Wave Angle. Hua-Sha Dou and Hsueh-Ying Teng, *Beijing University of Aeronautics and Astronautics, PRC* (**30**, 3, p. 837) Technical Note

Technical Comment by Joseph M. Powers, *University of Notre Dame* (**30**, 11, p. 2801)

Reply (**30**, 11, p. 2801)

J92-122 Using Rankine Vortices to Model Flow Around a Body of Revolution. B. S. Taylor, *Portsmouth Polytechnic, England, UK*; and A. R. J. M. Lloyd, *Defense Research Agency, England, UK* (**30**, 3, p. 839) Technical Note

J92-123 Numerical Simulation of Vortex Unsteadiness on a Slender Body at High Incidence. David Degani, *NASA Ames Research Center* (**30**, 3, p. 841) Technical Note

J92-124 Skin-Friction Gauge for Use in Hypervelocity Impulse Facilities. G. M. Kelly, J. M. Simmons and A. Paull, *University of Queensland, Australia* (**30**, 3, p. 844) Technical Note

J92-125 Free Vibrations of a Thin, Stiffened, Cylindrical Shallow Shell. Zahit Mecitoğlu and M. Cengiz Dökmeci, *Istanbul Technical University* (**30**, 3, p. 848) Technical Note

J92-126 Modal Sensitivities for Repeated Eigenvalues and Eigenvalue Derivatives. Jinsiang Shaw and Suhada Jayasuriya, *Texas A&M University* (**30**, 3, p. 850) Technical Note

J92-127 Effects of Attached Masses on Free Vibration of Rigid Point Supported Rectangular Plates. R. K. Singal, *Canadian Space Agency*; and D. J. Gorman, *University of Ottawa, Canada* (**30**, 3, p. 853) Technical Note

J92-128 Objective Functions for the Nonlinear Curve Fit of Frequency Response Functions. José Roberto F. Arruda, *State University of Campinas, Brazil* (**30**, 3, p. 855) Technical Note

J92-129 Large Deflections of Sandwich Plates with Orthotropic Cores—A New Approach. Sudip Dutta and B. Banerjee, *Government of West Bengal, India* (**30**, 3, p. 845) Technical Note

J92-130 Flow Near the Trailing Edge of an Airfoil. Lucien Z. Dumitrescu, *Institute of Aeronautics, Romania* (**30**, 4, p. 865) Article

J92-131 Numerical Simulation of Three-Dimensional Supersonic Free Shear Layers. Ismail H. Tuncer and Lakshmi N. Sankar, *Georgia Institute of Technology* (**30**, 4, p. 871) Synoptic based on AIAA Paper 90-3958

J92-132 Flow Past a Wing-Body Junction—Experimental Evaluation of Turbulence Models. William J. Devenport and Roger L. Simpson, *Virginia Polytechnic Institute and State University* (**30**, 4, p. 873) Article

J92-133 Optimization of Bluff Body for Minimum Drag in Ground Proximity. T. Han, D. C. Hammond Jr. and C. J. Sagi, *General Motors Research Laboratories* (**30**, 4, p. 882) Article based on AIAA Paper 90-3027 CP908

J92-134 Structure of Supersonic Turbulent Flow Past a Swept Compression Corner. Doyle D. Knight, *Rutgers University*; C. C. Horstman, *NASA Ames Research Center*; and Seymour Bogdonoff, *Princeton University* (**30**, 4, p. 890) Article

J92-135 Nonadiabatic and Three-Dimensional Effects in Compressible Turbulent Boundary Layers. Richard W. Barnwell, *NASA Langley Research Center* (**30**, 4, p. 897) Article based on AIAA Paper 91-0528

J92-136 Linear Stability of Three-Dimensional Boundary Layers over Axisymmetric Bodies at Incidence. R. E. Spall and M. R. Malik, *High Technology Corporation* (**30**, 4, p. 905) Article

J92-137 Flux-Difference Split Algorithm for Unsteady Thin-Layer Navier Stokes Solutions. L. Bruce Simpson, *U.S. Air Force Wright Laboratory, Eglin AFB*; and David L. Whitfield, *Mississippi State University* (**30**, 4, p. 914) Article based on AIAA Paper 89-1995 CP895

J92-138 Second-Order Upwind and Central Difference Schemes for Recirculating Flow Computation. Wei Shyy, Siddharth Thakur and Jeffrey Wright, *University of Florida* (**30**, 4, p. 923) Article

J92-139 Orthogonal Grids Around Difficult Bodies. Gino Moretti, *G.M.A.F., Inc.* (**30**, 4, p. 933) Article

J92-140 Assessment of Total Variation Diminishing Schemes in Compressible Mixing Flow Computations. Pong-Je Lu and Kuen-Chuan Wu, *National Cheng Kung University, Taiwan, ROC* (**30**, 4, p. 939) Article

J92-141 Efficient Massively Parallel Euler Solver for Two-Dimensional Unstructured Grids. Steven W. Hammond and Timothy J. Barth, *NASA Ames Research Center* (**30**, 4, p. 947) Article based on AIAA Paper 91-0441

J92-142 Solution-Adaptive Grid Procedure for the Parabolized Navier-Stokes Equations. Albert D. Harvey III and Sumanta Acharya, *Louisiana State University*; and Scott L. Lawrence, *NASA Ames Research Center* (**30**, 4, p. 953) Article

J92-143 Calculations of the Dilution System in an Annular Gas Turbine Combustor. J. J. McGuirk and J. M. L. M. Palma, *Imperial College of Science, Technology and Medicine, England, UK* (**30**, 4, p. 963) Article

J92-144 Two- and Three-Dimensional Effects in the Supersonic Mixing Layer. N. T. Clemens and M. G. Mungal, *Stanford University* (**30**, 4, p. 973) Article based on AIAA Paper 90-1978

J92-145 Corroboration of the New Method of Obtaining Dissipation in Wake Flow. H. P. S. Virk and R. S. Azad, *University of Manitoba, Canada* (**30**, 4, p. 982) Article

J92-146 Helical-Perturbation Device for Cylinder-Wing Vortex Generators. Promode R. Bandyopadhyay, John E. Riester and Robert L. Ash, *NASA Langley Research Center* (**30**, 4, p. 988) Article based on AIAA Paper 90-1627

J92-147 Effect of Surface Deformation on Thermocapillary Bubble Migration. J. C. Chen and Y. T. Lee, *National Central University, Taiwan, ROC* (**30**, 4, p. 993) Article based on AIAA Paper 91-0312

J92-148 Calculation of Real-Gas Effects on Blunt-Body Trim Angles. Chul Park, *NASA Ames Research Center*; and Seokkwan Yoon, *MCAT Institute* (**30**, 4, p. 999) Article based on AIAA Paper 89-0685

J92-149 Modeling Supersonic Combustion Using a Fully Implicit Numerical Method. Gregory J. Wilson and Robert W. MacCormack, *Stanford University* (**30**, 4, p. 1008) Article based on AIAA Paper 90-2307

J92-150 Pressure Drop in Fully Developed, Turbulent, Liquid-Vapor Annular Flows in Zero Gravity. K. R. Sridhar, *University of Arizona*; B. T. Chao and S. L. Soo, *University of Illinois* (**30**, 4, p. 1016) Article

J92-151 Experimental Investigations of the Vortex Flow on Delta Wings at High Incidence. W. H. Stahl, *Deutsche Forshungsanstalt für Luft- und Raumfahrt, Germany*; M. Mahmood and A. Asghar, *King Fahd University of Petroleum and Minerals, Saudi Arabia* (**30**, 4, p. 1027) Article

J92-152 Semiconductor Laser Doppler Anemometer for Applications in Aerodynamic Research. Franz Durst, Reiner Müller and Amir A. Naqwi, *Fluid Mechanics Laboratory, University of Erlangen-Nuremberg, Germany* (**30**, 4, p. 1033) Article

J92-153 Force Measurement on Rotating, Ablating Models Using an Air Bearing Balance. C. W. Haldeman and A. D. Weinberg, *Massachusetts Institute of Technology, Lincoln Laboratory* (**30**, 4, p. 1039) Article based on AIAA Paper 90-1760

J92-154 Dynamic Condensation Method for Structural Eigenvalue Analysis. Luis E. Suarez, *University of Puerto Rico*; and Mahendra P. Singh, *Virginia Polytechnic Institute and State University* (**30**, 4, p. 1046) Article

J92-154 Influence of Geometric Nonlinearities on Skin-Stiffener Interface Stresses. D. Cohen, *Hercules Aerospace Company, Inc.*; and M. W. Hyer, *Virginia Polytechnic Institute and State University* (**30**, 4, p. 1055) Article based on AIAA Paper 88-2217 CP882

J92-155 Interlayer Shear Slip Theory for Cross-Ply Laminates with Nonrigid Interfaces. X. Lu and D. Liu, *Michigan State University* (**30**, 4, p. 1063) Article

J92-156 Strength Scaling in Fiber Composites. Sortiris Kellas and John Morton, *Virginia Polytechnic Institute and State University* (**30**, 4, p. 1074) Article based on AIAA Paper 91-1144 CP911

J92-157 Random Response of Symmetric Cross-Ply Composite Beams with Arbitrary Boundary Conditions. M. P. Singh and A. S. Abdelnaser, *Virginia Polytechnic Institute and State University* (**30**, 4, p. 1081) Article

J92-158 Three-Dimensional Axisymmetric Vibrations of Orthotropic and Cross-Ply Laminated Hollow Cylinders. Terry D. Hawkes and Kostas P. Soldatos, *University of Nottingham, England, UK* (**30**, 4, p. 1089) Article

J92-159 Continuum Design Sensitivity of Transient Responses Using Ritz and Mode Acceleration Methods. Semyung Wang and Kyung K. Choi, *University of Iowa* (**30**, 4, p. 1099) Article based on AIAA Paper 90-1137 CP902

J92-160 Nonlinear Postbuckling Analysis of Plates and Shells by Four-Noded Strain Element. George Z. Voyiadjis and Guangyu Shi, *Louisiana State University* (**30**, 4, p. 1110) Article

J92-161 High Aerodynamic Loads on an Airfoil Submerged in an Unsteady Stream. Ismet Gursul and Chih-Ming Ho, *University of Southern California* (**30**, 4, p. 1117) Technical Note

J92-162 Viscous Drag Reduction Using Streamwise-Aligned Riblets. P. Vukoslavčević, J. M. Wallace and J.-L. Balint, *University of Maryland* (**30**, 4, p. 1119) Technical Note

J92-163 Use of Finite Volume Schemes for Transition Simulation. Charles C. Fenno Jr., *North Carolina State University*; Craig L. Streett, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (**30**, 4, p. 1122) Technical Note based on AIAA Paper 91-0743

J92-164 Freestream Capturing for Moving Coordinates in Three Dimensions. Shigeru Obayashi, *NASA Ames Research Center* (**30**, 4, p. 1125) Technical Note

J92-165 Semi-Inverse Marching Characteristics Scheme for Supersonic Flows. Joseph Falcovitz and Allen E. Fuhs, *Naval Postgraduate School* (**30**, 4, p. 1128) Technical Note

J92-166 Cylinder-Induced Shock-Wave Boundary-Layer Interaction. Oktay Özcan and Bülent K. Yüceil, *Istanbul Technical University* (**30**, 4, p. 1130) Technical Note

J92-167 Reactive Control of an Unsteady Separating Flow. Robert E. Montividas, Mukund Acharya and Metwally H. Metwally, *Illinois Institute of Technology* (**30**, 4, p. 1133) Technical Note based on AIAA Paper 91-0041

J92-168 Frequency Analysis of Axially Loaded Structures. C. Sundararajan (**30**, 4, p. 1139) Technical Note

J92-169 Effect of Transverse Shear Deformation on Imperfection Sensitivity of Cylindrical Panels. Gerald A. Cohen, *Structures Research Associates* (**30**, 4, p. 1141) Technical Note

J92-173 Shock Wave Interaction with a Thermal Layer. D. Rayevsky, *New York University*; and G. Ben-Dor, *Ben-Gurion University, Israel* (**30**, 4, p. 1135) Technical Note

J92-174 Unsteady Flow Past an Airfoil Pitching at a Constant Rate. C. Shih, L. Lourenco, L. Van Dommelen and A. Krothapalli, *Florida A&M University and Florida State University* (**30**, 5, p. 1153) Article

J92-175 Multipoint Inverse Airfoil Design Method Based on Conformal Mapping. Michael S. Selig and Mark D. Maughmer, *Pennsylvania State University* (**30**, 5, p. 1162) Article based on AIAA Paper 91-0069

J92-176 Exploratory Design Studies of Actively Controlled Wings Using Integrated Multidisciplinary Synthesis. E. Livne, L. A. Schmit and P. P. Friedmann, *University of California, Los Angeles* (**30**, 5, p. 1171) Article based on AIAA Paper 90-0953 CP902
Errata (**30**, 7, p. 1936)

J92-177 Interaction of a Longitudinal Vortex with a Three-Dimensional, Turbulent Boundary Layer. T. Shizawa, *Science University of Tokyo, Japan*; and J. K. Eaton, *Stanford University* (**30**, 5, p. 1180) Synoptic

J92-178 Experimental Investigation of Supersonic Flow over Two Cavities in Tandem. Xin Zhang and John A. Edwards, *University of Cambridge, England, UK* (**30**, 5, p. 1182) Article based on AIAA Paper 90-3087 CP908

J92-179 Asymptotic Modal Analysis of a Rectangular Acoustic Cavity Excited by Wall Vibration. Linda F. Peretti and Earl H. Dowell, *Duke University* (**30**, 5, p. 1191) Article

J92-180 Study of Intensification Zones in a Rectangular Acoustic Cavity. Linda F. Peretti and Earl H. Dowell, *Duke University* (**30**, 5, p. 1199) Article

J92-181 Three-Dimensional Strip-Integral Method for Incompressible Turbulent Boundary Layers. Jean Caillé and Joseph A. Schetz, *Virginia Polytechnic Institute and State University* (**30**, 5, p. 1207) Article based on AIAA Paper 90-1579

J92-182 Evaluation of a Finite Volume Method for Compressible Shear Layers. H. L. Atkins, *NASA Langley Research Center* (**30**, 5, p. 1214) Article based on AIAA Paper 89-1809

J92-183 Accelerated Convergence to Steady State by Gradual Far-Field Damping. Smadar Karni, *University of Michigan* (**30**, 5, p. 1220) Article based on AIAA Paper 91-1604 CP914

J92-184 Locally Implicit Hybrid Algorithm for Steady and Unsteady Viscous Flows. C. J. Hwang and J. L. Liu, *National Cheng Kung University, Taiwan, ROC* (**30**, 5, p. 1228) Article

J92-185 Construction of Modified Third-Order Upwind Schemes for Stretched Meshes. Susumu Shirayama, *Institute of Computational Fluid Dynamics, Japan* (**30**, 5, p. 1237) Article based on AIAA Paper 91-0727

J92-186 Spatial Adaptation of Unstructured Meshes for Unsteady Aerodynamic Flow Computations. Russ D. Rausch, *Purdue University*; John T. Batina, *NASA Langley Research Center*; and Henry T. Y. Yang, *Purdue University* (**30**, 5, p. 1243) Article based on AIAA Paper 91-1106 CP911

J92-187 Asymptotic Defect Boundary-Layer Theory Applied to Hypersonic Flows. B. Aupoix, J. Ph. Brazier and J. Cousteix, *CERT/ONERA, France* (**30**, 5, p. 1252) Article based on AIAA Paper 91-0026

J92-188 Multifractal Analysis of a Lobed Mixer Flowfield Utilizing the Proper Orthogonal Decomposition. L. Ukeiley, M. Varghese, M. Glauser and D. Valentine, *Clarkson University* (**30**, 5, p. 1260) Article based on AIAA Paper 91-0521

J92-189 Second-Order, Far-Field Computational Boundary Conditions for Inviscid Duct Flow Problems. A. Verhoff and D. Stookesberry, *McDonnell Aircraft Company* (**30**, 5, p. 1268) Article based on AIAA Paper 91-0633

J92-190 Similarity in Supersonic Mixing Layers. Otto Zeman, *Stanford University* (**30**, 5, p. 1277) Article

J92-191 Compressible Turbulent Boundary Layers with Heat Addition by Homogeneous Condensation. Günter H. Schnerr and Rainer Bohning, *University (TH) of Karlsruhe, Germany*; Thomas Breitling, *Daimler-Benz AG, Germany*; and Hans-Arno Jantzen, *University (TH) of Karlsruhe, Germany* (**30**, 5, p. 1284) Article

J92-192 Numerical Simulation of Droplet Deformation in Convective Flows. Zheng-Tao Deng and San-Mou Jeng, *University of Tennessee Space Institute* (**30**, 5, p. 1290) Article based on AIAA Paper 90-2309

J92-193 Burning-Rate Enhancement of Organic Diazide Propellants: Dihalide Addition and Pressure Elevation. A. Lee, Y. J. Jiang, D. L. Zhu and C. K. Law, *Princeton University* (**30**, 5, p. 1298) Article

J92-194 Characteristic-Based Algorithms for Flows in Thermochemical Nonequilibrium. Robert W. Walters, Pasquale Cinnella and David C. Slack, *Virginia Polytechnic Institute and State University*; and David Halt, *McDonnell Douglas Corporation* (**30**, 5, p. 1304) Article based on AIAA Paper 90-0393

J92-195 Turbulent Flow Past a Backward-Facing Step: A Critical Evaluation of Two-Equation Models. S. Thangam and C. G. Speziale, *NASA Langley Research Center* (**30**, 5, p. 1314) Article
Errata (**30**, 10, p. 2576)

J92-196 High Alpha Aerodynamic Control by Tangential Fuselage Blowing. G. I. Font and D. A. Tavella, *Stanford University* (**30**, 5, p. 1321) Article based on AIAA Paper 91-0620

J92-197 Patterns of Vortex Shedding from an Oscillating Circular Cylinder. Keun-Shik Chang and Jong-Youb Sa, *Korea Advanced Institute of Science and Technology, Republic of Korea* (**30**, 5, p. 1331) Article

J92-198 Importance of Coatings to Optical Fiber Sensors Embedded in "Smart" Structures. Abhijit Dasgupta and James S. Sirkis, *University of Maryland* (**30**, 5, p. 1337) Article

J92-199 Inclusion Principle for the Rayleigh-Ritz Based Substructure Synthesis. Leonard Meirovitch and Moon K. Kwak, *Virginia Polytechnic Institute and State University* (**30**, 5, p. 1344) Article based on AIAA Paper 91-1058 CP911

J92-200 Postbuckling of Shear Deformable Composite Flat Panels Taking Into Account Geometrical Imperfections. L. Librescu, *Virginia Polytechnic Institute and State University*; and M. Stein, *NASA Langley Research Center* (**30**, 5, p. 1352) Article based on AIAA Paper 90-0967 CP902

J92-201 Free Vibrations of Delaminated Beams. M.-H. H. Shen, *Ohio State University*; and J. E. Grady, *NASA Lewis Research Center* (**30**, 5, p. 1361) Article based on AIAA Paper 91-1241 CP911

J92-202 Identification of Time-Varying Structural Dynamic Systems: An Artificial Intelligence Approach. B. J. Glass and S. Hanagud, *Georgia Institute of Technology* (**30**, 5, p. 1371) Article

J92-203 Nonlinear Damping Estimation from Rotor Stability Data Using Time and Frequency Domain Techniques. Frederick Tasker and Inderjit Chopra, *University of Maryland* (30, 5, p. 1383) Article based on AIAA Paper 89-1243 CP891

J92-204 Prediction and Measurement of Modal Damping Factors for Viscoelastic Space Structures. D. J. McTavish and P. C. Hughes, *University of Toronto, Canada*; Y. Soucy and W. B. Graham, *Canadian Space Agency* (30, 5, p. 1392) Article

J92-205 Statistical Distribution of Frequency Response in Disordered Periodic Structures. G. Q. Cai and Y. K. Lin, *Florida Atlantic University* (30, 5, p. 1400) Article

J92-206 Constructive Solid Geometry Approach to Three-Dimensional Structural Shape Optimization. Srinivas Kodiyalam, Virendra Kumar and Peter M. Finnigan, *General Electric Corporate Research & Development Center* (30, 5, p. 1408) Article based on AIAA Paper 91-1211 CP911

J92-207 Generation and Comparison of Globally Isotropic Space-Filling Truss Structures. Mark S. Lake, *NASA Langley Research Center*; and Eric C. Klang, *North Carolina State University* (30, 5, p. 1416) Article

J92-208 Fuzzy Goal Programming Approach for Structural Optimization. S. S. Rao, *Purdue University*; K. Sundararaju, B. G. Prakash and C. Balakrishna, *Aeronautical Development Agency, India* (30, 5, p. 1425) Article

J92-209 Two- and Three-Dimensional Grid Generation by an Algebraic Homotopy Procedure. Anutosh Moitra, *NASA Langley Research Center* (30, 5, p. 1433) Technical Note based on AIAA Paper 90-1603

J92-210 Efficiency of a Statistical Transport Model for Turbulent Particle Dispersion. Ron J. Litchford and San-Mou Jeng, *University of Tennessee Space Institute* (30, 5, p. 1434) Technical Note

J92-211 Cylindrical Bending of Unsymmetric Composite Laminates. Hsin-Piao Chen, *California State University at Long Beach*; and Jeffrey C. Shu, *The Aerospace Corporation* (30, 5, p. 1438) Technical Note based on AIAA Paper 91-0961 CP911

J92-212 Matrix Transformation Method for Updating Dynamic Model. De-Wen Zhang, *Beijing Institute of Structure and Environment, PRC*; and Lingmi Zhang, *Nanjing Aeronautical Institute, PRC* (30, 5, p. 1440) Technical Note

J92-213 Study of the Coupled Free Vibration of Helical Springs. W. Jiang, T. L. Wang and W. K. Jones, *Florida International University* (30, 5, p. 1443) Technical Note

J92-214 Collapse Characteristics of Cylindrical Composite Panels Under Axial Loads. S. A. Schimmels and A. N. Palazotto, *Air Force Institute of Technology, Wright-Patterson AFB* (30, 5, p. 1447) Technical Note

J92-215 Domain-Decomposition Algorithm Applied to Multi-element Airfoil Grids. Mark E. M. Stewart, *Princeton University* (30, 6, p. 1457) Article based on AIAA Paper 90-1606

J92-216 Measurements in a Leading-Edge Separation Bubble due to a Simulated Airfoil Ice Accretion. M. B. Bragg and A. Khodadoust, *University of Illinois at Urbana-Champaign*; and S. A. Spring, *CFD Research Corporation* (30, 6, p. 1462) Article

J92-217 Adequacy of Modeling Turbulence and Related Effects on Helicopter Response. V. V. George and G. H. Gaonkar, *Florida Atlantic University*; J. V. R. Prasad and D. P. Schrage, *Georgia Institute of Technology* (30, 6, p. 1468) Article

J92-218 Hypersonic Shock-Wave/Turbulent-Boundary-Layer Interaction Flows. C. C. Horstmann, *NASA Ames Research Center* (30, 6, p. 1480) Synoptic based on AIAA Paper 91-1760

J92-219 Modern Developments in Shear Flow Control with Swirl. S. Farokhi and R. Taghavi, *University of Kansas*; and E. J. Rice, *NASA Lewis Research Center* (30, 6, p. 1482) Synoptic

J92-220 Acoustic Sources in a Tripped Flow past a Resonator Tube. M. C. Thompson, K. Hourigan and M. C. Welsh, *Commonwealth Scientific and Industrial Research Organisation, Australia*; and E. Brocher, *Université d'Aix-Marseille, France* (30, 6, p. 1484) Article

J92-221 Effect of Acoustic Excitation on Stalled Flows over an Airfoil. K. B. M. Q. Zaman, *NASA Lewis Research Center* (30, 6, p. 1492) Article based on AIAA Paper 90-4009

J92-222 Renormalization Group Based Algebraic Turbulence Model for Three-Dimensional Turbomachinery Flows. K. R. Kirtley, *Sverdrup Technology, Inc., Lewis Research Center Group* (30, 6, p. 1500) Article based on AIAA Paper 91-0172

J92-223 Newton's Method Solver for the Axisymmetric Navier-Stokes Equations. Paul D. Orkwis and D. Scott McRae, *North Carolina State University* (30, 6, p. 1507) Article based on AIAA Paper 91-1554 CP914

J92-224 Strength of Laminated Composites with Internal Discontinuities Parallel to the Applied Load. Anthony J. Vizzini, *University of Maryland* (30, 6, p. 1515) Article based on AIAA Paper 90-1065 CP902

J92-225 Navier-Stokes Simulation for Cone-Derived Waverider. Jiun-Rong Liao and Kakkattukuzhy M. Isaac, *University of Missouri—Rolla*; John B. Miles and Bor-Jang Tsai, *University of Missouri—Columbia* (30, 6, p. 1521) Article

J92-226 Predictions of Turbulent Mixing in Axisymmetric Compressible Shear Layers. K. Viswanathan and P. J. Morris, *Pennsylvania State University* (30, 6, p. 1529) Article

J92-227 Effects of Gas Density on the Structure of Liquid Jets in Still Gases. L.-K. Tseng, G. A. Ruff and G. M. Faeth, *University of Michigan* (30, 6, p. 1537) Article

J92-228 Spatial Instability of a Swirling Jet—Theory and Experiment. C. Wu and S. Farokhi, *University of Kansas*; and R. Taghavi, *Sverdrup Technology, Inc.* (30, 6, p. 1545) Article based on AIAA Paper 91-1771

J92-229 Second-Order Modeling of Boundary-Free Turbulent Shear Flows. T.-H. Shih, *NASA Lewis Research Center*; J.-Y. Chen, *University of California, Berkeley*; and J. L. Lumley, *Cornell University* (30, 6, p. 1553) Article

J92-230 Computation of Saddle Point of Attachment. Ching-Mao Hung, *NASA Ames Research Center*; Chao-Ho Sung, *David Taylor Research Center*; and Chung-Lung Chen, *Rockwell International Science Center* (30, 6, p. 1561) Article based on AIAA Paper 91-1713

J92-231 High-Resolution, Nonoscillatory Schemes for Unsteady Compressible Flows. J. Y. Yang and C. A. Hsu, *National Taiwan University, ROC* (30, 6, p. 1570) Article

J92-232 Symmetry Breaking in Vortex Flows on Conical Bodies. M. V. Lowson and A. J. C. Ponton, *University of Bristol, England, UK* (30, 6, p. 1576) Article based on AIAA Paper 91-0276

J92-233 Effect of Tunnel Walls on Vortex Breakdown Location over Delta Wings. Zvi Weinberg, *Pennsylvania State University* (**30**, 6, p. 1584) Article

J92-234 Impact Response of Orthotropic Composite Plates Predicted from a One-Parameter Differential Equation. Robin Olsson, *FFA, Aeronautical Research Institute of Sweden* (**30**, 6, p. 1587) Article

J92-235 Equilibrated Moisture Content of Several Carbon Phenolic Composites. E. H. Stokes, *Southern Research Institute* (**30**, 6, p. 1597) Article based on AIAA Paper 91-0928 CP911

J92-236 Interlaminar Fracture Characteristics of Bonding Concepts for Thermoplastic Primary Structures. John C. Fish, Marcia L. Vitlip and Stephen P. Chen, *McDonnell Douglas Helicopter Company*; and Kwang S. Shin, *Arizona State University* (**30**, 6, p. 1602) Article

J92-237 Improvement of Normalization Methods for Eigenvector Derivatives. M. S. Eldred, *University of Michigan*; P. B. Lerner, *University of Tennessee*; and W. J. Anderson, *University of Michigan* (**30**, 6, p. 1609) Article

J92-238 Axially Symmetric Pulse Propagation in Semi-Infinite Hollow Cylinders. T. Kohl and S. K. Datta, *University of Colorado*; and A. H. Shah, *University of Manitoba, Canada* (**30**, 6, p. 1617) Article

J92-239 Finite Element/Penalty Function Method for Computing Stresses near Debonds. Joseph P. Fuehne, *Cooper Oil Tool Division*; and John J. Engblom, *Florida Institute of Technology* (**30**, 6, p. 1625) Article based on AIAA Paper 91-1203 CP911

J92-240 Approximate Reanalysis Based on the Exact Analytic Expressions. Moshe B. Fuchs and Gilad Maslovitz, *Tel-Aviv University, Israel* (**30**, 6, p. 1632) Article

J92-241 Structural Shape Sensitivity Analysis: Relationship Between Material Derivative and Control Volume Approaches. Jasbir S. Arora, Tae Hee Lee and J. B. Cardoso, *University of Iowa* (**30**, 6, p. 1638) Article based on AIAA Paper 91-1214 CP911

J92-242 Stability Characteristics of Laminated Cylindrical Panels Under Transverse Loading. A. N. Palazotto, L. S. Chien and W. W. Taylor, *Air Force Institute of Technology, Wright-Patterson AFB* (**30**, 6, p. 1649) Article

J92-243 Extrapolation Procedures for the Time-Dependent Navier-Stokes Equations. Jan Nordström, *FFA, Aeronautical Research Institute of Sweden* (**30**, 6, p. 1654) Technical Note based on AIAA Paper 91-0605 CP914

J92-244 Influence of Freestream Values on k-ω Turbulence Model Predictions. F. R. Menter, *Eloret Institute* (**30**, 6, p. 1657) Technical Note

J92-245 Stability of Plane Nonorthogonal Stagnation Flow. J. M. Floryan, *University of Western Ontario, Canada* (**30**, 6, p. 1659) Technical Note

J92-246 Method for Visualizing Streamlines Around Hypersonic Vehicles by Using Electrical Discharge. Masatomi Nishio, *Fukuyama University, Japan* (**30**, 6, p. 1662) Technical Note

J92-247 Simple Method for Determining the Laser-Velocimeter Focal Point with the Aid of a Hot-Wire Anemometer. Shohei Takagi, *National Aerospace Laboratory, Japan* (**30**, 6, p. 1664) Technical Note

J92-248 New High Reynolds Number Mach 8 Capability. Eric R. Hedlund, Craig W. Higgins, Charles S. Rozanski, Nancy F. Swinford and John A. Hill, *Naval Surface Warfare Center* (**30**, 6, p. 1665) Technical Note based on AIAA Paper 90-1379

J92-249 Optimum Design of a Composite Structure with Three Types of Manufacturing Constraints. Bo Ping Wang and Daniel P. Costin, *University of Texas at Arlington* (**30**, 6, p. 1667) Technical Note based on AIAA Paper 91-1133 CP911

J92-250 Composite Laminated Shells Under Internal Pressure. F. G. Yuan, *North Carolina State University* (**30**, 6, p. 1669) Technical Note

J92-253 Calculation of Potential Flow Around Airfoils Using a Discrete Vortex Method. George Giannakidis, *Imperial College of Science, Technology, and Medicine, England, UK* (**30**, 7, p. 1689) Synoptic

J92-254 Nonuniform Motion of Leading-Edge Vortex Breakdown on Ramp Pitching Delta Wings. J. J. Miau, R. C. Chang and J. H. Chou, *National Cheng-Kung University, Taiwan, ROC*; and C. K. Lin, *Chung-Shan Institute of Science and Technoloyg, Taiwan, ROC* (**30**, 7, p. 1691) Article

J92-255 Aerodynamic Characteristics of Hoar Frost Roughness. R. J. Kind and M. A. Lawrysyn, *Carleton University, Canada* (**30**, 7, p. 1703) Article based on AIAA Paper 91-0686

J92-256 Eigenfunction Analysis of Turbulent Mixing Phenomena. M. Winter and T. J. Barber, *United Technologies Research Center*; R. M. Everson and L. Sirovich, *Brown University* (**30**, 7, p. 1681) Article based on AIAA Paper 91-0520

J92-257 Standing Acoustic Waves in a Low Mach Number Shear Flow. Meng Wang and David R. Kassoy, *University of Colorado* (**30**, 7, p. 1708) Article

J92-258 High-Speed Propeller Noise Prediction—A Multidisciplinary Approach. Mark H. Dunn, *Lockheed Engineering & Sciences Company*; and F. Farassat, *NASA Langley Research Center* (**30**, 7, p. 1716) Article based on AIAA Paper 90-3934

J92-259 Two-Step Method for Evolving Nonlinear Acoustic Systems to a Steady State. Willie R. Watson, *NASA Langley Research Center*; and Michael K. Myers, *George Washington University* (**30**, 7, p. 1724) Article based on AIAA Paper 90-3946

J92-260 Effect of a Bulge on the Subharmonic Instability of Subsonic Boundary Layers. J. A. Masad and A. H. Nayfeh, *Virginia Polytechnic Institute and State University* (**30**, 7, p. 1731) Article

J92-261 Study of Turbulence on Supersonic Compression Surfaces Using Reynolds Stress Model. J. Lee and D. B. Taulbee, *State University of New York at Buffalo*; and M. S. Holden, *Calspan-University at Buffalo Research Center* (**30**, 7, p. 1738) Article based on AIAA Paper 90-1592

J92-262 Relationship Between Instability Waves and Noise of High-Speed Jets. Christopher K. W. Tam and Ping Chen, *Florida State University*; and J. M. Seiner, *NASA Langley Research Center* (**30**, 7, p. 1747) Article based on AIAA Paper 91-0492

J92-263 Three-Dimensional Unstructured Multigrid for the Euler Equations. D. J. Mavriplis, *NASA Langley Research Center* (**30**, 7, p. 1753) Article based on AIAA Paper 91-1549 CP914

J92-264 Bending of Tapered Anisotropic Sandwich Plates with Arbitrary Edge Conditions. J. S. Jeon and C. S. Hong, *Korea Advanced Institute of Science and Technology* (**30**, 7, p. 1762) Article

J92-265 Improved Method for Solving the Viscous Shock Layer Equations. Rachel Gordon, *Texas A&M University*; and R. Thomas Davis, *University of Cincinnati* (**30**, 7, p. 1770) Article

J92-266 Viscous High-Speed Flow Computations by Adaptive Mesh Embedding Techniques. F. Grasso, M. Marini and M. Passalacqua, *Università di Roma 'La Sapienza,' Italy* (**30**, 7, p. 1780) Article based on AIAA Paper 91-0149

J92-267 Aerothermodynamics of a 1.6-Meter-Diameter Sphere in Hypersonic Rarefied Flow. V. K. Dogra, *Vigyan Research Associates, Inc.*; R. G. Wilmoth and J. N. Moss, *NASA Langley Research Center* (**30**, 7, p. 1789) Article based on AIAA Paper 91-0773

J92-268 Experimental Tests of a Laminar Mixing Theory. Anthony Demetriades and Frederick L. Yapuncich, *Montana State University* (**30**, 7, p. 1795) Article

J92-269 Numerical Study of Juncture Flows. Chung-Lung Chen, *Rockwell International Science Center*; and Ching-Mao Hung, *NASA Ames Research Center* (**30**, 7, p. 1800) Article based on AIAA Paper 91-1660

J92-270 Study of Separated Shear Layer in Moderate Reynolds Number Plane Sudden Expansion Flows. M. Volkan Otugen and George Muckenthaler, *Polytechnic University* (**30**, 7, p. 1808) Article

J92-271 Nature of Buoyancy-Driven Flows in a Reduced-Gravity Environment. Siavash A. Kassemi, *NASA Lewis Research Center*; and Simon Ostrach, *Case Western Reserve University* (**30**, 7, p. 1815) Article

J92-272 Streamlines, Vorticity Lines, and Vortices Around Three-Dimensional Bodies. Leslie A. Yats, *Eloret Institute*; and Gary T. Chapman, *University of California at Berkeley* (**30**, 7, p. 1819) Article based on AIAA Paper 91-0731

J92-273 Impact Response of Graphite/Epoxy Cylindrical Panels. A. Palazotto and R. Perry, *Air Force Institute of Technology, Wright-Patterson AFB*; and R. Sandhu, *Wright Laboratory, Wright-Patterson AFB* (**30**, 7, p. 1827) Article based on AIAA Paper 91-1078 CP911

J92-274 Efficient Stress Solutions at Skin Stiffener Interfaces of Composites Stiffened Panels. Christos Kassapoglou and Albert J. DiNicola, *Sikorsky Aircraft* (**30**, 7, p. 1833) Article based on AIAA Paper 91-1199 CP911

J92-275 Reduced Basis Technique for Calculating Sensitivity Coefficients of Nonlinear Structural Response. Ahmed K. Noor and Jeanne M. Peters, *NASA Langley Research Center* (**30**, 7, p. 1840) Article

J92-276 Eigenstructure Assignment Approach for Structural Damage Detection. David C. Zimmerman and Mohamed Kaouk, *University of Florida* (**30**, 7, p. 1848) Article

J92-277 Characterization of Damping of Materials and Structures from Nanostrain Levels to One Thousand Microstrain. J. M. Ting, *Advanced Composites Laboratories*; and E. F. Crawley, *Massachusetts Institute of Technology* (**30**, 7, p. 1856) Article based on AIAA Paper 91-1125 CP911

J92-278 Validation of Finite Difference Boundary Condition Models for Solid Mechanics Applications. J. O. Dow and J. L. Hardaway, *University of Colorado* (**30**, 7, p. 1864) Article

J92-279 Higher Order Eigenpair Perturbations. M. S. Eldred, *University of Michigan*; P. B. Lerner, *Los Alamos National Laboratory*; and W. J. Anderson, *University of Michigan* (**30**, 7, p. 1870) Article

J92-280 Sparse Approach to Simultaneous Analysis and Design of Geometrically Nonlinear Structures. Carlos E. Orozco and Omar N. Ghattas, *Carnegie Mellon University* (**30**, 7, p. 1877) Article based on AIAA Paper 91-1093 CP911

J92-281 Frequency Modification Using Newton's Method and Inverse Iteration Eigenvector Updating. Malcolm J. Smith and Stanley G. Hutton, *University of British Columbia, Canada* (**30**, 7, p. 1886) Article

J92-281 Control Design Variable Linking for Optimization of Structural/Control Systems. Ik Min Jin and Lucien A. Schmit, *University of California, Los Angeles* (**30**, 7, p. 1892) Article based on AIAA Paper 91-1157 CP911

J92-283 Buckling and Postbuckling of Delaminated Composite Sandwich Beams. Chyanbin Hwu and Jian Shiun Hu, *National Cheng Kung University, Taiwan, ROC* (**30**, 7, p. 1901) Article

J92-284 Reynolds Number Dependence of the Freestream Turbulence Effects on Turbulent Boundary Layers. Promode R. Bandyopadhyay, *NASA Langley Research Center* (**30**, 7, p. 1910) Technical Note

J92-285 Analysis of Damping in Composite Laminates. R. Maaskant and J. S. Hansen, *University of Toronto, Canada* (**30**, 7, p. 1912) Technical Note

J92-286 Separated High Enthalpy Dissociated Laminar Hypersonic Flow Behind a Step—Pressure Measurements. S. L. Gai, *University of New South Wales, Australia* (**30**, 7, p. 1915) Technical Note

J92-287 New Method of Swirl Control in a Diffusing S-Duct. P. F. Weng and R. W. Guo, *Nanjing Aeronautical Institute, PRC* (**30**, 7, p. 1918) Technical Note

J92-288 Breakup of a Liquid Jet in Supersonic Crossflow. H.-S. Li and A. R. Karagozian, *University of California, Los Angeles* (**30**, 7, p. 1919) Technical Note based on AIAA Paper 91-0689

J92-289 Exact Solutions for Hydromagnetic Flow of a Particulate Suspension. Ali J. Chamkha, *Tennessee Technological University* (**30**, 7, p. 1922) Technical Note

J92-290 Vibration Mode Shape Control by Prestressing. Jan Holnicki-Szulc, *Polish Academy of Sciences, Poland*; and Raphael T. Haftka, *Virginia Polytechnic Institute and State University* (**30**, 7, p. 1924) Technical Note

J92-291 Partial Hybrid Strip Model for Higher-Order Laminated Plate Theory. Yi-Ping Tseng and Wei-Jer Wang, *Tamkang University, Taiwan, ROC* (**30**, 7, p. 1927) Technical Note

J92-292 Approximate Vibrational Analysis of Noncircular Cylinders Having Varying Thickness. V. Kumar and A. V. Singh, *University of Western Ontario, Canada* (**30**, 7, p. 1929) Technical Note

J92-293 Three-Dimensional Shape Optimization Using Fully Automatic Mesh Generation. M. E. Botkin, *General Motors Research Laboratories* (**30**, 7, p. 1932) Technical Note

J92-297 Interaction Between Crossing Oblique Shocks and a Turbulent Boundary Layer. N. Narayanswami and D. Knight, *Rutgers University*; S. M. Bogdonoff, *Princeton University*; and C. C. Horstman, *NASA Ames Research Center* (**30**, 8, p. 1945) Article based on AIAA Paper 91-0649

J92-298 Simplified Linear Stability Transition Prediction Method for Separated Boundary Layers. Paolo Dini, *Carleton College*; Michael S. Selig and Mark D. Maughmer, *Pennsylvania State University* (**30**, 8, p. 1953) Article based on AIAA Paper 91-3285 CP918

J92-299 Sensitivity Analysis of Discrete Periodic Systems with Applications to Helicopter Rotor Dynamics. Yi Lu and V. R. Murthy, *Syracuse University* (**30**, 8, p. 1962) Article

J92-300 Flow Separation in Vicinity of a Moving Boundary. Bashar S. AbulNour, *University of Wyoming* (**30**, 8, p. 1970) Synoptic based on AIAA Paper 90-3047 CP908

J92-301 Numerical Method for Predicting Transition in Three-Dimensional Flows by Spatial Amplification Theory. Tuncer Cebeci and Hsun H. Chen, *California State University, Long Beach* (**30**, 8, p. 1972) Article based on AIAA Paper 91-1606

J92-302 Temporal Adaptive Euler/Navier-Stokes Algorithm Involving Unstructured Dynamic Meshes. W. L. Kleb and J. T. Batina, *NASA Langley Research Center*; and M. H. Williams, *Purdue University* (**30**, 8, p. 1980) Article based on AIAA Paper 90-1650

J92-303 Adaptive Remeshing for Viscous Incompressible Flows. Jean-François Hétu and Dominique H. Pelletier, *Ecole Polytechnique de Montréal, Canada* (**30**, 8, p. 1986) Article based on AIAA Paper 90-1604

J92-304 Compact Higher Order Characteristic-Based Euler Solver for Unstructured Grids. D. W. Halt and R. K. Agarwal, *McDonnell Douglas Research Laboratories* (**30**, 8, p. 1993) Article based on AIAA Paper 91-3234 CP918

J92-305 Joint Computational/Experimental Aerodynamics Research on a Hypersonic Vehicle, Part 1: Experimental Results. William L. Oberkampf and Daniel P. Aeschliman, *Sandia National Laboratories* (**30**, 8, p. 2000) Article based on AIAA Paper 91-0298

J92-306 Joint Computational/Experimental Aerodynamics Research on a Hypersonic Vehicle, Part 2: Computational Results. Mary McWherter Walker and William L. Oberkampf, *Sandia National Laboratories* (**30**, 8, p. 2010) Article based on AIAA Paper 91-0321

J92-307 Hypersonic Rarefied Flow About a Delta Wing—Direct Simulation and Comparison with Experiment. M. Cevdet Celenligil, *Vigyan Research Associates, Inc.*; and James N. Moss, *NASA Langley Research Center* (**30**, 8, p. 2017) Article based on AIAA Paper 91-1315

J92-308 Explicit Runge-Kutta Method for Three-Dimensional Internal Incompressible Flows. H. Cabuk, *Columbia University*; C.-H. Sung, *David Taylor Research Center*; and V. Modi, *Columbia University* (**30**, 8, p. 2024) Article

J92-309 Parallel Computing Strategies for Block Multigrid Implicit Solution of the Euler Equations. Yoram Yadlin and David A. Caughey, *Cornell University* (**30**, 8, p. 2032) Article

J92-310 Two-Stream, Supersonic, Wake Flowfield Behind a Thick Base, Part I: General Features. V. A. Amatucci, *Sandia National Laboratories*; J. C. Dutton, *University of Illinois at Urbana-Champaign*; D. W. Kuntz, *Sandia National Laboratories*; and A. L. Addy, *University of Illinois at Urbana-Champaign* (**30**, 8, p. 2039) Article based on AIAA Paper 90-0707

J92-311 Gas-Particle Nonequilibrium Nozzle Flows: Concept of Virtual Speed of Sound and Similar Solutions. R. K. Thulasiram and N. M. Reddy, *Indian Institute of Science* (**30**, 8, p. 2047) Article

J92-312 Computation of Turbulent, Separated, Unswept Compression Ramp Interactions. T. A. Marshall and D. S. Dolling, *University of Texas at Austin* (**30**, 8, p. 2056) Article

J92-313 Performance of Popular Turbulence Models for Attached and Separated Adverse Pressure Gradient Flows. F. R. Menter, *Eloret Institute* (**30**, 8, p. 2066) Article based on AIAA Paper 91-1784

J92-314 Multiple Shock-Shock Interference on a Cylindrical Leading Edge. Allan R. Wieting, *NASA Langley Research Center* (**30**, 8, p. 2073) Article based on AIAA Paper 91-1800

J92-315 Effect of Model Cooling on Periodic Transonic Flow. S. Raghunathan and F. Zarifi-Rad, *Queen's University, Ireland, UK*; and D. G. Mabey, *Royal Aerospace Establishment, England, UK* (**30**, 8, p. 2080) Article based on AIAA Paper 91-1714

J92-316 Experimental Investigation of the Parallel Vortex-Airfoil Interaction at Transonic Speeds. Iraj M. Kalkhoran, *Polytechnic University*; and Donald R. Wilson, *University of Texas at Arlington* (**30**, 8, p. 2087) Article based on AIAA Paper 89-1833

J92-317 Görtler Instability and Supersonic Quiet Nozzle Design. Fang-Jenq Chen, *NASA Langley Research Center*; Mujeeb R. Malik, *High Technology Corporation*; and Ivan E. Beckwith, *George Washington University* (**30**, 8, p. 2093) Synoptic based on AIAA Paper 90-1592

J92-318 Measurement of Shock-Wave/Boundary-Layer Interaction in a Free-Piston Shock Tunnel. C. H. B. Stacey and J. M. Simmons, *University of Queensland, Australia* (**30**, 8, p. 2095) Article based on AIAA Paper 89-0457

J92-319 Scaling Effects in the Flexural Response and Failure of Composite Beams. Karen E. Jackson, *NASA Langley Research Center* (**30**, 8, p. 2099) Article based on AIAA Paper 91-1025 CP911

J92-320 Postbuckling Response and Failure Prediction of Graphite-Epoxy Plates Loaded in Compression. S. P. Engelstad and J. N. Reddy, *Virginia Polytechnic Institute and State University*; and N. F. Knight Jr., *Clemson University* (**30**, 8, p. 2106) Article based on AIAA Paper 91-0910 CP911

J92-321 Accelerated Subspace Iteration for Eigenvector Derivatives. T. Ting, *University of Bridgeport* (**30**, 8, p. 2114) Article based on AIAA Paper 91-1055 CP911

J92-322 Thin Film Modeling of Delamination Buckling in Pressure Loaded Laminated Cylindrical Shells. G. A. Kardomateas and C. B. Chung, *Georgia Institute of Technology* (**30**, 8, p. 2119) Article
Errata (**30**, 9, p. 2362)

J92-323 Control-Structure Integrated Design. Achille Messac, *Charles Stark Draper Laboratory, Inc.*; and Kamal Malek, *Massachusetts Institute of Technology* (**30**, 8, p. 2124) Article

J92-324 Stacking Sequence Optimization of Simply Supported Laminates with Stability and Strain Constraints. S. Nagendra, R. T. Haftka and Z. Gürdal, *Virginia Polytechnic Institute and State University* (**30**, 8, p. 2132) Article based on AIAA Paper 92-2310 CP922
Errata (**30**, 9, p. 2362)

J92-325 Eigenvalue Sensitivity Analysis of Planar Frames with Variable Joint and Support Locations. Ching H. Chuang and Gene J.-W. Hou, *Old Dominion University* (**30**, 8, p. 2138) Article based on AIAA Paper 91-1091 CP911

J92-326 Layer-Wise Shell Theory for Postbuckling of Laminated Circular Cylindrical Shells. J. N. Reddy and M. Savoia, *Virginia Polytechnic Institute and State University* (**30**, 8, p. 2148) Article

J92-327 Drag Reduction in Accelerating Flow. Ge Gao and W. L. Chow, *Florida Atlantic University* (**30**, 8, p. 2155) Technical Note

J92-328 Outflow Boundary Conditions Using Duhamel's Equation. David Nixon, *Nielsen Engineering & Research, Inc.* (**30**, 8, p. 2156) Technical Note based on AIAA Paper 90-3014 CP908

J92-329 Alternating Direction Implicit Methods for the Navier-Stokes Equations. T. L. Tysinger and D. A. Caughey, *Cornell University* (**30**, 8, p. 2158) Technical Note based on AIAA Paper 91-0242

J92-330 Modified k-ϵ Model for Compressible Free Shear Flows. C. P. Brescianini, *University of Queensland, Australia* (**30**, 8, p. 2161) Technical Note

J92-331 Taylor Series Approximation of Geometric Shape Variation for the Euler Equations. Arthur C. Taylor III, Vamshi Mohan Korivi and Gene W. Hou, *Old Dominion University* (**30**, 8, p. 2163) Technical Note

J92-332 Effect of Velocity Ratio on Bluffbody Flow Dynamics. Ahmed F. Ghoniem and Luis-Filipe Martins, *Massachusetts Institute of Technology* (**30**, 8, p. 2166) Technical Note based on AIAA Paper 91-0580

J92-333 Viscous Eddies over a Grooved Surface Computed by a Gaussian-Integration Galerkin Boundary-Element Method. P. Luchini, F. Manzo and A. Pozzi, *University of Naples, Italy* (**30**, 8, p. 2168) Technical Note

J92-334 Effects of a Leading-Edge Fillet on the Flow Past an Appendage-Body Junction. William J. Devenport, Roger L. Simpson, Michael B. Dewitz and Naval K. Agarwal, *Virginia Polytechnic Institute and State University* (**30**, 9, p. 2177) Article based on AIAA Paper 91-0252

J92-335 Low Upper Implicit Total Variation Diminishing Solution of Viscous Hypersonic Flows. F. Grasso and M. Marini, *University of Rome 'La Sapienza,' Italy* (**30**, 9, p. 2184) Synoptic based on AIAA Paper 91-1573 CP914

J92-336 Effect of Wing Tip Vortices on a Trailing Aircraft. Ibrahim Olwi and Mohammad Ghazi, *King Abdulaziz University, Saudi Arabia* (**30**, 9, p. 2186) Synoptic based on AIAA Paper 91-3309 CP918

J92-337 Exploratory Study of Wall Pressure Fluctuations in a Mach 5, Sharp Fin-Induced Turbulent Interaction. Berry T. Gibson and David S. Dolling, *University of Texas at Austin* (**30**, 9, p. 2188) Article based on AIAA Paper 91-0646

J92-338 Stretching of Freestream Turbulence in the Stagnation Region. Chin Yi Wei and Jiun Jih Miau, *National Cheng Kung University, Taiwan, ROC* (**30**, 9, p. 2196) Article

J92-339 Effect of Pressure Gradient on the Stability of Compressible Boundary Layers. Y. H. Zurigat, A. H. Nayfeh and J. A. Masad, *Virginia Polytechnic Institute and State University* (**30**, 9, p. 2204) Article based on AIAA Paper 90-1451

J92-340 Crossflow Vortex and Transition Measurements by Use of Multielement Hot Films. Naval K. Agarwal, *Analytical Services and Materials, Inc.*; Dal V. Maddalon, *NASA Langley Research Center*; Siva M. Mangalam, *Analytical Services and Materials, Inc.*; and Fayette S. Collier Jr., *NASA Langley Research Center* (**30**, 9, p. 2212) Article based on AIAA Paper 91-0166

J92-341 Characteristic-Based, Rotated Upwind Scheme for the Euler Equations. Andrea Dadone, *Politecnico di Bari, Italy*; and Bernard Grossman, *Virginia Polytechnic Institute and State University* (**30**, 9, p. 2219) Article

J92-342 Application of a Solution Adaptive Grid Scheme to Complex Three-Dimensional Flows. Carol B. Davies, *Sterling Software*; and Ethiraj Venkatapathy, *Eloret Institute* (**30**, 9, p. 2227) Article based on AIAA Paper 91-1594 CP914

J92-343 Mixing Studies of Helium in Air at High Supersonic Speeds. E. J. Fuller, R. B. Mays, R. H. Thomas and J. A. Schetz, *Virginia Polytechnic Institute and State University* (**30**, 9, p. 2234) Article based on AIAA Paper 91-2268

J92-344 Experiments on the Structure of an Annular Compressible Reacting Shear Layer. R. S. Barlow, *Sandia National Laboratories*; D. C. Fourguette, *California Institute of Technology*; M. G. Mungal, *Stanford University*; and R. W. Dibble, *University of California, Berkeley* (**30**, 9, p. 2244) Article based on AIAA Paper 91-0376

J92-345 Physical Model of the Swept Shock Wave/Boundary-Layer Interaction Flowfield. F. S. Alvi and G. S. Settles, *Pennsylvania State University* (**30**, 9, p. 2252) Article

J92-346 Fourier Functional Analysis for Unsteady Aerodynamic Modeling. Suei Chin and C. Edward Lan, *University of Kansas* (**30**, 9, p. 2259) Article based on AIAA Paper 91-2867 CP916

J92-347 Asymmetric Turbulent Vortical Flows over Slender Bodies. David Degani, *Technion—Israel Institute of Technology*; and Yuval Levy, *NASA Ames Research Center* (**30**, 9, p. 2267) Article based on AIAA Paper 91-3296 CP918

J92-348 Helicopter Rotor Blade Aeroelasticity in Forward Flight with an Implicit Structural Formulation. Roberto Celi, *University of Maryland* (**30**, 9, p. 2274) Article based on AIAA Paper 91-1219 CP911

J92-349 Accuracy of Critical-Temperature Sensitivity Coefficients Predicted by Multilayered Composite Plate Theories. Ahmed K. Noor and Scott Burton, *NASA Langley Research Center* (**30**, 9, p. 2283) Article

J92-350 Vibration of Spinning Ring-Stiffened Thin Cylindrical Shells. Shyh-Chin Huang and Bih-Sheng Hsu, *National Taiwan Institute of Technology, Taiwan, ROC* (**30**, 9, p. 2291) Article

J92-351 Selection of Noisy Measurement Locations for Error Reduction in Static Parameter Identification. Masoud Sanayei, Oladipo Onipede and Suresh R. Babu, *Tufts University* (**30**, 9, p. 2299) Article

J92-352 Damage Detection in Elastic Structures Using Vibratory Residual Forces and Weighted Sensitivity. J. M. Ricles and J. B. Kosmatka, *University of California, San Diego* (**30**, 9, p. 2310) Article

J92-353 Eigenvalue and Eigenvector Approximate Analysis for Repeated Eigenvalue Problems. Gene J. W. Hou and Sean P. Kenny, *Old Dominion University* (**30**, 9, p. 2317) Article based on AIAA Paper 91-1089 CP911

J92-354 Nonlinear Instability of Corrugated Diaphragms. Kaiyuan Yeh, *University of Toronto, Canada*; Wei-ping Song, *Lanzhou University, PRC*; and F. P. J. Rimrott, *University of Toronto, Canada* (**30**, 9, p. 2325) Article

J92-355 Three-Dimensional Wings and Waveriders with Attached Shock Waves. Hamdi T. Hemdan, *King Saud University, Saudi Arabia* (**30**, 9, p. 2332) Technical Note

J92-356 Direct Frequency Domain Calculation of Open Rotor Noise. Donald B. Hanson, *United Technologies Corporation* (**30**, 9, p. 2334) Technical Note

J92-357 Advanced Propeller Noise Prediction in the Time Domain. F. Farassat, *NASA Langley Research Center*; M. H. Dunn and P. L. Spence, *Lockheed Engineering & Sciences Company* (**30**, 9, p. 2337) Technical Note

J92-358 Comparison of Transonic Flow Models. Kevin McGrattan, *New York University* (**30**, 9, p. 2340) Technical Note

J92-359 High-Velocity Measurements via Laser Doppler Anemometer Using Single- and Multiaxial-Mode Lasers. J.-A. Wang and C. L. Dancey, *Virginia Polytechnic Institute and State University* (**30**, 9, p. 2343) Technical Note

J92-360 Induced Drag of a Wing in a Circular Wind Tunnel. Yuzo Yamamoto, *Gifu National College of Technology, Japan* (**30**, 9, p. 2344) Technical Note

J92-361 Qualitative Model for Visualizing Shock Shapes. Masatomi Nishio, *Fukuyama University, Japan* (**30**, 9, p. 2346) Technical Note

J92-362 Decoupling Approximation of Nonclassically Damped Structures. Steven Park, Ilwhan Park and Fai Ma, *University of California, Berkeley* (**30**, 9, p. 2348) Technical Note

J92-363 Free Vibration Analysis of Rectangular Plates with Free Edges and Line Support Along Diagonals. Nong Li and D. J. Gorman, *University of Ottawa, Canada* (**30**, 9, p. 2351) Technical Note

J92-364 Vibration and Buckling of Laminated Plates with a Cutout in Hygrothermal Environment. K. S. Sai Ram and P. K. Sinha, *Indian Institute of Technology* (**30**, 9, p. 2353) Technical Note

J92-365 Torsional Stiffness for Circular Orthotropic Beams. S. Dubigeon, *Ecole Centrale de Nantes, France* (**30**, 9, p. 2355) Technical Note

J92-366 Optimal Shape Design of Lattice Structures for Accuracy. Hiroshi Furuya, *Nagoya University, Japan* (**30**, 9, p. 2357) Technical Note

J92-367 Displacement Approximations for Optimization of Beams Defined in Nonprincipal Coordinate Systems. P. A. Fenyes and R. V. Lust, *General Motors Research Laboratories* (**30**, 9, p. 2359) Technical Note based on AIAA Paper 91-1131 CP911

J92-370 Assessment of Compressibility Corrections to the k-ϵ Model in High-Speed Shear Layers. John R. Viegas and Morris W. Rubesin, *NASA Ames Research Center* (**30**, 10, p. 2369) Synoptic based on AIAA Paper 91-1783

J92-371 Flowfield of a Lifting Rotor in Hover: A Navier-Stokes Simulation. G. R. Srinivasan, J. D. Baeder, S. Obayashi and W. J. McCroskey, *NASA Ames Research Center* (**30**, 10, p. 2371) Article

J92-372 Numerical Study of Shock-Wave/Boundary-Layer Interactions in Premixed Combustible Gases. Shaye Yungster, *NASA Lewis Research Center* (**30**, 10, p. 2379) Article based on AIAA Paper 91-0413

J92-373 Experimental Observations of Instability Modes in a Rectangular Jet. Chiang Shih, Anjaneyulu Krothapalli and Sivaram Gogineni, *Florida A&M University and Florida State University* (**30**, 10, p. 2388) Article based on AIAA Paper 90-3962

J92-374 Broadband Shock Associated Noise from Supersonic Jets Measured by a Ground Observer. Christopher K. W. Tam, *Florida State University* (**30**, 10, p. 2395) Article based on AIAA Paper 92-0502

J92-375 Linear Stability of Supersonic Cone Boundary Layers. Greg Stuckert and Helen Reed, *Arizona State University* (**30**, 10, p. 2402) Article

J92-376 Methodology for Calculating Aerodynamic Sensitivity Derivatives. Arthur C. Taylor III, Gene W. Hou and Vamshi Mohan Korivi, *Old Dominion University* (**30**, 10, p. 2411) Article based on AIAA Paper 91-1101 CP902

J92-377 Time-Averaged, Three-Dimensional Flow in a Rectangular Sudden Expansion. Jean R. Hertzberg, *University of Colorado*; and Chih Ming Ho, *University of California, Los Angeles* (**30**, 10, p. 2420) Article
Errata (**30**, 11, p. 2803)

J92-378 Numerical Study of Film Cooling in Supersonic Flow. John P. O'Connor and A. Haji-Sheikh, *University of Texas at Arlington* (**30**, 10, p. 2426) Article based on AIAA Paper 91-4010

J92-379 Numerical Simulation of Slot Injection into a Turbulent Supersonic Stream. Donald P. Rizzetta, *Wright Laboratory, Wright-Patterson AFB* (**30**, 10, p. 2434) Article based on AIAA Paper 92-0827

J92-380 Nonlinear Heating of a Magnetoplasma: Temperature of the Ionosphere. Yakov L. Alpert, *Harvard Smithsonian Center for Astrophysics* (**30**, 10, p. 2440) Article based on AIAA Paper 91-1474

J92-381 Application of a Parallel Direct Simulation Monte Carlo Method to Hypersonic Rarefied Flows. Richard G. Wilmoth, *NASA Langley Research Center* (**30**, 10, p. 2447) Article based on AIAA Paper 91-0772

J92-382 Experimental and Numerical Investigations of Low-Density Nozzle and Plume Flows of Nitrogen. Iain D. Boyd, *Eloret Institute*; Paul F. Penko, *NASA Lewis Research Center*; Dana L. Meissner and Kenneth J. DeWitt, *University of Toledo* (**30**, 10, p. 2453) Article

J92-383 Reduction of the Side Force on Pointed Forebodies Through Add-On Tip Devices. V. J. Modi, C. W. Cheng and A. Mak, *University of British Columbia, Canada*; and T. Yokomizo, *Kanto Gakuin University, Japan* (**30**, 10, p. 2462) Article based on AIAA Paper 90-3005 CP908

J92-384 Analysis of the Onset of Dynamic Stall. Jeffrey M. Currier and K.-Y. Fung, *University of Arizona* (**30**, 10, p. 2469) Article based on AIAA Paper 91-0003

J92-385 Laser Propulsion Using Free Electron Lasers. Dennis Keefer, Ahad Sedghinasab, Newton Wright and Quan Zhang, *University of Tennessee Space Institute* (**30**, 10, p. 2478) Article based on AIAA Paper 90-2636

J92-386 Aeroelastic Modal Characteristics of Mistuned Blade Assemblies: Mode Localization and Loss of Eigenstructure. Christophe Pierre, *University of Michigan*; and Durbha V. Murthy, *NASA Lewis Research Center* (**30**, 10, p. 2483) Article based on AIAA Paper 91-1218 CP911

J92-387 Vortical Flow Computations on a Flexible Blended Wing-Body Configuration. Guru P. Guruswamy, *NASA Ames Research Center* (**30**, 10, p. 2497) Article based on AIAA Paper 91-1013 CP911

J92-388 Flutter of Composite Laminated Beam Plates with Delamination. Le-Chung Shiau, *National Cheng Kung University, Taiwan, ROC* (**30**, 10, p. 2504) Article

J92-389 Analysis of Forced Bilinear Oscillators and the Application to Cracked Beam Dynamics. Y. C. Chu and M.-H. H. Shen, *Ohio State University* (**30**, 10, p. 2512) Article

J92-390 Mobilities of Periodic Structures in Terms of Asymptotic Modal Properties. T. Igusa and Y. Tang, *Northwestern University* (**30**, 10, p. 2520) Article

J92-391 Modal Analysis of Structures with Holonomic Constraints. Shih-Ming Yang, *National Cheng Kung University, Taiwan, ROC* (**30**, 10, p. 2526) Article

J92-392 Generalized Compound Scaling Algorithm and Application to Minimum Weight Design of Plate Structures. Ramana V. Grandhi and Narayana S. Venugopal, *Wright State University*; and Vipperla B. Venkayya, *Wright Laboratory, Wright Patterson AFB* (**30**, 10, p. 2532) Article based on AIAA Paper 91-0923 CP911

J92-393 Derivation of Green's Functions of Complex Structures Using Computer Algebra. James A. Fabunmi, *AEDAR Corporation*; and Peter C. Chang, *University of Maryland* (**30**, 10, p. 2540) Article

J92-394 Probability Density Function Shape Sensitivity in the Statistical Modeling of Turbulent Particle Dispersion. Ron J. Litchford, *University of Tennessee Space Institute*; and San-Mou Jeng, *University of Cincinnati* (**30**, 10, p. 2546) Technical Note

J92-395 Statistical Modeling of Turbulent Dilute Combusting Sprays. Ron J. Litchford, *University of Tennessee Space Institute*; and San-Mou Jeng, *University of Cincinnati* (**30**, 10, p. 2549) Technical Note based on AIAA Paper 91-2309

J92-396 Interaction Between Chemical Reaction and Turbulence in Supersonic Nonpremixed H_2-Air Combustion. R. Villasenor, *Vanderbilt University*; J.-Y. Chen, *University of California, Berkeley*; and R. W. Pitz, *Vanderbilt University* (**30**, 10, p. 2552) Technical Note

J92-397 Dynamical Scaling of a Model Unsteady Separating Flow. Mukund Acharya and Anwar Ramiz, *Illinois Institute of Technology* (**30**, 10, p. 2554) Technical Note

J92-398 Efficient Iterative Methods for the Transonic Small Disturbance Equation. A. S. Lyrintzis, A. M. Wissink and A. T. Chronopoulos, *University of Minnesota* (**30**, 10, p. 2556) Technical Note

J92-399 Approximate Riemann Solver for Hypervelocity Flows. P. A. Jacobs, *NASA Langley Research Center* (**30**, 10, p. 2558) Technical Note

J92-400 Grid Studies for Thin-Layer Navier-Stokes Computations of Airfoil Flowfields. D. W. Zingg, *University of Toronto Institute for Aerospace Studies, Canada* (**30**, 10, p. 2561) Technical Note based on AIAA Paper 92-0184

J92-401 Effect of Streamwise Pressure Gradient on the Supersonic Mixing Layer. Takashi Abe and Katsushi Funabiki, *Institute of Space and Astronautical Science, Japan*; Hironobu Arigan, *Musashi Institute of Technology, Japan*; and Katsumi Hiraoka, *Tokai University, Japan* (**30**, 10, p. 2564) Technical Note

J92-402 Study of Compressible Mixing Layers Using Filtered Rayleigh Scattering Based Visualizations. Gregory S. Elliott, Mo Samimy and Stephen A. Arnette, *Ohio State University* (**30**, 10, p. 2567) Technical Note

J92-403 Double Piston Shock-Wave Valve. H. Onodera, *Iwate University, Japan* (**30**, 10, p. 2569) Technical Note

J92-404 Role of Matrix in Viscoplastic Behavior of Thermoplastic Composites at Elevated Temperature. Seung Jo Kim and Jin Yeon Cho, *Seoul National University, Korea* (**30**, 10, p. 2571) Technical Note

J92-405 Substructure Decomposition Method for the Control Design of Large Flexible Structures. M. Sunar and S. S. Rao, *Purdue University* (**30**, 10, p. 2573) Technical Note

J92-407 Far-Field Computational Boundary Conditions for Two-Dimensional External Flow Problems. A. Verhoff, D. Stookesberry and S. Agrawal, *McDonnell Douglas Aircraft Company* (**30**, 11, p. 2585) Article based on AIAA Paper 91-0630

J92-408 Navier-Stokes Computation of Wing/Rotor Interaction for a Tilt Rotor in Hover. Ian Fejtek and Leonard Roberts, *Stanford University* (**30**, 11, p. 2595) Article based on AIAA Paper 91-0707

J92-409 Unsteady Laminar Compressible Swirling Flow with Massive Blowing. S. Roy and G. Nath, *Indian Institute of Science* (**30**, 11, p. 2604) Synoptic

J92-410 Aeroacoustic Environment of an Advanced Short Takeoff and Vertical Landing Aircraft in Hover. Richard W. Wlezien, *McDonnell Douglas Research Laboratories*; and Peter J. Ferraro, *McDonnell Aircraft Company* (**30**, 11, p. 2606) Article based on AIAA Paper 90-4016

J92-411 Active Control of Interior Noise in Model Aircraft Fuselages Using Piezoceramic Actuators. C. R. Fuller, *Virginia Polytechnic Institute and State University*; S. D. Snyder, *University of Adelaide, Australia*; and R. J. Silcox, *NASA Langley Research Center* (**30**, 11, p. 2613) Article based on AIAA Paper 90-3922

J92-412 Generalized Multipoint Inverse Airfoil Design. Michael S. Selig and Mark D. Maughmer, *Pennsylvania State University* (**30**, 11, p. 2618) Article based on AIAA Paper 91-3333 CP918

J92-413 Optical Microphone for the Detection of Hidden Helicopters. Cecil F. Hess, *MetroLaser* (**30**, 11, p. 2626) Article based on AIAA Paper 92-0377

J92-414 Nonlinear Vibration and Radiation from a Panel with Transition to Chaos. Lucio Maestrello, *NASA Langley Research Center*; Abdelkader Frendi, *Analytical Services and Materials, Inc.*; and Donald E. Brown, *Lockheed Engineering & Sciences Company* (**30**, 11, p. 2632) Article

J92-415 Dilatation-Dissipation Corrections for Advanced Turbulence Models. David C. Wilcox, *DCW Industries, Inc.* (**30**, 11, p. 2639) Article based on AIAA Paper 91-1785

J92-416 Unsteady Turbulent Skin-Friction Measurement in an Adverse Pressure Gradient. Kirk J. Flittie and Eugene E. Covert, *Massachusetts Institute of Technology* (**30**, 11, p. 2647) Article based on AIAA Paper 91-0168

J92-417 Implicit Navier-Stokes Solver for Three-Dimensional Compressible Flows. Seokkwan Yoon and Dochan Kwak, *NASA Ames Research Center* (**30**, 11, p. 2653) Article based on AIAA Paper 91-1555 CP914

J92-418 Pressure-Based Multigrid Algorithm for Flow at All Speeds. Wei Shyy and Ming-Hsiung Chen, *University of Florida*; and Chia-Sheng Sun, *National Cheng-Kung University, Taiwan, ROC* (**30**, 11, p. 2660) Article

J92-419 Hybrid Grid Approach to Study Dynamic Stall. Taekyu Reu and Susan X. Ying, *Florida State University* (**30**, 11, p. 2670) Article based on AIAA Paper 91-0599

J92-420 Fast, Adaptive Finite Element Scheme for Viscous Incompressible Flows. Jean-François Hétu and Dominique H. Pelletier, *École Polytechnique de Montréal, Canada* (**30**, 11, p. 2677) Article based on AIAA Paper 91-1564 CP914

J92-421 Analytical Solutions for Hypersonic Flow Past Slender Power-Law Bodies at Small Angle of Attack. A. Merlen and D. Andriamanalina, *Office National d'Etudes et de Recherches Aérospatiales, France* (**30**, 11, p. 2683) Article

J92-422 RIPPLE: A New Model for Incompressible Flows with Free Surfaces. D. B. Kothe and R. C. Mjolsness, *Los Alamos National Laboratory* (**30**, 11, p. 2694) Article based on AIAA Paper 91-3548

J92-423 Correlation of Mean Velocity Measurements Downstream of a Swept Backward-Facing Step. Daniel J. Weber, *U.S. Army Chemical Research, Development and Engineering Center*; and James E. Danberg, *U.S. Army Ballistic Research Laboratory* (**30**, 11, p. 2701) Article based on AIAA Paper 91-3240 CP918

J92-424 Emergence of Three-Dimensional Separation over a Suddenly Started Prolate Spheroid at Incidence. Tzuyin Wu and Shan-Fu Shen, *Cornell University* (**30**, 11, p. 2707) Article based on AIAA Paper 91-0544

J92-425 Comparison of Algebraic Turbulence Models for Afterbody Flows with Jet Exhaust. William B. Compton III, *NASA Langley Research Center*; Khaled S Abdol-Hamid, *Analytical Services and Materials, Inc.*; and William K. Abeyounis, *NASA Langley Research Center* (**30**, 11, p. 2716) Article

J92-426 Generalized Vortex Lattice Method for Oscillating Lifting Surfaces in Subsonic Flow. Paulo A. O. Soviero, *Instituto Technológico de Aeronáutica, Brazil*; and Marcos Vinicius Bortolus, *Universidade Federal de Minas Gerais, Brazil* (**30**, 11, p. 2723) Article

J92-427 Method of Simulating Unsteady Turbomachinery Flows with Multiple Perturbations. Li He, *Cambridge University, England, UK* (**30**, 11, p. 2730) Article

J92-428 Determination of Vortex Burst Location on Delta Wings from Surface Pressure Measurements. Douglas I. Greenwell and Norman J. Wood, *University of Bath, England, UK* (**30**, 11, p. 2736) Article

J92-429 Prediction of Interlaminar Stresses in Laminated Plates Using Global Orthogonal Interpolation Polynomials. Chansup Byun and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**30**, 11, p. 2740) Article

J92-430 Scale Effects in Buckling, Postbuckling, and Crippling of Graphite-Epoxy Z-section Stiffeners. Todd M. Wieland and John Morton, *Virginia Polytechnic Institute and State University*; and James H. Starnes Jr., *NASA Langley Research Center* (**30**, 11, p. 2750) Article based on AIAA Paper 91-0912 CP911

J92-431 Analysis of Fastened Structural Connections. Jacob Bortman and Barna A. Szabó, *Washington University* (**30**, 11, p. 2758) Article

J92-432 Dynamics of Skin-Stringer Panels Using Modified Wave Methods. Donald E. Huntington and Constantinos S. Lyrintzis, *San Diego State University* (**30**, 11, p. 2765) Article

J92-433 Implementation of Vigneron's Streamwise Pressure Gradient Approximation in Parabolized Navier-Stokes Equations. Joseph H. Morrison, *Analytical Services and Materials, Inc.*; and John J. Korte, *NASA Langley Research Center* (**30**, 11, p. 2774) Technical Note based on AIAA Paper 92-0189

J92-434 Gaster's Tranform. A. P. Roychowdhury and B. N. Sreedhar, *Indian Institute of Technology* (**30**, 11, p. 2776) Technical Note

J92-435 Coriolis Effects on Görtler Vortices in the Boundary-Layer Flow on Concave Wall. Ahmed Aouidef, *Office National d'Etudes et de Recherches Aérospatiales, France*; José Eduardo Wesfreid, *Ecole Supérieure de Physique de Chimie Industrielles, France*; and Innocent Mutabazi, *Université du Havre, France* (**30**, 11, p. 2779) Technical Note

J92-436 Surface Temperature Effects on Boundary-Layer Transition. Kenneth F. Stetson and Roger L. Kimmel, *Wright Laboratory, Wright-Patterson AFB* (**30**, 11, p. 2782) Technical Note

J92-437 Fully Elliptic Incompressible Flow Calculations on Regular Grid. G. V. Hobson, *Naval Postgraduate School*; and B. Lakshminarayana, *Pennsylvania State University* (**30**, 11, p. 2783) Technical Note based on AIAA Paper 90-0239

J92-438 Extension of the λ Formulation to Imperfect Gas Flows. Diego Lentini, *Universitá degli Studi di Roma 'La Sapienza,' Italy* (**30**, 11, p. 2785) Technical Note

J92-439 Surface Reaction Model for Catalyzed Composite Solid Propellants. S. Krishnan and R. Jeenu, *Indian Institute of Technology* (**30**, 11, p. 2788) Technical Note

J92-440 Stiffness Design Method of Symmetric Laminates Using Lamination Parameters. Hisao Fukunaga and Hideki Sekine, *Tohoku University, Japan* (**30**, 11, p. 2791) Technical Note

J92-441 Vibration of Compressively Loaded Shear Deformable Flat Panels Exhibiting Initial Geometric Imperfections. L. Librescu, *Virginia Polytechnic Institute and State University*; and M. Y. Chang, *National Chung-Hsing University, Taiwan, ROC* (**30**, 11, p. 2793) Technical Note

J92-442 Fourier Analysis of Clamped Moderately Thick Arbitrarily Laminated Plates. Reaz A. Chaudhuri and Humayun R. H. Kabir, *University of Utah* (**30**, 11, p. 2796) Technical Note

J92-443 Buckling Testing of Composite Columns. Ever Barbero and John Tomblin, *West Virginia University* (**30**, 11, p. 2798) Technical Note

J92-447 Quasiconical Flowfield Structure of the Three-Dimensional Single Fin Interaction. Doyle D. Knight and Dias Badekas, *Rutgers University*; C. C. Hortsmann, *NASA Ames Research Center*; and Gary S. Settles, *Pennsylvania State University* (**30**, 12, p. 2809) Article

J92-448 Development of the Wake of an Airfoil with Riblets. J. M. Caram and A. Ahmed, *Texas A&M University* (**30**, 12, p. 2817) Synoptic based on AIAA Paper 89-2199 CP896

J92-449 Effect of Modal Interaction on Sound Radiation from Vibrating Structures. Kenneth A. Cunefare, *Georgia Institute of Technology* (**30**, 12, p. 2819) Article based on AIAA Paper 92-0372

J92-450 Finite-Volume Implementation of High-Order Essentially Nonoscillatory Schemes in Two Dimensions. Jay Casper, *Vigyan, Inc.* (**30**, 12, p. 2829) Article based on AIAA Paper 91-0631

J92-451 Coupled Euler/Boundary-Layer Method for Nonequilibrium, Chemically Reacting Hypersonic Flows. S. Wüthrich and M. L. Sawley, *Ecole Polytechnique Fédérale de Lausanne, Switzerland* (30, 12, p. 2836) Article

J92-452 Experimental Study on the Evolution of a Wall Layer from a Wake. S. Sundaram and K. S. Yajnik, *National Aeronautical Laboratory, India* (30, 12, p. 2845) Article

J92-453 Streamwise Evolution of a Square Jet Cross Section. W. R. Quinn, *St. Francis Xavier University, Canada* (30, 12, p. 2852) Article

J92-454 Production of Oxygen on the Moon: Which Processes Are Best and Why. Lawrence A. Taylor, *University of Tennessee*; and W. David Carrier III, *Bromwell & Carrier, Inc.* (30, 12, p. 2858) Article based on AIAA Paper 92-1662

J92-455 Crossflow Aerodynamic Characteristics of a Noncircular Cylinder with and Without Strakes. Bandu N. Pamadi, *Vigyan Research Associates, Inc.*; and B. H. Laxmana Gowda, *Indian Institute of Technology* (30, 12, p. 2864) Article based on AIAA Paper 88-2599 CP886

J92-456 Programming Probabilistic Structural Analysis for Parallel Processing Computers. Robert H. Sues and Heh-Chyun Chen, *Applied Research Associates, Inc.*; Christos C. Chamis and Papu L. N. Murthy, *NASA Lewis Research Center* (30, 12, p. 2871) Synoptic based on AIAA Paper 91-0920 CP911

J92-457 Flutter Suppression of Thin Airfoils Using Active Acoustic Excitations. Pong-Jeu Lu and Li-Jeng Huang, *National Cheng Kung University, Taiwan, ROC* (30, 12, p. 2873) Article

J92-458 Application of Adaptive Technology to Static Aeroelastic Control of Wing Structures. O. Song, L. Librescu and C. A. Rogers, *Virginia Polytechnic Institute and State University* (30, 12, p. 2882) Article

J92-459 Inverse Eigenvalue Problem in Structural Design. K. T. Joseph, *Vikram Sarabhai Space Centre, India* (30, 12, p. 2890) Article

J92-460 Postbuckling Response of Stiffened Composite Cylindrical Shells. Srinivasan Sridharan and Madjid Zeggane, *Washington University*; and James H. Starnes Jr., *NASA Langley Research Center* (30, 12, p. 2897) Article

J92-461 Effects of Interply Damping Layers on the Dynamic Characteristics of Composite Plates. D. A. Saravanos and J. M. Pereira, *NASA Lewis Research Center* (30, 12, p. 2906) Article based on AIAA Paper 91-1124 CP911

J92-462 Structural Behavior of Two-Cell Composite Rotor Blades with Elastic Couplings. Ramesh Chandra and Inderjit Chopra, *University of Maryland* (30, 12, p. 2914) Article

J92-463 Active, Passive, and Semiactive Vibration Suppression by Stiffness Variation. Junjiro Onoda, *Institute of Space and Astronautical Science, Japan*; Tetsuji Sano, *University of Tokyo*; and Kohichi Kamiyama, *Nihon University, Japan* (30, 12, p. 2922) Article based on AIAA Paper 92-2090 CP923

J92-464 Exact Vibration Solutions for Nonuniform Timoshenko Beams with Attachments. Sen Yung Lee, *National Cheng Kung University, Taiwan, ROC*; and Shueei Muh Lin, *Kung Shan Institute of Technology, Taiwan, ROC* (30, 12, p. 2930) Article

J92-465 Eigenvalue Error Analysis of Viscously Damped Structures Using a Ritz Reduction Method. Cheng-Chih Chu and Mark H. Milman, *Jet Propulsion Laboratory, California Institute of Technology* (30, 12, p. 2935) Article

J92-466 Simplified Theory for Composite Thin-Walled Beams. Xi-Xian Wu and C. T. Sun, *Purdue University* (30, 12, p. 2945) Article

J92-467 Improved Fixed Interface Method for Modal Synthesis. L. E. Suarez, *University of Puerto Rico*; and M. P. Singh, *Virginia Polytechnic Institute and State University* (30, 12, p. 2952) Article

J92-468 Buckling of Symmetrically Laminated Plates with Compression, Shear, and In-Plane Bending. Michael P. Nemeth, *NASA Langley Research Center* (30, 12, p. 2959) Article based on AIAA Paper 92-2286 CP922

J92-469 Singular Behavior in Boundary-Layer Flow of a Dusty Gas. Ali J. Chamkha, *Fleetguard, Inc.*; and John Peddieson Jr., *Tennessee Technological University* (30, 12, p. 2966) Technical Note

J92-470 Curvature Corrections to Reynolds Stress Model for Computation of Turbulent Recirculating Flows. Sang Keun Dong, *Korea Institute of Energy Research*; and Myung Kyoon Chung, *Korea Advanced Institute of Science and Technology* (30, 12, p. 2968) Technical Note

J92-471 New Wall-Reflection Model Applied to the Turbulent Impinging Jet. T. J. Craft, *Centre Européen de Recherche et de Formation Avancée en Calcul Scientifique, France*; and B. E. Launder, *UMIST, England, UK* (30, 12, p. 2970) Technical Note

J92-472 Correlation of Type III Turbulent Shock Interaction Heating Data on a Hemisphere. Steven A. Lutz, *Johns Hopkins University* (30, 12, p. 2973) Technical Note

J92-473 Example of Second-Mode Instability Dominance at a Mach Number of 5.2. Kenneth F. Stetson and Roger L. Kimmel, *Wright Laboratory, Wright-Patterson AFB* (30, 12, p. 2974) Technical Note

J92-474 Downstream Influence Scaling of Turbulent Flow Past Expansion Corners. Frank K. Lu and Kung-Ming Chung, *University of Texas at Arlington* (30, 12, p. 2976) Technical Note

J92-475 Flow of Rarefied Gas past a Liquid Sphere. Masatugu Tomoeda, *Kumamoto Institute of Technology, Japan* (30, 12, p. 2977) Technical Note

J92-476 Comparison of Chemical Kinetic Rate Mechanisms for High-Temperature Air, Including Electronic Energy. Yvette Weber and John Anderson Jr., *University of Maryland* (30, 12, p. 2980) Technical Note

J92-477 Preferential Thermal and Multicomponent Species Transport Effects in Strained Diffusion Flames. J. C. Hermanson and A. Vranos, *United Technologies Research Center* (30, 12, p. 2982) Technical Note

J92-478 Comparison of Numerical Oblique Detonation Solutions with an Asymptotic Benchmark. Matthew J. Grismer and Joseph M. Powers, *University of Notre Dame* (30, 12, p. 2985) Technical Note

J92-479 Supersonic Flutter of Composite Sandwich Panels. Le-Chung Shiau, *National Cheng Kung University, Taiwan, ROC* (30, 12, p. 2987) Technical Note

J92-480 Criterion for Decoupling Dynamic Equations of Motion of Linear Gyroscopic Systems. M. Liu and J. M. Wilson, *University of Durham, England, UK* (**30**, 12, p. 2989) Technical Note

J92-481 Nonlinear Free Vibration Characteristics of Laminated Anisotropic Thin Plates. B. Nageswara Rao, *Vikram Sarabhai Space Center, India* (**30**, 12, p. 2991) Technical Note

J92-482 Fully Nonlinear Model of Cables. Perngjin F. Pai and Ali H. Nayfeh, *Virginia Polytechnic Institute and State University* (**30**, 12, p. 2993) Technical Note

J92-483 Beam Deflection. Yoon Young Kim, *Seoul National University, Korea* (**30**, 12, p. 2996) Technical Note

Books Reviewed During 1992

Automatic Flight Control Systems, by D. McLean, *Prentice-Hall,* (**30**, 2, p. 507); reviewed by A. E. Bryson.

Fossil Fuel Combustion: A Source Book, edited by W. Bartok and A. F. Sarofim, *Wiley,* (**30**, 3, p. 858); reviewed by J. W. Daily.

Combustion Measurement, edited by N. Chigier, *Hemisphere,* (**30**, 4, p. 1146); reviewed by G. M. Dobbs.

Automatic Control of Aircraft and Missiles, by J. H. Blakelok, *Wiley,* 2nd Ed., (**30**, 5, p. 1449); reviewed by J. V. Lebacqz.

Recent Developmetns in Turbulence Management, edited by K.-S. Choi, *Kluwer,* (**30**, 7, p. 1937); reviewed by M. Gad-el-Hak.

High Angle of Attack Aerodynamics: Subsonic, Transonic, and Supersonic Flows, by J. Rom, *Springer-Verlag,* (**30**, 10, p. 2576); reviewed by J. E. Lamar.

Whither Turbulence? Turbulence at the Crossroads, edited by J. L. Lumley, Vol. 357, Lecture Notes in Physics, *Springer-Verlag,* (**30**, 12, p. 2999); reviewed by J. T. C. Liu.
